21st Annual Report

of the

AIRPORT MANAGER

of the

NEW BEDFORD MUNICIPAL AIRPORT

For the Year Ending December 31, 1967

BRADBURY-WARING DIVISION
REYNOLDS-DEWALT PRINTING, INC.
New Bedford, Mass.
1968

December 31, 1967

To the Honorable Edward F. Harrington, Mayor, and the
Gentlemen of the City Council of the City of New Bedford.

Gentlemen:

Presented herewith is the Annual Report of the New Bedford Municipal Airport.

The New Bedford Airport Commission in its continuing goal to increase the usage of the airport and its facilities has held a series of meetings with the officials of Northeast Airlines. It is hoped that these meetings will show constructive results. The goal of the Airport Management and the Commission is to reach a financial stability which would eliminate the need of the usage of City funds.

The future of the airport is a bright one and all concerned look eagerly to the realization of the New Bedford Municipal Airport Industrial Park.

I am grateful to the Airport Manager, Mr. Jason Taylor, and to the members of the Airport Commission for their dedication.

Respectfully submitted,

N. B. AIRPORT COMMISSION

ISIDORE EISNER,

Chairman

NEW BEDFORD AIRPORT COMMISSION

Year Ending December 31, 1967

December 31, 1967

The New Bedford Airport Commission:

Gentlemen:

December 31, 1967 marks the end of the twenty-first full year during which the City of New Bedford has operated its Municipal Airport.

The number of takeoffs and landings recorded by the Federal Aviation Agency Control Tower during 1967 totaled 62,369 compared to 53,954 during 1966, an increase of 8,415.

The following percentages, based on the total number of takeoffs and landings of the past two years, show clearly the type of aircraft now using the field:

Type	1966	1967
Air Carrier	11.80%	6.12%

Itinerant Aircraft:

Military	3.25		3.14	
Civil	<u>55.20</u>	58.45%	<u>56.74</u>	59.88%

Local Aircraft:

Military	8.71		8.40	
Civil	<u>21.04</u>	29.75%	<u>25.60</u>	34.00%

The following chart shows the number of takeoffs and landings recorded during the years 1966 and 1967 and the number of days they were recorded:

Number of takeoffs and landings	Number of days during the year	
	1966	1967
200 or more	95	138
100 — 199	176	135
75 — 99	28	20
50 — 74	18	18
25 — 49	20	23
15 — 24	13	18
10 — 14	6	3
5 — 9	5	6
1 — 4	3	2
0	1	2

HIGHLIGHTS OF THE YEAR'S ACTIVITIES:

In February the Federal Aviation Administration Control Tower hours were changed from twenty-four hours daily to sixteen. This move by the F. A. A. was national and affected many other airports throughout the country that apparently did not have enough traffic during the early morning hours to warrant the expense of having controllers on duty during those hours. However, we have installed two-way radio equipment on Unicom frequency and so far have been able to adequately handle the situation with our own personnel.

As far as reinstating the tower to twenty-four hour service, I frankly feel that it will be some time before this happens.

Our capital improvement for the year, with the help of Federal and State aid, was the resurfacing and marking of taxiways to runways 5 and 32. The total cost of this project was \$40,162.26 of which ninety percent was paid for by the Federal and State agencies and the remaining ten percent by the city.

Two other major improvements were the installation of a new roof on the City Hangar at a cost of \$3,782.80, and a new air cooled type air conditioner for the Control Tower at a cost of \$1,407.28. The cost of these two projects was borne entirely by the city with monies encumbered from our 1966 Reserve.

Because of increased operating expenses it was voted by the commission to increase our building and land rental rates. New rates established were as follows: First floor rates of the administration building were increased from three dollars to four dollars per square foot per year; second floor rates were increased from two dollars to three dollars per square foot per year. Property in the southeast quadrant of the airport in the vicinity of the administration building and adjacent to the taxiways was set at three cents per square foot per year, while all other property was set at two cents per square foot per year.

During the year all federal restrictions were removed from a ninety-nine year lease between O'Hara Realty, Inc. and the City of New Bedford. This, I feel, has set a precedent that could be favorable and prove advantageous in the development of our newly proposed Industrial Air Park. These restrictions that were removed were not conducive to initial or refinancing by corporations located, or wishing to locate, on leased property under the control of the New Bedford Airport Commission.

A seemingly small, yet important, endeavor was the clean-up of the Shawmut Avenue approach to the airport. This was accomplished mainly through the efforts of our chairman, Mr. Eisner, along with the help of concerns located along the avenue, other city departments and airport personnel. The results have been gratifying and I sincerely hope that the few remaining litter bugs will develop a conscience before next summer.

Our first reservation service was installed this year by the Holiday Inn of Fall River. Since that time interest has been shown by others in the area relative to a similar installation and it is my hope that eventually we may set up a reservation center in the lobby which will serve the motels and hotels of the Greater New Bedford Area.

Although all preliminary engineering has been accomplished relative to our Industrial Air Park, the project has virtually come to a standstill because of the lack of federal funds. These funds are needed for the construction of access roads, installation of water and sewage facilities and a taxiway parallel to runway 32.

Again we have had a successful year in the acquisition of Government Surplus Equipment on a donation basis. The following equipment was transferred to the City of New Bedford for airport purposes: One farm tractor, one G. M. C. truck and one Ford Sedan. All of this equipment was in good condition and required very little money to make them operational.

Unfortunately, we still do not have a modern Foam Crash Truck. However, we have finally started the ball rolling. First, by the drawing up of specifications and second, by the transferring of \$16,000 from our 1967 Reserve to a special account. In my opinion, unless prices skyrocket, we should be able to purchase an adequate Foam Crash Truck for approximately \$25,000, especially since the development of a new fire extinguishing agent known as "Light Water." This agent is four times more effective than any of the presently known extinguishments and due to its simplicity in mixing and application will mean the elimination of a proportioner which could help to keep the cost of the truck within our budget.

I am very pleased to say that the amount of enplaned passengers by Northeast Airlines from New Bedford increased this year by approximately twenty percent over that of 1966. Also, our total enplaned passengers, including that of Massachusetts Air Industries to the Islands, came to 21,269 which compares favorably with our best year, 1957, in which we enplaned 22,149 passengers.

Incidentally, during the year 1957 Northeast Airlines serviced the Islands from here as well as New York, which means that any totals used for comparison purposes must include Massachusetts Air Industries.

The increase in business I attribute to two facts. One, the general increase in air travel based on national figures, and the fact that we have been serviced throughout the year by modern turboprop aircraft.

My recommendations for the year 1968 are as follows:

1. Obtain a new Foam Crash Truck.
2. Repaint All-Weather markings on the Instrument Run-way.

3. Increase parking apron area if Federal and State Funds are available.
4. Attempt to obtain Federal Funds for installation of access roads and utilities in the Industrial Air Park area.
5. Start planning for the resurfacing of taxiways to Runways 14 and 23.

In conclusion I wish to say that I am grateful to all those that helped to make this an eventful year.

Respectfully submitted,

JASON G. TAYLOR,
Airport Manager

SUPERINTENDENT AND INSPECTOR OF BUILDINGS

ANNUAL REPORT

1967

In accordance with Chapter 5, Section 3-511 of the City Code of the City of New Bedford, I hereby submit a report of the activities of the Superintendent of Buildings for the calendar year of 1967.

BUILDING DEPARTMENT

A total of Six Hundred Eighty Four (684) permits were issued in 1967 amounting to Five million, two hundred ninety seven thousand, ninety four dollars (\$5,297,094.00). This was twenty one (21) less than 1966 and the total valuation was One million, seven hundred ninety eight thousand, six hundred and fifty five dollars (\$1,798,655.00) less than in 1966.

List of some of the large permits issued in 1967:

American Flexible Conduit Co. 969 Shawmut Ave. Erect an addition	\$25,000.00
Revere Copper and Brass Co. 24 North Front St. Erect addition for office space	110,000.00
Kentucky Fried Chicken Cor. County St. and High St. Alter for restaurant	20,000.00
M. Mendes and Son Industrial Park Erect an addition	80,000.00
Howard Truck Center Myrtle St. South of Sawyer St. Erect a steel garage	25,000.00
Private Poirier Post 3260 281 Appleton St. Erect Club house	75,000.00

Tarkiln Realty Trust Co. Industrial Park Erect a manufacturing plant	125,000.00
Mark Astrachan Union St. and Tremont St. Erect an office building	32,000.00
Revere Copper and Brass Co. 24 North Front St. Erect forging building	225,000.00
Milburn Realty Co. 1357 East Rodney French Blvd. Erect an addition	55,000.00
Milburn Realty Co. 1357 East Rodney French Blvd. Erect offices and cafeteria	104,000.00
New Bedford Gas & Edison Light Co. So. Water St. and Walnut St. Alter for offices	20,000.00
Club Madeirense S. S. Tinkham St. Erect multi purpose building	20,000.00
City of New Bedford Water Department West Side of Shawmut Ave. Erect a building	348,797.00
Cornell Dubilier Inc. 1605 Rodney French Blvd. Alter for office	25,000.00
New Bedford Gas & Edison Light Co. 283 So. Water St. Alterations for offices	30,000.00
Merchants Bank 103 Williams St. Alterations for office	20,000.00
Babbitt Steam Speciality Co. E. S. Mt. Pleasant St. Erect building	166,000.00

Phillips Petroleum Co. Ashley Blvd. and Daniel St. Erect a filling station	20,000.00
Norman Mathieu Acushnet Ave. and June St. Erect a retail store	35,000.00
Our Lady of Fatima Church S. S. Tobey St. E. of Acushnet Ave. Erect a parish hall	30,000.00
American Conduit Co. 969 Shawmut Ave. Erect a storage building	20,000.00
New Bedford Fish Products Co. 2 Washburn St. Erect an addition	98,000.00
Whaler City Motor Inn Inc. 548 Hathaway Road Erect a motel	800,000.00
Edson Corp. Industrial Park Erect a manufacturing plant	60,000.00

Bids were opened in April, 1967 for new Water Department Buildings on city owned land, on the east side of Shawmut Avenue. The buildings will include repair shops, garages, storage and office space, and will replace present buildings on North Water Street in the path of the proposed down town connector. Plans and specifications were prepared by Owen E. Hackett, Jr. and Associates. Contract for construction was awarded to the lowest bidder, Sydney Construction Co., Inc. of Brookline, Massachusetts for their bid of \$348,797.00. The buildings were "substantially completed" and occupied in December, though several punch list items remain to be satisfactorily completed.

The stone ventilating tower in the southeast corner of the Municipal Parking Lot was damaged by a motor vehicle in April of 1967. Olson and Appleby, Inc., was the lowest of several bidders and was awarded the contract to make repairs

for \$640.00. This amount was reimbursed by the vehicle owner's insurance company.

Acting for the New Bedford Industrial Development Commission this department prepared plans and specifications for the erection of a sign at the New Bedford Industrial Park. The sign was erected by the Poyant Sign Company, of New Bedford, for \$3,437.50.

A contract to demolish 65 dilapidated buildings was awarded to Gracia Bros., Inc. for \$51,550.00 on August 8, 1967. This work is being accomplished under a Federal Demolition Grant approved by the Department of Housing and Urban Development. By the end of December, 1967, over 40 buildings had been demolished under this program, designated as Project No. Mass.-M4. An additional 8 buildings have been demolished by the owners and building permits have been issued for the repair and rehabilitation of 16 buildings. An additional 13 buildings have been added to the contract and 24 buildings have been deleted, because of the repairs and demolition by owners. Change orders effecting these additions and deletions, as of the end of 1967, have reduced the original contract price from \$51,550.00 to \$45,050.00. All work under this contract is contemplated to be finished during March, 1968. A new list of buildings is being compiled, to be demolished under another contract during 1968.

The addition to the Campbell Elementary School, erected under a contract awarded to the DeLoid and Gomes Construction on September 20, 1966, was substantially completed, and occupied by the School Departments, on September 5, 1967. Final acceptance will not be made until early 1968 when it is expected several minor items will have been satisfactorily completed.

SUMMARY OF BUILDING PERMITS

1967

	Permits	Estimated Cost
*NEW CONSTRUCTION		
Dwellings	183	\$2,191,700.00
Stores, Bus., Mfg.	32	1,994,322.00
Garages	54	83,412.00
Schools, Hospitals, Institutions	1	30,000.00
	1	20,000.00
	15	32,200.00
	<hr/> 286	<hr/> \$4,351,634.00
**ALTERATIONS AND ADDITIONS		
Dwellings	234	180,720.00
Bus., Mfg., etc.	74	757,040.00
	<hr/> 308	<hr/> \$ 937,760.00
*New Construction	286	4,351,634.00
**Alterations and Additions	308	937,760.00
Heating	13	7,700.00
Demolitions	77
	<hr/> 684	<hr/> \$5,297,094.00

There were One hundred eighty three (183) new dwellings and eighteen new apartments added by conversion.

Comparative Summary of Construction for the Last Five Years

Year	No. of Permits	Estimated Cost
1963	745	\$5,392,646.00
1964	790	6,296,401.00
1965	713	9,204,241.00
1966	705	7,095,749.00
1967	684	5,297,094.00

The Department made 30 special investigations during the year 1967. Special investigations are made as a result of a complaint by a tenant or a neighbor relative to a violation of zoning or building code.

There were 27 sign applications during 1967 which were forwarded by the City Clerk to be approved by this Department as to construction, site of location and method of erection and maintenance.

There were 24 appeals from the ruling of the Inspector of Buildings during the year 1967 relative to the application of the zoning ordinances.

Granted	17
Denied	4
Withdrawn	3
	<hr/>
	24

Appeals that are granted are reversals of the rulings of the Inspector of Buildings; while appeals that were denied upheld the Inspector's ruling.

Places of assembly must be carefully examined according to Chapter 143 of the General Laws, as amended, before a license for their use can be obtained. This includes every building or part thereof, used as a place of public assembly and capable of accommodating 50 or more people; where 10 or more people are employed; rooming houses and apartment houses having eight rooms or 10 people above the second floor.

The following places of assembly were checked and issued certificates during 1967.

	Renewal
Cafes, Clubs, etc.	68
Industrials	6

During the year 1967, 27 Rooming Houses having 599 rooms, were inspected. A report of each inspection was forwarded to the State Department of Public Safety.

Inspections were made on Boarding Homes, Convalescent Homes, and Nurseries providing day care services for children.

BUILDING MAINTENANCE

Employees of this division of the Building Department have performed maintenance work on all city owned buildings, except public school buildings, and have set up bandstands for various public functions, and civic organizations. They have also done miscellaneous jobbing and trucking for other departments.

Plumbing, electrical, carpentry work and painting have been done in the Municipal Building, North and South End Comfort Stations, Welfare Building, Fire Stations, Library buildings, Police Stations, Airport, Incinerator Plant and at the former Isolation Hospital, now used by the Health Department for a laboratory and chest X-rays.

Respectfully submitted,

EVELYN HENDRICKS

Clerk of the Cemetery Board

BOARD OF CEMETERY COMMISSIONERS

To the Honorable Mayor and City Council
New Bedford, Massachusetts

Gentlemen:

The Cemetery Board, herewith, presents its seventy-third Annual Report.

We regret to report that Mr. Joseph J. Beattie, who served on the Cemetery Board, with distinction, from May 1957, passed away after a short illness, May 30, 1967.

Due to the price increase of crypts in the 1967 contract, the crypt charges for Welfare Cases had to be raised to conform with the contract.

We entered a display in the Annual Kiwanis Club Spring Flower Show that was held at the Lincoln Park Pavilion March 31 through April 2, 1967. The theme of the show was "A World of Flowers" consisting of garden arrangements of different countries. Our display was of France, with a replica of the Eiffel Tower upon which was flown a French flag. Geraniums and coleus plants made up the flower beds and French lilac trees were also in the display, as they are all grown in France. All of the signs were lettered in French to carry out the theme, also.

In May, a patrolman was appointed to patrol the Rural Cemetery, evenings, and he was given the use of our department ranch wagon.

Technicians, from the Saint Luke's Hospital, came to the Rural Cemetery toolhouse, where they set up their equipment for testing our employees for emphysema and bronchial ailments. Twenty-nine of our cemetery employees took advantage of this service, and were tested.

Two veteran's flags were donated to our department; one for Fridolin Blanchard, by his son, Roland H. Blanchard

of 78 Dewolf Street, this city, and another for Robert C. Kenyon, by the American Legion Post Number one.

Mrs. Alice E. Crook, Janitress in our department since 1955, was appointed to Clerk-Janitress, August 1, 1967.

Our Gardener and Florist, Mr. Edward McConville, resigned June 17th to accept a position as Park Keeper in the New Bedford Park Department.

On June 27th, Mr. Fred Thornhill was promoted to **Assistant Superintendent of Cemeteries**, replacing Mr. Henry J. Wareing who transferred to the New Bedford Park Department, last year.

Mrs. Gladys R. Lucas was appointed as Janitress at the Rural Cemetery, and began her employment, November 13, 1967. She had previously been employed by the School Department.

Due to the City Employee's Union Agreement, new working hours for the cemetery laborers became effective, July 31, 1967. They are 8:00 a.m. to 4:30 p.m., Monday through Saturday, with one half hour for lunch, from 12:00 p.m. to 12:30 p.m. If it is necessary to work after 4:30 p.m., an increase of eleven dollars (\$11.00) per hour or any part thereof, will be charged for overtime pay.

The following equipment was purchased, this year:

- Six (6) Jacobsen 21" Turbine Rotary Mowers.
- Six (6) Jacobsen 20" Commercial Gas Power Mowers.
- One (1) 70" Locke Triplex Gas Power Mower.
- One (1) 84" National Triplex Mower.
- One (1) Tractor-Loader Backhoe.
- One (1) Snow Plow.
- One (1) 1500 Watt Generator, mounted on Dolly.
- Three (3) Grass Sets.
- One (1) Bradford Electric Water Heater.

The following securities were purchased with funds deposited for the perpetual care of lots:

20M American Telephone and Telegraph Company

Registered $5\frac{1}{2}$ Debentures, due January 1, 1997.

20M American Telephone and Telegraph Company
Registered $5\frac{1}{8}$, due April 1, 2001.

10M Chesapeake and Potomac Telephone Company of
Virginia Registered $5\frac{1}{4}$ Debentures, due May 1,
2005.

10M Philadelphia Electric Company Registered $6\frac{1}{8}$, due
October 1, 1997.

Our department turned over, to the City Clerk's office,
recording fees amounting to one hundred ninety-six dollars
(\$196.00), representing payments for the following transac-
tions:

Cemetery	Graves Sold	Lots Sold	Transfers of Lots and Graves	Burial Right Assignments	Total
Rural	28	27	7	27	89
Oak Grove	00	10	3	11	24
Pine Grove	24	41	9	9	83
	—	—	—	—	—
Totals	52	78	19	47	196

The need of new mowers and trimmers cannot be too
strongly stressed, as we cut grass on approximately five thou-
sand lots, each year. In order to fulfill our contract with the
lot owners and keep our own property in satisfactory condi-
tion, we must replace the equipment, annually.

We take this opportunity to express our sincere thanks
and appreciation for the kindness, assistance and cooperation
received from His Honor, the Mayor, Members of the City
Council, Department Heads and our own department person-
nel.

Respectfully submitted,

RALPH E. SALTUS, Chairman

JOHN E. MEDEIROS, Secretary

J. TUNSTALL PARHAM

LIONEL J. SOUZA

SUPERINTENDENT'S REPORT

To the Board of Cemetery Commissioners
Gentlemen:

I, herewith, submit the annual report of the work done under my supervision during the year 1967, and recommendations for 1968.

RURAL CEMETERY

The water overflow along the Weaver Street wall has been greatly relieved, since all of the catch basins were cleaned out by the Department of Public Works.

Vandalism continues to be a problem. During the past year, forty-seven headstones were turned over and some broken beyond repair. The stones that could be reset were taken care of by our own men.

The October windstorm blew down five large trees, and these were removed. I recommend that these trees be replaced in 1968.

A parking lot was built across from the main office, and it has relieved the traffic problem that we had.

In 1968, we expect to have the main office building painted on the outside.

Alec Street was extended from Grape Street to our cemetery wall, by the Department of Public Works.

OAK GROVE CEMETERY

New cement sidewalks were built on the inside and outside of our greenhouses, and this has made the appearance and working conditions much better for the men.

On the east side of the greenhouse, a new storm entrance was built by boys from the New Bedford Vocational High School, and the north side of the roof of our main building was reshungled by employees of the Building Department.

After a heavy rainstorm, we get water in the greenhouse basement, therefore, I recommend that a sump pump be installed, next year, to take care of this condition.

A section of dry stone wall was removed on the north side of Section 5, and it was replaced by a wooden fence, at no cost to our department.

Vandals broke the marble door on the Davis-Hatch Tomb, located in Section GG and, inasmuch, as we do not expect any more bodies to be entombed, we have boarded up the entrance. They also overturned over twenty-one stones.

PINE GROVE CEMETERY

Because of a bad leak, the Water Department replaced a meter in the main line going into the Acushnet Avenue entrance.

Our men cleaned out the overflow basin in the pond at the World War I Veteran's Plot, and the Department of Public Works worked on some of the drains. This resulted in a better flow of water into the drainage system.

In 1968, we should have enough dirt fill to finish the grade on the single grave section. At that time, we hope to landscape the south side.

GENERAL

A twenty-gallon hot water heater was installed in the basement of the main office, by the Building Department, as we needed hot water for cleaning purposes.

For our display in the Kiwanis Club Flower Show, we were awarded the second prize, and our greenhouse men are to be commended for this fine showing.

Two of our trucks were assigned to the Water Department, during the snow storms, to aid in the removal of snow from the Municipal Parking Lot.

The Am-Vets organization was granted permission to hold Pearl Harbor Day services at the World War II Veteran's Plot, in the Rural Cemetery.

I express my thanks for the assistance I have received from your Honorable Board, His Honor, the Mayor, members of the City Council, Department Heads, and their personnel and to the employees of the Cemetery Department for their cooperation during the year 1967.

REPORT OF CARETAKER
of
SOLDIERS' AND SAILORS' GRAVES

New Bedford, Mass.

January 1, 1968

To the Honorable City Council of the
City of New Bedford

Gentlemen:

I, hereby, submit the following report of the work done, during 1967, on neglected lots and graves where soldiers and sailors are interred, as authorized in Chapter 218, Acts of Legislature, 1920:

	Care of Lots and Graves
Rural Cemetery	178
Oak Grove Cemetery	145
Pine Grove Cemetery	22
Peckham West Cemetery	24
Congregational Church Cemetery	2
Griffin Street Cemetery	9
	<hr/> 380

The amount appropriated for this work was \$2,500.00, and this amount was expended for cutting grass.

Respectfully submitted,

JOHN THORNHILL

Caretaker of Soldiers' and
Sailors' Graves

CEMETERY BOARD

ANNUAL REPORT

BOARD OF CEMETERY COMMISSIONERS

City Clerk

Attest:

CHARLES W. DEASY,

City Clerk

ANNUAL REPORT
OF THE
CITY AUDITOR
OF THE
CITY OF NEW BEDFORD
MASSACHUSETTS
FOR THE YEAR 1967

THE BAKER MFG. CO.
Printers
New Bedford, Mass.

CITY OF NEW BEDFORD

Office of the City Auditor

**To His Honor Edward F. Harrington, Mayor of New Bedford and
the Honorable City Council:**

Submitted herewith are the following statements and schedules showing the receipts and expenditures for the City of New Bedford for the calendar year ending December 31, 1967 and the financial conditions.

Exhibit A — Balance Sheet as of December 31, 1967.

**Exhibit B — Statement of Receipts for the year ending
December 31, 1967.**

**Exhibit C — Statement of Expenditures for the year ending
December 31, 1967.**

**Exhibit D — Summary of Receipts and Expenditures for the
year ending December 31, 1967.**

**Exhibit E — Report of Appropriations, Receipts and Ex-
penditures for the calendar year January 1,
1967 to December 31, 1967.**

**Exhibit F — Schedule of Bonded Debts and Sinking Funds
as of December 31, 1967.**

**Exhibit G — Schedule of Indebtedness Payable at the close
of the calendar years 1944 through 1967.**

**Exhibit H — Summary of Bonded Debt and Sinking Funds
as of December 31, 1967.**

**The City of New Bedford closed the calendar year 1967 with a
deficit of \$44,033.82 in the Excess and Deficiency
Account.**

**I certify that in the course of the audit of the books and records
of the City of New Bedford the cash on deposit and securities
representing the investments of sinking funds of the City of New**

Bedford and several trust funds in the custody of the commissioners, trustees and city treasurer were verified and found that the same were in agreement with reports and records rendered by said commissioners, trustees and city treasurer to the City Council.

Respectfully submitted,

ROGER G. DUBE,

City Auditor

AUDIT

The audit of the accounts of the City of New Bedford, for the period beginning January 1, 1966 and ending July 23, 1967, made by the Director of Accounts of the Department of Corporations and Taxation, was submitted to the City Council March 14, 1968 and is on file in the records of the City Council meeting of that date.

This may be seen by any citizen at the Clerk's office, as any public document.

CITY COUNCIL

The City Council organized on January 5, 1967, and elected Councillor Anthony S. Catojo, Jr. as President. The President conducted all meetings in an orderly manner, having due regard for parliamentary procedure. His rulings were fair and impartial.

The Mayor presented his budget for the year, in the amount of \$23,555,010.50, to the City Council on February 16, 1967. After resolving itself into a quasi committee of the whole for consideration of the budget, five meetings were held with department heads, and on April 3, 1967, the budget was adopted. A separate budget in the amount of \$85,000, covering salaries and wages for schools, was adopted March 21, 1967.

On October 18, 1967, the City Council approved plans for a 19-story structure on the Municipal Parking Lot for housing for the elderly to be supervised by the New Bedford Housing Authority.

On December 4, 1967, the required hearing was held in connection with proposed North Terminal site.

Outstanding ordinances which were ordained during the year included:

Council on Aging — passed March 23, 1967

Human Relations Commission — passed October 26, 1967

On March 23, 1967, the City Council passed an ordinance which spelled out in detail procedures to be followed by the Committee on City Property in disposing of city-owned land.

The cooperation extended by the City Councillors and other departments and boards has been fully appreciated, and we have attempted to do our part in creating good public relations.

Respectfully submitted,

CHARLES W. DEASY,

City Clerk

OFFICE OF THE CITY SOLICITOR
Room 203 Municipal Building
New Bedford, Massachusetts

September 12, 1968

To the Honorable Edward F. Harrington, Mayor
and Members of the City Government of the
City of New Bedford

Gentlemen :

In accordance with Sec. 1-208 of the City Code, I am submitting herewith the Annual Report of the Law Department for the year ending December 31, 1967.

The year 1967 was an active one for this department in that a number of unusual matters were handled in addition to the regular work of this office, such as

The first contract for the City Employee's Union was negotiated and executed and negotiations with the Police and Firefighters Association were initiated.

Contract for architectural services for the new high school in the Parker Street area was executed.

A Federal Grant Demolition Program for substandard properties was started.

Question of Air Rights over Municipal Parking Lot for High-Rise Housing Plans for the Elderly was researched.

All legal work in connection with purchase of Water Department properties in Lakeville and Middleboro was done by this office.

Easements were drawn — City to New Bedford Gas & Edison Co. across the Hurricane Dike; Purchase Associates to City for drainage purposes on Beacon Street to Purchase Street; City to Richard H. Parsons for placement of sanitary sewer mains on south side Hathaway Road for erection of a "Holiday Inn".

Drafting of ordinances, contracts, land taking for street purposes and deeds for the sale of property by the City Property Committee were drawn.

This office rendered 27 written opinions to the City Council and department heads, in addition to many informal opinions given to the Mayor and other city officials.

207 contracts and bonds were approved by the City Solicitor as to legality and form.

184 claims for personal injuries and property damage resulting from defective sidewalks and city-owned vehicles were filed, considered and some settled.

250 Workmen's Compensation cases were reported to the Industrial Accident Board, some cases necessitating hearings before the Board.

\$8,140.86 in overdue accounts of various city departments was collected on damage to city-owned properties (hydrants, traffic lights, signs, vehicles, etc.)

The following suits arose out of claims for personal injuries and property damage resulting from alleged defects in public ways.

Plaintiff	Plaintiff
Joseph Avila	Catherine Midura, et al
Mildred Cleinman	Esther Miller
Mary Daggett	Stephen Paul
Lillian Freitas, Admx.	Mary Silva
Lucille LeBlanc, et al	Pauline T. Sol, et al
Albert L. Lowe	Mildred V. Sylvia
Helen Maciel	Laurinda Teixeira
Madeline Martin	Barbara A. Xifaras
Frances Mello	

Tort in which the city is the plaintiff :

Alice Bertoldo, et al - vehicle damage
Adrienne Carreau, et al - vehicle damage
Manuel F. Carvalho - cruiser
Kenneth Cotton - ambulance
Edward M. Faber - hydrant
Leonard Franklin - hydrant
Mary Lou Horne - vehicle damage
Antonio Jorge - welfare aid
Noah R. Kee, Jr. - hydrant
George W. Martin, Jr. - cruiser, traffic light, parking meter
Raymond J. Silvia - fence damage

Miscellaneous cases against the city or its employees :

Alice Bertoldo - motor vehicle
City of Boston - welfare aid
Manuel F. Carvalho - motor vehicle
Kenneth Cotton - ambulance damage
Roger J. Dupuis, et al - motor vehicle
Louis Ferreira - motor vehicle
Elmer W. Hubbs - motor vehicle
Yvonne M. Joaquim - motor vehicle
Rodolphe G. Maynard - motor vehicle
Mary Motta, et al - motor vehicle
William A. Neagus, et al - ceiling damage
Doris Proulx - motor vehicle
Carl Sylvia, d/b/a Pilot House Cafe - building damage
Trs. of Property of N.Y., N.H. & H. R.R. - Work done on
Whaler's Way
Allan M. Wood - motor vehicle

Respectfully submitted,

GEORGE JACOBS

THIRD ANNUAL REPORT
of the
CONSERVATION COMMISSION
of the
City of New Bedford
Massachusetts

For the year 1967

REYNOLDS DeWALT PRINTING, INC.
BRADBURY-WARING DIV.
1968

January 1, 1968

To His Honor, Mayor Edward F. Harrington
and members of the City Council of New Bedford, Mass.

Gentlemen:

The Conservation Commission presents its Annual Report
for 1967.

Respectfully submitted,

FLORA B. PEIRCE,
Chairman

CHARLES FRANCIS, JR.
DANIEL F. GABRIEL, JR.

ALLEN C. HASKELL

EDWIN F. SPENCER

DAVID C. THOEN

SAMUEL S. WAGSTAFF

REPORT OF THE CONSERVATION COMMISSION

December 31, 1967 marked the end of three and a half years of activities of the New Bedford Conservation Commission. The act of the City Council adopting the enabling act of the General Laws of Massachusetts set forth in Chapter 40, Section 8C, Acts of 1957, Chapter 223, on June 6, 1963, authorized the establishment of the Conservation Commission. Seven members were appointed. An organization meeting was not called until June 1, 1964.

This is the third annual report of the Conservation Commission.

During the year, Mr. Allen C. Haskell was reappointed for the term of three years. Mr. David C. Thoen replaced Mr. William Smith, who resigned, to fulfill the term expiring June 1969.

The yearly reorganization of the commission re-elected Miss Flora B. Peirce, chairman, and elected Mr. Daniel F. Gabriel, Jr., vice-chairman, and Major Samuel S. Wagstaff, secretary.

Regular monthly meetings were held in the Park Board office on the second Wednesday of the month during the first half of the year, changing to the third Wednesday the second half for the convenience of the members.

The Conservation Commission maintained its membership in the Massachusetts Association of Conservation Commissions and the Massachusetts Forest and Park Association.

The objectives and purposes granted by the enabling act of the General Laws were pursued, namely, to promote and to develop natural resources and to protect water resources of New Bedford, and, furthermore, to carry out a program for the preservation of open spaces within the city. Other endeavors were to inform the public of its objectives and to continue a conservation education program in the schools.

An open space survey in the city conducted by the Planning Department indicates that activities of the commission should be confined to the Northwestern part of the city, specifically, Turners Pond, land around and adjacent to the pond, and to the Paskamansett River area. The commission after study, investigation, and discussion early in its existence, came to the same conclusion. The commission acknowledged that open space in the aforementioned location as the only workable and large enough section to carry out its objectives, and in which, there could be development of passive recreation for the citizens of New Bedford.

Section 5 of Chapter 40 of the General Laws, amended 1966, and Chapter 885, Acts of 1967, gives municipalities the right to appropriate money to a conservation fund which may be expended by a commission for its purposes. The treasurer shall be custodian. He may deposit or invest the proceeds and any income derived shall be credited to the fund. The New Bedford Conservation Commission has received no appropriation to a conservation fund and thus retarding progress of its acquisition program.

On the brighter side, in December 1966, a transfer from the Excess and Deficiency Fund to an appropriation of \$2,800.00 was granted to the Conservation Commission. With this appropriation three parcels of land (36 acres) in the Paskamansett River area were purchased from the Acushnet Saw Mills Company. The transaction of the sale was closed April 17, 1967. The city was reimbursed for one-half of the purchasing price from the Massachusetts Self-Help program, a conservation program of assistance to a conservation commission. The program was established by an act of the General Laws, Chapter 132A, amended 1966.

The commission planned developments of a nature trail on the purchased land to continue one blazed on the adjacent property under its jurisdiction. Mr. William N. Andrews, soil conservationist, U.S. Department of Agriculture, met with the board on two occasions to discuss, to offer and to explain suggestions for development of self-guided walks.

He executed a map dedicating areas for wildlife and education, planning the construction of ponds and an observation tower, indicating the need for improvements in the stream channel, and suggesting the printing of booklets for guidance and education, and posting of signs to list and to describe features of the self-guided walks. The Conservation Plan Map was prepared in cooperation with the Bristol Conservation District, Massachusetts Division of Fisheries and Game, Massachusetts Division of Forests and Parks, and the Bristol County Extension Service. The commission accepted the plan with its appreciation for the guidance and advice rendered by Mr. Andrews and the assistance of these agencies. Maps were copied by the Planning Department and distributed to the commission members and interested parties. Major Samuel S. Wagstaff, commissioner, received the support of the commission to have full charge of carrying out the plan. Unusual wet seasons in the spring and summer impeded work on the river and land. Several working periods in the area by Major Wagstaff with volunteers, designated successive measures for implementing the plan. During cold but clear weather late in the fall, girl scouts from Holy Name Cadette Troop, Sacred Heart Junior Troop 44, and St. Paul's Troop 1 participated under the observation of Mrs. F. Omer Grenon, conservation coordinator of District 1, Plymouth Bay Girl Scout Council, Inc., and Mrs. Irene Medeiros, leader of the Cadette Troop. Major Wagstaff supervised. The commission wishes to extend thanks to the leaders and the girls for their splendid assistance. The commission looks forward to future cooperative activities with the girl scouts.

Land bordering on Plainville Road is needed for a safer and easier entrance to the trail. The commission, after negotiations throughout the year with the owner of the land, obtained a purchase price. It is hoped that in 1968 the necessary funds will be available to transact the sale. Negotiations with other owners of property adjacent to the planned trail have continued, and, if successful, would facilitate in blazing the nature trail on both banks of the river.

Preliminary steps have been taken in the efforts to obtain open space property north of Plainville Road across from the Paskamansett River area for parking purposes.

The Conservation Commission constantly emphasizing the value of the Acushnet Cedar Swamp as a Wildlife Management area has interchanged communications with the trustees of the Acushnet Saw Mills Company, principal owner, and the State Division of Fisheries and Game, an interested party.

Inserted at this point of the report, is a brief description and summary of the three-fold plan of the Conservation Commission.

1. Paskamansett River Project

This project is designed primarily for the purpose of a nature trail. To date, the commission has acquired jurisdiction of land in this area from the Airport Commission and of Mill River Park from the Board of Park Commissioners. Further acquisition through purchase of 36 acres provides a basis for carrying out the objective. Negotiations for easements or outright purchases continue that fulfillment of the project may be more satisfying and meet the needs and desires of the citizens of all age groups.

2. Turners Pond (proper) Project.

Hiking, fishing, and camping are recreation possibilities for this area. Contacts with owners for rights or purchases are continuing. The immediate need for a parking area in the vicinity of the planned nature trail is recognized and should take priority for acquisition. A three acre lot on Plainville Road and Shawmut Avenue, property of the Conservation Commission, is in this group. One potential for development is a skating pond on this lot. A multi-purpose program for both recreation and conservation on this parcel is on the planning board to be executed when the excavated plot is reconditioned.

3. Acushnet Cedar Swamp Project

The commission designates this area as a bird and game sanctuary. The low swamp land is abundant with various native wildlife. Another outstanding feature for preservation is the stand of Atlantic White Cedar of extraordinary size and uncommon to this area. The Acushnet Cedar Swamp is difficult to penetrate and therefore a refuge for wildlife. Acquisition by the city, state agency(ies), or private conservation interests is pursued.

Formal notice, January 3, 1967, from the Board of Park Commissioners granted to the commission the jurisdiction of lots west of the Whaling City Country Club. Tax title land, Plat 121, Lot 4, located in the center of the above lots, was transferred to the Conservation Commission upon approval by the City Council, March 9, 1967 and by the Mayor, March 15, 1967. The tract of swamp land, approximately 25 acres, is a nesting ground for ducks to be preserved by the commission as a Wildlife Refuge.

A Greater New Bedford Water Pollution Abatement Committee organized by the Conservation Commission and composed of representatives from the towns of Acushnet, Dartmouth, Fairhaven, Freetown, the city of New Bedford, Southeastern Massachusetts Technological Institute, the Standard-Times, the Berkshire Hathaway Inc., and the Dartmouth League of Women Voters met three times during 1967. The State Division of Water Pollution Control rejected, for the present, the formation of water pollution abatement districts, the objective of the committee for Greater New Bedford. The committee continued to meet for discussion of water pollution problems and proposed water quality standards until the April 14, 1967 hearing that included classification and proposed water quality standards for waters in this area. The consensus of the group supported the proposed standards. The New Bedford Conservation Commission sent a night letter to the hearing in Boston in favor of the proposed water quality classifications for the waters of New Bedford.

A major project sponsored by the commission for the second year was a school conservation program for the purpose and the objective of encouraging conservation education on the sixth grade level and demonstrating good management practices in their proper settings. Conservation officials manned stations to lecture, demonstrate, and share participation with the pupils. Following suggestions of Mr. Raymond L. Gehling, Jr., State Supervisor of Conservation Education in the Department of Education, to emphasize "learning by doing", three stations of small groups, approximately 10 pupils each, were set up. This arrangement was followed at Brooklawn Park for Ashley School pupils, at Hazelwood Park for a class from the Taylor School and at Buttonwood Park for a Rodman School class on the mornings of June 5, 6, 7 respectively. The sessions were successful thanks to the expert instruction by Messrs. Andrews, soil conservationist, Allen E. Cousins, forester, State Division of Forests and Parks, Charles A. Stiles, district game manager, State Division of Fisheries and Game, Peter W. Stanley, Bristol County Extension agent, and Frank Jason, Jr., Boys Scout Conservation Council. The commission also acknowledges the cooperation of the Board of Park Commissioners for granting the privilege of holding the outdoor classes in the parks. This project has the whole-hearted support of the School Department. Both Dr. James R. Hayden, Superintendent of Schools, and Miss Mary A. Keneally, Assistant Superintendent of Elementary Education, visited the sessions. Mr. Richard S. Short, assistant to Mr. Gehling, observed one session. Decals, picturing the official emblem of the Conservation Commission, were presented to the officials and to the teachers who supervised the classes. The Rodman class submitted essays on the conservation program. Pictures taken during the sessions by Mr. Daniel W. Taylor, junior city planner, were submitted to the Conservation Leader, a pamphlet of state-wide circulation. One was printed in the September issue. The Commission thanks Mr. Taylor for his valuable assistance on the three mornings.

Mr. Charles Francis, Jr., commissioner, researched and discussed with the commission regulations for soil conservation. Due to complexities involved, he recommended that provisions for a soil conservation law be included in a proposed revision of the city zoning ordinance. The recommendation was accepted by the commission and presented to the city ordinance committee which, in turn, referred the recommendation to the Planning Department.

The Conservation Commission supported state legislation concerning conservation. Members investigated three notices from the Department of Natural Resources pertaining to construction on wetlands of the city. The commission and its subcommittee on beautification supported a proposed amendment to the city ordinance in reference to the duties of Commissioner of Public Works, acting Street Tree Warden, regarding planting of trees.

Mr. Daniel F. Gabriel, Jr., commissioner, arranged a display of maps of projects of the commission, featuring the plan map of the self-guided nature walks in the Paskamansett area. This display was exhibited at the YWCA Hobby show in April. Members manned the booth and explained the various maps. Pamphlets of the commission were distributed.

Through the courtesy of Mrs. Grace Young, Y-Teen Service Corps leader, a public meeting was arranged and held at the YWCA for the purpose of publicizing plans and developments of programs of the commission and the subcommittee on beautification. This meeting took place June 7, 1967.

Among other public relations endeavors was a speaking engagement by the chairman before the Pembroke College Club of New Bedford. The chairman provided lists of available films and literature on conservation upon requests. In the files is a sample kit of material for conservation education, presented to the commission by the Council of Sportsman Clubs of Massachusetts, Inc., through the courtesy of Mr. Francis.

The last meeting of the beautification sub-committee met in December. Plans are to organize a beautification commission as a separate agency to facilitate timing of meetings, to reach decisions more readily, and therefore, progress on beautification programs.

The commission thanks Mr. Guy Volterra, an associate member, for his legal advice and willing assistance.

The Conservation Commission extends its thanks to the Mayor and to the City Council for their cooperation and to the various city departments for assistance given to the commission. Special appreciation is expressed for the inestimable help received from the Planning Department and to Mr. Martin A. Gustavson, assistant city planner, for his continued interest and guidance.

Respectfully submitted,

FLORA B. PEIRCE

Chairman

SUB-COMMITTEE on BEAUTIFICATION REPORT

Herein is a summary of the activities and accomplishments of the Sub-Committee on Beautification during the year 1967.

1. 300 more whips were purchased for the street tree nursery on Oneida Street.

2. YWCA, Y-Teen Service Corps, Boy Scouts and Girl Scouts planted 6,000 seedlings on Hathaway Road and Plainville Road. The Kiwanis Club donated \$135 for the project.

3. 193 small flowering trees were planted along major streets by volunteers, including members of the Rodman Job Corps, the Junior Chamber of Commerce, the Neighborhood Youth Corps workers, and the Water Department and the Forestry Division of the City of New Bedford.

4. 125 selected species of trees planted by the Forestry Division fulfilled individual home requests. Each request was checked for the space available and the type of tree to be used.

5. 30 trees were planted at Lincoln, Knowlton, and DeValles schools by the Dartmouth Key Club members, under supervision of the sub-committee. The purchase of the trees was made possible by a donation from the Reliance Insurance Company to the School Department.

6. A \$500 Coca Cola grant was awarded to the YWCA Y-Teen Service Corps for beautification of Marine Park. \$50 was donated by the Garden Club of Greater New Bedford initiating a money raising campaign for implementation of the beautification project. The City Planning Department prepared the planting plan. The proceedings have been carried on with the cooperation of the sub-committee. Marine Products Corporation donated a flag pole for the project.

7. Improvements to the landscaping of the entrance to City Hall were funded by a sum of \$150 from the appropriation of the Conservation Commission.

Appreciation is extended to the various City Departments and to organizations for help and cooperation with these endeavors. Special thanks goes to the assistant city planners and junior city planner for their untiring efforts toward the projects.

The following members composed the sub-committee on beautification—The Conservation Commission as a whole, Mmes. Basil Brewer, Erma E. DeBoer, Grace Young, Miss Minna Littmann, Messrs. David J. Lipsitt, Stanley P. Neagus, Paul A. Palange, Edmund J. Toomey, Milton A. Travers and Ed Hill.

Respectively submitted,

EDWIN F. SPENCER

FIRE DEPARTMENT REPORT

Mayor of the City of New Bedford —

Dear Mr. Mayor:

I respectfully submit the Annual Report of the operations and functional status of the Fire Department for the year 1967, together with the recommendations that I consider necessary for maintaining and increasing the efficiency of the Department.

The total alarms received for "Fires" and "Non-Fires for the year 1967 is 1964.

SUMMARY OF ALARMS RECEIVED

Fire	874
Emergency Calls, other than fires	693
No Fire Found, Sprinkler Trouble, etc.	148
False Box Alarms	205
False Telephone Alarms	41
Out of City Responses	3
	<hr/> 1,964

Of the actual 874 fires, 701 originated as "Still Alarms" and in 281 cases were followed by "Box Alarms" for the same fire. Of the actual 874 fires, 173 originated as "Box Alarms" and in 14 cases, calls for additional apparatus were sent out by "Still Alarms" for the same fire.

Total "Still or Telephone Alarms" transmitted from Headquarters	940
Total "Box Alarms" transmitted from Headquarters	627
	<hr/> 1,567

Of the total alarms transmitted, there were 874 actual fires. There were five Second Alarms during the year.

The total fire loss for the year 1967 is \$482,861.57, of which the loss in buildings is \$303,627.32; the loss of contents of buildings is \$157,714.82; the loss on auto fires is \$12,934.43; the loss on boats is \$8,585.00. The per capita loss of \$4.82 compares most favorable with the national average of \$6.37.

The Department responded to 693 emergency services which include resuscitator efforts, pumping out of flooded cellars and boats, removal of refrigerators that were leaking sulphur dioxide gas, and numerous other types of services which this Department classes as emergency Public Service. May I state that the above calls were made as a part of the emergency service this Department provides the citizens of our City.

As authorized by Section 19 of Chapter 148, General Laws, I granted 25 Permits for Blasting.

The capable staff of Chief Officers who are responsible for administrative and firefighting efficiency in their respective Districts, in addition to a myriad of other duties related to the Fire Service, are to be congratulated for their unquestioned dedication and support to this office.

Deputy Chief Frank H. Cleveland, District Chiefs Charles J. Armanetti, Edward J. Jablonski, Daniel L. Piekut, Alphonse Piekut, Gordon W. Graham, Fred Osuch, Oreste A. Savino, William H. Barney, Manuel Almeida and Joseph P. Silva made approximately 396 inspections during the year to check out complaints and remedy hazardous fire conditions. They granted 998 Open Air Permits after visitation for assurance of fire-safe conditions.

The Home Inspection Program was continued under direction of Deputy Chief Frank H. Cleveland. I wish to compliment our personnel in this phase of fire prevention. The diplomatic and efficient manner in which Company personnel conducted these inspections is highly commendable. A total of approximately 4,118 occupancy and 2,721 building inspections were made. In addition to the Home Inspections, schools, hospitals, theatres, and convalescent homes were inspected quarterly. A continuing phase of this most important fire prevention measure also included every church in the City. If we may prevent the loss of just one life through the efforts of our Fire Prevention measures, then I would say the program is justifiable.

The Fire Alarm Division, our communications center, which services both telegraphic and radio transmission and reception continues to operate in a most efficient and progressive manner under the direction of Assistant Superintendent of Fire Alarms Clifford J. Snell.

Six new private master fire alarm boxes were installed and approximately 2,800 feet of aerial line and associated equipment installed to service these boxes. 800 feet of underground and approximately 8,000 feet of old overhead line wire was replaced.

As in the past, assistance was given the Wire Department relative to the Christmas display at the Common Park.

Routine maintenance work was done by the fire alarm crew which included tree trimming, line inspection, change over to new poles, ground testing, and painting outside equipment.

All fire alarm boxes were tested and inspected and the interior circuits from master boxes were tested.

At the close of 1967 the number of fire alarm boxes throughout the City totalled 477; of this total 268 are Public and 209 are Private boxes, 104 of the latter being the master type connected to sprinklers, heat detectors, or auxilliary pull stations.

The Repair and Maintenance Division under Master Mechanic Kenneth M. Haddock is charged with the upkeep and repair of all mobile units, many of which are specialized requiring service uncommon to most motor vehicles. The Repair Shop also maintains, repairs, and many times fabricates the special equipment and accessories peculiar to firefighting.

Care of the eleven (11) buildings under the fire department jurisdiction, requires that our repair division perform carpenter, plumbing, and heating repairs which otherwise would require the services of an outside contractor.

Fire Prevention Division is headed by Acting Head Lieutenant Edwin L. Albino assisted by two Lieutenants and two clerks. This division is responsible for administering one of the most important phases of Fire Department functions, namely Fire Prevention and Investigation.

Their duties embrace the entire field of Fire Prevention and Investigation including issuing of relative permits as required by law, inspection duties, fire prevention lectures to schools and public service organizations, and investigative work in relation to suspicious fires.

Permits issued by the Division are as follows:

Power Oil Burners	256
Range, Cabinet, and Space Heaters	0
Garage and Filling Stations	22
Fuel Oil Storage	13
Liquified Petroleum Gas Storage	42
Underground Tank Removals	14
TOTAL	<hr/> 347

The Drill and Training Program is directed by Captain Raymond G. Furness. Its function is to maintain efficiency in all phases of firefighting through classroom instruction and fire ground training at the Drill Tower and various other locations.

Captain Furness, through his attendance at the Massachusetts Institute of Fire Department Instructors monthly meetings is able to keep astride of the most modern techniques of firefighting.

Annual Underwriter service tests for all pumping engines, first aid instructions and lectures to the Military, Civil Defense, and Industrial fire brigades are all a part of the duties of our Drillmaster.

Refresher courses in radiological monitoring were given to all members of the department. The various instruments employed in detection of radioactivity are provided by the Civil Defense Agency and are kept operational and in readiness at all Fire Stations throughout the City.

The New Bedford Protecting Society Officers and Personnel constitute a most dedicated and capable body of citizens who, with a most modern salvage vehicle provide invaluable assistance to the Public and Fire Department. Serving without remuneration, the members of the Society avail themselves at any hour, day or night, in their effort to help keep the City's fire losses low. The Public should be more aware of their excellent service.

APPARATUS IN COMMISSION

- 11—Motor Pumping Engines, 6-1,000 G.P.M. and 5-750 G.P.M. Engines, all with booster hose and water tanks. Four have built-in liquid foam tanks used for flammable liquid fires. Six carry large deluge guns for use on large fires.
- 4—Aerial Ladder Trucks, 2-85 Ft. tractor type and 2-75 Ft. non-tractor type, all equipped with ladder pipes.
- 1—City Service Ladder Truck.
- 1—Rescue and Fire Boat, on trailer - available on call.
- 1—Hose Wagon with Booster and Water Tank, equipped with forestry hose, wet-water device, flammable liquid fire fighting appliances - on call.
- 1—Automobile for the Chief.
- 1—Automobile for the Deputy Chief.
- 4—Automobiles for the District Chiefs.
- 1—Automobile for the Drillmaster.
- 3—Fire Alarm Trucks, one used only for pulling in cable.
- 3—Repair Division Cars - 1 truck and 2 sedans.
- 3—Automobiles for Fire Prevention Division.
- 1—Van for towing of Rescue SCUBA and Fire Boat.
- 1—N. B. Protecting Society Salvage Truck.

APPARATUS IN RESERVE

- 1—Motor Pumping Engine, 200 G.P.M. with power take-off pump and water tank.
- 1—Motor Pumping Engine, 500 G.P.M.
- 1—High Pressure Fog Truck with 435 Gallon Water Tank.

FIRE HOSE

- 800 feet of 3-inch hose
- 27,850 feet of 2½-inch hose
- 17,800 feet of 1½-inch hose
- 1,000 feet of 1-inch hose
- 4,500 feet of ¾-inch hose
- 800 feet of ⅝-inch garden hose
- 127 Waterproof salvage covers carried on apparatus
- 10 Waterproof salvage covers carried on Protective Truck

NEW EQUIPMENT ACQUIRED DURING THE YEAR

- Three new mobile radios
- Two Fire Alarm Boxes
- Fire Alarm Cable and related equipment
- Five one-half hour Demand Air Paks
- One rebuilt Ladder Truck motor

My sincere thanks to the Mayor and City Council for the continuation of their excellent cooperation and good relationships with this Department.

Inter-Department cooperation is on the highest level. I extend my thanks to the Building, Wire, Water, and Public Works Departments.

Our news media including the Standard-Times, radio stations WNBH and WBSM are outstanding in the presentation of fire ground activity and various other newsworthy items related to the functions of the Fire Department. Without their fine support our Educational and Fire Prevention programs would be impossible to achieve their objective - namely, "reaching the people".

The Salvation Army, Volunteers of America, and American Red Cross who faithfully dispense hot coffee and refreshments to our men at multiple alarm fires, deserve and receive our special thanks. May our fine relationship continue.

Many thanks to Civil Defense Director Mrs. Anne Fitch and her personnel, for invaluable assistance in the fields of traffic, lighting, and availability of their Rescue Truck at multiple alarm fires.

Special recognition and many thanks are extended to the Company Officers and Firefighters who on many occasions have demonstrated their ability to fulfill their duties in the highest tradition of our service. Their participation in the many civic endeavors of our City is worthy of admiration.

RECOMMENDATIONS

ONE (1) NEW 1,000 G.P.M. PUMPING ENGINE: The efficiency of a fire department is, to a large degree, predicated on the dependability and capacity of its' pumping engines both active and reserve. Our pumping engine posture is rapidly becoming acute. Reserve status is for all practical purposes negative, which means if an active piece of apparatus breaks down and requires extensive repairs, there is no dependable replacement — some area of the City will be exposed to inadequate protection.

Engine #2, a 1947 Ahrens-Fox pumper, located at Station #2 is one of the engines charged with the protection of our high value district. This pumper is over 20 years old and because of its design is extremely difficult to maneuver through our narrow streets. It shows signs of needing extensive motor repair. If replaced, it would be placed in reserve and to improve our situation in this area.

Our present active pumping engine age is as follows:

1947 — one	1948 — one
1950 — one	1952 — one
1953 — one	1954 — three
1955 — one	1956 — one
1965 — one	

It is obvious from the above that a long range plan for gradual replacement should be instituted. I sincerely hope serious and forthright consideration be given to the above request.

REQUEST: \$28,000.00

TWO (2) NEW AUTOMOBILES: Passenger type vehicles, of which we have eleven, are used by the Chief, Deputy Chief, District Chiefs, Fire Prevention Inspectors, Drillmaster and Master Mechanic.

The above vehicles are necessary in the performance of the day and night duties of the aforementioned. In the move towards economy, the practice of this department is, through the "hand-down" process, get the most out of each vehicle. Two of the above vehicles, which are of the 1953 vintage should be replaced.

The two new automobiles would replaced the Deputy Chief's car (1955 Ford) and a District Chief's car (1955 Pontiac) which older cars would be handed down to replace the 1953 models.

REQUEST: \$6,500.00

TWO (2) NEW FIRE ALARM BOXES: With increased new construction in residential areas it becomes imperative that such areas be protected by adequate distribution of fire alarm boxes. Our citizens need and deserve such protection for the notification of fire.

REQUEST: \$450.00

FIRE ALARM LINE WIRE, UNDERGROUND CABLE AND RELATED EQUIPMENT: Fire alarm wire, underground cable and related equipment are integral units of our telegraphic Fire Alarm system. They serve as the carriers of a fire alarm signal from the various fire alarm boxes throughout the City to our Central Station at Headquarters. Much of the wire and cable has deteriorated through age and weather and must be replaced. Failure to replace such wire and cable could very well result in serious consequences, for a breakdown would negate the receipt of a signal from a fire alarm box that was pulled on that particular circuit.

REQUEST: \$2,200.

FIRE ALARM C & D BATTERIES: Batteries on three fire alarm circuits need replacing. These batteries were purchased 1955 and have a life expectancy of 14 years.

REQUEST: \$700.00

TWO FIRE ALARM RECTIFIERS: Due to extending fire alarm circuits to furnish protection for areas in the north end of the city which are building up, two rectifiers presently connected to circuits in this area have reached their capacity and need replacing with larger rectifiers for future extension of these circuits.

REQUEST: \$400.00

ONE (1) TYPEWRITER: Considerable clerical work is processed in our main office and Fire Prevention Bureau. Due to the age and constant use, I recommend a replacement for the typewriter in the Fire Prevention Bureau. The older unit would then be handed down for use in one of the stations that presently does not have one.

REQUEST: \$250.00

FIRE STATION REPAIRS AND PAINTING: We have tried, with the aid of the Building Department, to effect certain minor repairs and painting of certain stations. However, major repairs are urgently needed at several stations. At Station #9, water enters through the porous bricks on the South wall of the station and runs down the brick and plaster inside of bedrooms, severely damaging walls on the second floor. The condition has persisted for several years and should be corrected. We should begin a long range program of station repair to eliminate further damage to the interior of the station.

REQUEST: \$2,000.00

NEW 2½ INCH HOSE: Nearly half of our 2½" hose, which serves as the water carrier from pumping engine to the fire grounds, is over eleven years old. Consequently, through fire-ground use, annual service tests, and age, our inventory is rapidly decreasing.

It is necessary that each pumping engine maintains a complete body change in reserve and a sufficient supply be available for multiple alarm fires. At the present rate of deficiency, I recommend the purchase of approximately twenty lengths of 2½" hose in order to maintain our efficiency in that area.

REQUEST: \$1,100.00

FIVE (5) AIR PAKS: A program to replace the Chemox masks with the contained air type was started three years ago and is proving both beneficial and economical to the department and should be continued. These masks are paying for themselves by eliminating the costs of cannisters needed for the Chemox mask. We have the facilities to re-charge the air cylinders, whereas should a Chemox cannister be used (even for a short period of time) the cannister must be discarded at the cost of \$7.50 per unit.

REQUEST: \$1,350

TWO ELECTRIC DEWATERING PUMPS: There are many times during the year that the department is called upon to assist people who, due to flash flooding, have a water problem in their cellars that endanger their furnaces and/or water heaters. This type of pump is invaluable during such an emergency. At the present time we have one (1) electric dewatering pump. We also have two (2) Homelite dewatering pumps that can be used but the disadvantage of this type pump is, that unless there is a deep depression in the cellar in which the strainer can be submerged, this pump cannot be utilized unless there is more than 4" of water in the cellar. The electric pump can draw from as little as 1" of water.

REQUEST: \$400.00

260 RIOT HELMETS: Many cities are preparing for the eventuality of race riots by providing their firefighters with face and head protection. Most of the over 200 injuries that was inflicted upon firefighters during the riots were caused by thrown objects. Although these helmets will not protect against sniper bullets, it will give the men protection from thrown objects, for their eyes, face and neck.

REQUEST: \$3,100.00

JET X FOAM NOZZLE AND FOAM SOLUTION. This device would be of immeasurable value in the handling of fires in fishing vessels, inflammable fluids, etc.

REQUEST: \$550.00

HYDRAULIC LIFT: A hydraulic lift for the Repair Shop to facilitate the repairing of the many fire department vehicles; includes installation.

REQUEST: \$2,000.00

Respectfully submitted,

RICHARD T. GAUGHAN,

RTG/arj

Chief

Bernard A. Portnoy, M.D.

Anne D. Saunders, M.D.

REPORT OF THE DIRECTOR OF PUBLIC HEALTH

One of the most significant developments of this year has been the expansion of the well child conferences. Working as a delegate agency for ONBOARD this department planned and administered a program whereby our regularly-scheduled Wednesday afternoon well child conference which had been held in City Hall for many years was moved to the West Central Onboard Center and two other centers, one in the north end and the other in the south end, were set up. These conferences originally cared for children up to two years of age. Now, however, this program is able to take in children from one month of age up to school age. 104 sessions have been held this year while only 51 were held in the year 1966.

For the first time, not a single case of Measles was reported in New Bedford, positive proof of the efficacy of the measles vaccine.

One of the serious outbreaks of illness has been the great increase in Infectious Hepatitis. A total of 70 cases were reported and it is known that many others went unreported. This department received the cooperation of the United States Public Health Service and the Massachusetts Department of Public Health in not only determining the possible sources of these infections but the best method of coping with the problem. We were assured by these agencies that the steps being taken by the Board of Health were adequate under the circumstances.

After a delay of several years over the other areas of the country, the venereal disease rate has begun a climb. In contrast to 141 new cases last year, a total of 300 were reported in 1967. The complacent attitude characteristic of many people toward these diseases has been shaken with the realization that the antibiotics formerly considered 'wonder drugs' are not proving effective in these cases.

The Massachusetts Department of Public Health has very generously supplied our laboratory with some valuable testing equipment which has been proven to be most helpful and time-saving in the many added duties which must be carried out by this division.

The efficiency of the Refuse Disposal Division would be greatly improved if it were possible to have a general foreman who would be able to devote his attention to the collection of refuse material throughout the City of New Bedford. Another area in which help is badly needed is in the Sanitation Division. An additional Sanitarian could be most useful particularly in relation to enforcing the new rules and regulations governing stores and markets. These rules and regulations became effective late in the year 1967 and will mean a tremendous amount of work in their enforcement. It is hoped that the city will see fit very shortly to provide funds for filling these two new positions.

The continued influx of aliens into the City of New Bedford is posing several problems for this department. In the first instance, these aliens are coming from a region with a high incidence of tuberculosis which is manifested in the high tuberculin test rate of the children in our school system from these families. Secondly, these newcomers have created an additional housing shortage which has become not only acute but extremely serious. When houses are condemned as unfit for human habitation it is impossible for the residents of these dwellings to find other facilities. When such facilities are found they are no better than those which are being condemned in many instances.

Funds were made available by the Massachusetts Department of Public Health to conduct a concentrated effort on homes of children one and two years of age to attempt to increase the immunization rate of this group of youngsters. An allotment of \$10,000 was provided wherein the City of New Bedford would be paid \$5. per report submitted to the Massachusetts Department of Public Health. It was necessary to concentrate this program from October 1 through January 31, 1968, thus necessitating the hiring of two additional nurses on a part-time schedule. During the year 1967, 1378 visits were made.

The Board of Health again wishes to thank its personnel for their diligence and hard work in conducting the various programs of the department. It also wishes to thank Mayor Edward F. Harrington, members of the City Council and the Building, Police and School Departments for their wholehearted cooperation.

ALPHEGE LANDREVILLE,
Director of Public Health

ANNUAL REPORT

OF THE

INSPECTOR OF WIRES

POLICE SIGNAL SYSTEM

STREET LIGHTS

TO THE CITY COUNCIL

For the Year 1967

BAKER PRINTING

1968

Annual Report

New Bedford, Massachusetts

July 10, 1968

To the City Council of the City of New Bedford:

Gentlemen:

I respectfully submit the annual reports for the departments of Inspector of Wires, Police Signal System and Street Lights for the year 1967.

Electrical installations and requests for inspections have increased to the degree that two additional inspectors are needed to keep up with the inspections that should be made. The work load has been also increased by requests for inspections by the Division of Minimum Housing Standards and other City and State agencies. New electronic devices, modern electrical equipment and related circuits require more time for inspections. However, 5922 inspections were made which is an increase of 164 over 1966.

During the year, I investigated and reported to the City Council on eighty three (83) petitions of the New Bedford Gas and Edison Light Company and the New England Telephone and Telegraph Company for pole and underground conduit installations.

There were two hundred ninety five (295) inspections after fires which is an increase of fifty (50) over 1966. Positive causes for electrical fires are found every day and are ordered removed and corrected. Oversized fuses, overloads, misuse of electrical cords and so called

handyman wiring are all contributing factors to fires. There are many homes in the City which are served with electrical services which should be increased, in fact, there were one hundred seventy five (175) such increases this year.

The annual Christmas Display was again set up on the Common which was enjoyed not only by the people of New Bedford but many visitors outside the area. The following departments contributed their help to make the display a success: New Bedford Vocational High School, Art, Carpentry and Electrical Departments; Public Works, Fire, Police, Civil Defense, Water, Building, Park and the Police Signal Systems.

Miss Sharon M. Morris was appointed temporary Clerk and Typist on April 24, 1967.

The following is a breakdown of the work completed this year:

2W receptacles	4,659
3W receptacles	287
New buildings	97
Old buildings	1
110V motors	49
220V motors	18
440V motors	2
550V motors	3

There were two male electrocutions which were investigated and the causes were ordered removed. This department is ever on the alert to have removed any probable shock hazards.

POLICE SIGNAL SYSTEM

A new compact receiver replaced the Police Signal Telephone Switchboard in Police Headquarters. Walkie Talkies have replaced the police boxes throughout the City. However, the entire Police Box System has been connected to the compact receiver and can be used at will. The telephone switchboard will be turned over to City Property Committee for disposal.

Traffic signal installations were completed and put into operation at the following intersections:

Hawthorn Street and Brownell Avenue
Tarkiln Hill Road and Church Street
Rivet Street and County Street

A contract was awarded to the Municipal Signal and Supply Company for the installation of traffic lights at the following intersections.

Nash Road and Church Street
Hathaway Road and Shawmut Avenue

During the year there were twenty seven (27) traffic signals damaged by auto accidents. Some of this damage is minor and of the hit and run variety. In a great many cases where the operators are apprehended on the scene, the City is re-imbursed for the costs.

Daily inspections are made at all intersections where traffic signals are in operation.

Police Signal Electricians set up temporary lighting in all the parks for the summer band concerts. Besides their regular work they have installed and made electrical repairs for the following departments:

Park Department, Police Department
Department of Public Works
Wire Department

Cemetery Department
 Water Department
 Portuguese festival
 Kerwin Garage
 Recreation Department

The traffic lights at Purchase Street and Weld Street and at Wamsutta Street and Acushnet Avenue were discontinued and removed on March 3, 1967.

Ronald P. Yates was appointed provisionally as Assistant Police Signal Electrician on April 24, 1967.

The following is a breakdown of the work done by the Police Signal Electricians:

Station No. 2 - Repairs	4
Inspections	7
Station No. 5 - Repairs	6
Inspections	16

Total	\$54,885.57

STREET LIGHTS

The new mercury street lighting in Phase #1 of the South Terminal Urban Renewal Project was designed by the Superintendent of Street Lights. The underground ducts for these lights and their bases were installed by the general contractor at no cost to the City. By this method of installation, the cost of each light standard will be reduced \$30.50 per year. For 42 standards, the savings each year in Phase #1 will amount to \$1323.00. In addition an agreement has been reached with the New Bedford Gas and Edison Light Company for a reduced rate where two lights are installed on one light standard. For two mercury lights the rate per year would be \$186.20 against \$226.80, a difference in cost of \$40.60.

New installations for mercury lighting was completed on County Street south from Arnold Street and on Acushnet Avenue north from Tarkiln Hill Road. New mercury lighting was ordered in the Industrial Park in the areas of several new plants. New lights were installed where needed in all sections of the City and forty four lights were increased in lamp sizes. New lighting was installed in all new residential projects.

A substantial increase of at least \$10,000.00 per year for a period of 5 years in the Street Lights budget is strongly recommended. Only in this way can we set up a workable program for improved street lighting in our City.

I wish to thank the members of the 1967 Street Lights Committee for their excellent co-operation.

Daniel F. Hayes, Chairman

Albert L. McMullen, Vice-chairman

Anthony S. Catojo, Jr.

Donald R. Gaudette

Joseph P. Harrington

At the end of the year there were 5972 street lights in operation in the City of New Bedford as follows.

1738 - 1,000 lumen O.H. Open	@ 23.76 per year

Room 215 OFFICE OF THE PARK BOARD
Municipal Building
New Bedford, Massachusetts

CITY OF NEW BEDFORD
BOARD OF PARK COMMISSIONERS

December 31, 1967

To the Honorable City Council:

Gentlemen:

The Seventy-fourth Annual Report of the Board of Park Commissioners on Parks together with reports on Bath Houses, Playgrounds and Militia under the control of this Board is herewith presented in accordance with provisions of law for the fiscal year ending December 31, 1967.

The Board held twelve regular meetings and two special meetings during the year. They organized in May for the ensuing year and elected William Smith as chairman and Harrie W. Johnston, secretary. Manuel P. S. Macedo, Carl R. Anderson and Frank Vieira continued to serve as hold-overs as Mayor Edward F. Harrington did not appoint replacements.

Bids for refreshment concessions were advertised in April, and the permit was awarded to John W. Clauretie of 546 County Street for a one (1) year term beginning May 1, 1967 and ending April 30, 1968, for his bid of \$125.00.

Mr. Clauretie, concessionaire at Buttonwood Park, was granted permission to hold for a period of one (1) year commencing June 1, 1967 the license covering the concession at Buttonwood Park covered by the conditions and terms set forth in the Indenture made February 1, 1962.

The Conservation Commission was granted a license to use several plots of Park Department controlled land for conservation purposes, beginning at the point of intersec-

tion of the north line of Interstate Highway 195 and the Town of Dartmouth boundary line.

The lease for the Municipal Golf Course on Hathaway Road, known as the Whaling City Country Club, was renewed for Stanley A. Brown for the term of five (5) years commencing January 1, 1968. Under the new lease Mr. Brown's annual fee is \$2,000 rent per year for the first two (2) years and \$2,500 per year the balance of the contract.

Plans for the redevelopment of the Mt. Pleasant Field were prepared by third year landscape architect students from the University of Massachusetts hired by the City under a National Arts Council grant as part of the environmental space program. The anticipated project is expected to get underway before the 1968 season.

Connell Associates of Malden, Massachusetts, landscape architects and engineering consultants, were engaged to prepare plans and specifications in connection with the rehabilitation and improvements of Buttonwood Park at a cost of \$6,000.00.

The New Bedford Tennis Association was granted permission to install an electric meter box at the Buttonwood Park Tennis Courts in the name of the Association and to install whatever means of lighting that was needed for the purpose of night-time play. All installation cost were to be absorbed by the Association.

Buttonwood Park Zoo now includes an African lioness, a timber wolf cub and two North American white-tailed deer, all donated by the Bates Wood Park Zoo in New London, Conn., a 4-year old female elephant acquired from the Mendon Animal Farm at a cost of \$2,495.00 and a 1-year old African lion purchased for \$100 from the New York Bronx Zoo, by the New Bedford Lions Club.

The nine-year old display "Storybookland" at Brooklawn Park was dismantled this year because of its dilapidated condition due to vandalism and deterioration.

The Middle Street Playground through the efforts of a group of West End residents, headed by Melvin T. Harrison, was renamed the Andrew C. Magnett Memorial Playground. Mr. Magnett, a city recreation leader for 15 years, lived at 172 Emerson Street until his death April 25.

Grove Park was renamed on the petition of City Councillor Ralph J. Saulnier, the Kenneth E. Beauregard Memorial Park. Private Beauregard was killed in Vietnam March 5, 1966, while a member of the 4th Marine Division.

The retirement of Carlos V. Mello, a park keeper, on January 1 and of Lawrence B. Chandler, park police officer, on July 9th were accepted with regret. Mr. Mello had completed 33 years of service, 22 of which were held in his position at retirement. Mr. Chandler was appointed to the park system in 1943 as a park police officer and served in that post until his retirement.

Open air-concerts presented by the City of New Bedford and Local 214 American Federation of Musicians through the Federation's Music Performance Fund were features this past summer at various parks.

Scouts of Cachalot Council, Boy Scouts of America, pitched their tents and participated in a variety of Scout activities in a weekend camporee at Buttonwood Park, commemorating the 50th anniversary of the organization of the council.

A mammoth fireworks display highlighted the city's July 4th celebration held at East Beach north of Monkey Island.

The New Bedford High School Army ROTC held their Annual Field Day at Buttonwood Park, May 26.

The Polish-American World War Veterans' Association was granted use of Brooklawn Park to hold services on Memorial Day at their monument.

The 1967 Committee of the Feast of the Blessed Sacrament made use of the Riverside Playground August 4-6 for the purpose of a fireworks display.

The 10th Annual Scallop Festival sponsored by the New Bedford Exchange Club was held at Marine Park August 11-13.

The American-Lebanese Veterans' Organization installed sidewalks and planted shrubs around their monument in the Common Park

Donkey cart rides were an added feature at the Buttonwood Park Zoo on Saturdays, Sundays and holidays, this past year.

The Board approved schedules of city schools and leagues for use of parks and playground fields for baseball, softball and tennis during the 1967 season.

The Board of Park Commissioners thanks the Mayor and the City Council for their interest and encouragement and also thanks the heads of city departments who contributed in any way to make the work of the Park Department a success.

Respectfully submitted,

WILLIAM SMITH, Chairman
HARRIE W. JOHNSTON, Secretary

December 31, 1967

To the Honorable Board of Park Commissioners:

Gentlemen:

Herewith is submitted the Annual Report of the Park Department and its subdivisions for the year 1967.

In the spring of 1967, the Park Department completely built a little league diamond at the Elwyn G. Campbell School grounds. This diamond was necessary as it is the only one north of Brooklawn Park.

New flower-beds and trees were planted at Brooklawn Park and the stands inside the bowling-green, the recreation building, thirty-five benches, garage, and playground equipment was repaired and painted.

A new anchor fence was installed in the outfield of the #4 diamond.

Operation Mainstream (a Government project) was utilized in clearing stumps, trees, and undergrowth from the northwest corner of Brooklawn Park.

A new bridge was built over to the duck island and swans and ducks were stocked at this park.

There were twelve new trees and seven flowering shrubs planted in this Park in 1967.

The backstop on the #2 diamond at Brooklawn Park was moved forward to allow regulation ball.

The bleachers at this park were shortened and reinforced for the coming year.

The remains of Storybookland was removed from Brooklawn Park due to excessive vandalism, plus the dilapidated condition cause by the elements over a period of nine years.

At Buttonwood Park five tennis courts were resurfaced.

All lavatories were painted in addition to all playground equipment being painted and repaired.

At this park a new outdoor nursery was started with 2000 evergreens, and one hundred twenty-five (125) deciduous trees.

New animals were obtained for the zoo, namely, two lions, one elephant and a timber-wolf.

A new backstop was built on the Standard-Times field,

formerly known as the Santo Christo Field.

All benches were repaired at the Common Park and the entire fence was repaired around the rose-garden.

Three sets of gang-mowers were obtained for the Worthington cutter at Buttonwood Park, also, one National Triplex gang-mower, with a 7 foot cut, was purchased for the Dike maintenance.

Ten sections of pipe staging were also acquired, plus a front-end loader and a back-hoe from the Cemetery Department. Also, two trucks and miscellaneous equipment was obtained by this department from Government surplus.

At Hazelwood Park the recreation building was completely sidewalled, and a new water main was installed from Brock Avenue into this park to service all buildings.

All lavatories were repaired and painted, plus, playground equipment and park benches.

Two new flower-beds and 75 assorted trees and shrubs were planted in Hazelwood Park.

The newly named Kenneth E. Beauregard Memorial Park was completely graded, seeded and six new maple trees were planted. Park benches were painted various colors. The Department also installed the plaque renaming the park.

Victory Park skating pond was graded and rolled in the fall of 1967 and we had a record of forty-two and half days of skating in this area.

A new oil tank was installed at Victory Park.

The Ashley Park recreation building was completely painted and repaired and is being used as a recreation building for Senior Citizens in this area.

Anchor fencing was installed around the Monte Playground as an added safety measure.

Two shuffle-board courts were built on Monkey Island.

The 50-yard target stands were rebuilt at the firing range and ten (10) benches were rebuilt at Marine Park.

To the members of the Board, the Park employees and various department heads, I wish to extend my thanks for the co-operation given to me throughout the year.

Respectfully submitted,

HARRY J. WAREING, Superintendent of Parks

RIFLE RANGE

Military utilization of the New Bedford Rifle Range in 1967 was intensive. From April through October on various week-ends, the following organizations used the range and range equipment for training: 211th Artillery, Army National Guard Battalion; 441st Civil Affairs Company, U. S. Army Reserve; 489th Engineer Battalion, U. S. Army Reserve; 489th Ordnance Battalion, U. S. Army Reserve; 4 U. S. Naval components and 1 U. S. Coast Guard unit. Approximately 1800 military personnel were trained and qualified in the use of small arms by instructors in classes.

Local Police Departments held 3 separate schools on firearm usage. Permit-holding civilians and Boy Scout units with their instructors also used the range.

Maintenance involving brush and grass cutting plus minor repairs were carried out

Respectfully submitted,
ARTHUR LEE, SMC, USN, Retired
Range Control Officer

PLANNING BOARD REPORT

City of New Bedford

February 18, 1968

To the City Council of the City of New Bedford.

Gentlemen:

The Planning Board submits its Annual Report for the year ending December 31, 1967.

Ten meetings were held during the past year for the purpose of holding hearings on changes on the zoning map. Eleven petitions for proposed zoning changes and seven resolutions were received for consideration by the Planning Board.

A summary of the cases with the action of the Board therein is set forth in the following table.

EDMUND J. TOOMEY,

Secretary

7. Resolution — Whereas, the New Bedford Redevelopment Authority has presented its plan and proposals for land use, thoroughfares, and community facilities for the Urban Renewal Project described as North Terminal and bounded generally by Elm Street to the south, by Pleasant Street, Foster Street, Hill Street, Foster Street, Pleasant Street and Purchase Street in that order to the west; by Wamsutta Street			Granted		July 24, 1967

PETITIONS FOR ZONING CHANGES — 1967

<i>Location</i>	<i>From</i>	<i>To</i>	<i>Recommendation by Board</i>	<i>Date of Meeting</i>
to the north; and by the New York, New Haven, and Hartford Railroad Co. and the U. S. Bulkhead and Pier-head Line to the east; and Whereas, the Planning Board of the City of New Bedford has considered these plans and proposals; Now, Therefore Be It Resolved by the Planning Board of the City of New Bedford that the plans and proposals set forth in the North Terminal Urban Renewal Plan concerning land use, thoroughfares and community facilities are based upon a local survey by the New Bedford Redevelopment Authority and that the North Terminal Urban Renewal Plan is in conformance with the City of New Bedford's <i>Master Plan for 1980</i> and the <i>Central Waterfront General Neighborhood Renewal Plan</i> .			Granted	July 24, 1967

- Whereas, the New Bedford Redevelopment Authority has presented proposals to amend and modify certain zones in accordance with Map e, Proposed Zoning Modifications of the Urban Renewal Plan for the Urban Renewal Project known as North Terminal and bounded generally by Elm Street to

the south, by Pleasant Street, Foster Street, Hill Street, Foster Street, Pleasant Street, and Purchase Street in that order to the west; by Wamsutta Street to the north; and by the New York, New Haven and Hartford Railroad Company and the U. S. Bulkhead and Pierhead Line to the east; and Whereas, the Planning Board of the City of New Bedford has considered these zoning proposals; Now, Therefore Be It Resolved by the Planning Board of the City of New Bedford that the zoning proposals are acceptable to the Planning Board of the City of New Bedford and that said zoning proposals shall be recommended to be adopted to the City Council of the City of New Bedford at a mutually agreeable time after the approval of the North Terminal Urban Renewal Plan by the City Council of the City of New Bedford.

9. Resolution of the New Bedford Planning Board Amending the "Master Plan for 1980" Whereas, the Planning Board has approved the Master Plan for 1980 which includes a plan for "Future Land use and Circulation" in the Central Area; and Whereas, the South Terminal Urban Renewal Project as revised includes that portion of the Central Area south of Union Street and

Granted

<i>Location</i>	<i>From</i>	<i>To</i>	<i>Recommendation by Board</i>	<i>Date of Meeting</i>
Way Adjustments Plan (Map 6, Code R213) and supporting project improvements report (Code R 224) indicating the proposed right-of-way of Elm Street between Pleasant and Water Streets to be thirty-eight (38) feet, and; Whereas, the <i>Master Plan for 1980</i> sets forth minimum street cross sections and right-of-ways of not less than forty (40) feet, and; Whereas, the widening of Elm Street between Pleasant Street and Water Street to a uniform right-of-way width of forty (40) feet would require the acquisition of a basically sound large structure; Now, Therefore Be It Resolved by the Planning Board of the City of New Bedford that the proposed thirty-eight (38) foot uniform right-of-way for Elm Street between Pleasant Street and Water Street will not substantially derogate from the intent and purpose of the recommended minimum street right-of-ways set forth in the <i>Master Plan for 1980</i> , and therefore said proposed Elm Street right-of-way is acceptable to the Planning Board.				

14. All land bounded by Church Street on the east, Tacoma Street on the south, a westerly extension of Natick Street on the north, and a line approximately 500 feet east of the New York, New Haven and Hartford Railroad on the west, on Assessors' Plats 130G and 130H.	Industrial C	Industrial A	Denied	October 23, 1967
15. All land bounded by Church Street on the east, a westerly extension of Holyoke Street on the north, Lynn Street on the south, and the New York, New Haven and Hartford Railroad on the west, being Assessors' Plat 127B, Lots 469, 539, and 540.	Industrial C	Industrial A	Denied	October 23, 1967
16. Resolution — Approving the North Terminal Urban Renewal Plan; Whereas, the New Bedford Redevelopment Authority has presented its plan and proposals for land use, thoroughfares, and community Facilities for the Urban Renewal Project described as North Terminal and bounded generally by Middle Street, High Street, Elm Street and New Bedford-Fairhaven Bridge to the south; by Pleasant Street, Foster Street, Hill Street, Purchase Street, and Acushnet Avenue to the west, by Mill Street, Hillman Street, Maxfield Street, Pearl Street and Wansutta Street to the north; and by the New York, New Haven and Hartford Railroad Company railroad tracks and the U. S. Bulkhead and Pierhead Line to the east; and			Granted	November 30, 1967

PETITIONS FOR ZONING CHANGES — 1967

<i>Location</i>	<i>From</i>	<i>To</i>	<i>Recommendation by Board</i>	<i>Date of Meeting</i>
Whereas, the Planning Board of the City of New Bedford has considered these plans and proposals; Now, Therefore Be It Resolved by the Planning Board of the City of New Bedford that the plans and proposals set forth in the North Terminal Urban Renewal Plan concerning land use, thoroughfares and community facilities are based upon a local survey by the New Bedford Redevelopment Authority and that the North Terminal Urban Renewal Plan is in conformance with the City of New Bedford's Master Plan for 1980 and the Central Waterfront General Neighborhood Renewal Plan.				
17. That the Business zone existing on the northeast corner of Belleville Avenue and Wood Street and on the northerly side of Wood Street be extended northerly one hundred sixty-seven and 01/100 (167.01) feet along Belleville Avenue; thence easterly two hundred forty-one and 99/100 (241.99) feet to land now or formerly of Charles P. Horton; thence southerly one hundred twenty-one and 92/100 (121.92) feet to a point; thence easterly one hundred forty-three and 76/100 (143. Forty-second Annual Report
OF THE
BOARD OF APPEALS

NEW BEDFORD, MASSACHUSETTS
For the Year 1967

BOARD OF APPEALS

City of New Bedford

February 18, 1968

To the City Council of the City of New Bedford.

Gentlemen:

The Board of Appeals submits its Annual Report for the year ending December 31, 1967.

Meetings were held on the first and third Wednesdays of each month except when there were no appeals.

Twenty-four appeals, under the Zoning Ordinance were received for consideration during the year. Eleven of these appeals were granted, four were denied, and six were granted conditionally, two were withdrawn and one postponed.

A summary of the cases, with the action of the Board is set forth in the following table.

EMERIC H. CHENEL,

Clerk

*Granted Conditionally

REMARKS AND RECOMMENDATIONS

The office of the Chief of Police is pleased to announce the following improvements. During 1967 the department had placed at its disposal instruments and apparatus that are bound to increase its efficiency and expertness. With greater and improved service in mind for the people of New Bedford, we are continually promoting modern means and methods of protection and security for all of our citizens.

In the year 1967 there were three retirements (one lieutenant, one Policewoman sergeant and one patrolman); nine (9) retired officers died; ten (10) patrolmen were appointed to the Department, also one policewoman; one policewoman was promoted to sergeant, and thirteen (13) sergeants were promoted to Lieutenant; two captains left the police department to join the State Police; and one patrolman resigned.

An emergency natural gas operated electric generator has been obtained for Police Headquarters. It is to be installed in the basement and will provide immediate electrical current in case of a power failure.

One hundred and twenty Smith and Wesson, .38 cal. Special revolvers were acquired. They will replace the same number of Colt .38 cal. revolvers. During the past two years we have bought two hundred and twenty such weapons.

Eight new Chevrolet Police Special patrol cars were purchased and put into operation.

Three radios were put into service on the same number of motorcycles. The Department's mobile units are now 100% equipped with radio communication apparatus.

One hundred and seventy-five Riot Safety Helmets have been provided. We now have a total of two hundred and forty-five.

Two hundred riot sticks were obtained. There are now a total of two hundred and fifty such sticks available in an emergency.

The latest type Xerox copying machine was substituted for an older model. It produces superior copies at a reduced cost.

For Station #5 a snow blower was purchased.

There were eight (8) appointees who attended Municipal Police Training School in accordance with Chapter #504 of the Acts of 1967, effective January 1, 1966. Four (4) went to Bristol County Training School at Attleboro, and four (4) went to Brockton Police Academy. Approximately ten ranking and superior officers attended seminars and classes in varied phases of Police Practice and Procedure throughout the year.

In order to maintain the best of police services to the public it is respectfully recommended that the following suggestions be adopted in 1968.

Acquire an Oil Burning Furnace to replace a coal burning furnace which is approximately fifty years old. The oil burning furnace would supplement another oil burning furnace now being operated in conjunction with the coal burning furnace. Both furnaces are overtaxed. The acquisition of another oil burning furnace would make it possible to institute a two zone heating system. This would provide uniform heat throughout the building creating a decrease in consumption of oil thereby resulting in a reduction in the cost of heating Police Headquarters.

Install aluminum railings on the Spring Street side and on the South Second Street side of Police Headquarters on the stairways leading into the building. This is recommended as a safety measure for the protection of the public.

Eight motor vehicles for patrol duty. Six sedans and

two station wagons to replace the same number and type of motor vehicles.

An ambulance to replace the 1960 vehicle at Headquarters. The ambulance now in use has a reading of approximately 82,000 miles, is operating with a second engine and is in poor condition.

A four-wheel drive pick-up truck to replace a 1956 Ford $\frac{1}{2}$ ton pick-up truck. This truck has gone 63,000 miles, is operating on a second replacement engine and the body is deteriorating.

Photo Dryer to replace a smaller one which has been in use fourteen (14) years. Because of the increase in photography over the years, the dryer now in use has become inadequate.

Two new desks to replace two old metal desks that have been in use approximately thirty-five years. Friction caused by rolling the tops up and down creates metal dust which finds its way about the desk and over any paper thereon.

Two electric typewriters are requested.

For in-service training, it is respectfully requested than \$500. be allotted.

In order to be prepared for all eventualities because of the unrest throughout the country, it is strongly recommended that the arsenal at Headquarters and the arsenal at Station #5 be augmented with new equipment.

With the progress in mind which has been accomplished, during the past year, we extend our thanks to His Honor, Mayor Edward F. Harrington, and the members of our esteemed City Council. Without their assistance and understanding the innovations which were instituted could not have been made possible. We are most grateful to the many other City Departments for the manner in which they have coordinated their efforts and ability with

the Police in behalf of the General Public. The personnel of television, radio and the press has been very cooperative in our request for limitations relative to news and the rights of those accused of crime. We are so appreciative.

In order not to be remiss, let me say the Police Department is ever mindful of the public with whom, by exemplary example and improved service, we are constantly attempting to improve our relations.

THOMAS F. CAWLEY,

Chief of Police

Joseph A. Sciuto, M. D.

Board Members

Leo S. Harrington

Director of Public Assistance

To His Honor, the Mayor, and the Honorable City Council.

Gentlemen:

The New Bedford Board of Public Welfare hereby submits its annual report for the year 1967.

Gross expenditures for all categories of public assistance administered by this Department amounted to \$9,900,190.17. Reimbursements from all sources amounted to \$7,843,512.53, leaving a net cost to the City of \$2,056,677.64, which was an increase of \$1,198,818.90 over that for 1966.

Expenditures under Medical Assistance, the newest program administered by the Welfare Department, surged forward to second place, exceeded only by the Aid to Families with Dependent Children program.

A concerted drive initiated by the Massachusetts Department of Public Welfare begun on June 1, 1967 gained momentum throughout the succeeding months, and as the year ended the Board of Public Welfare was literally deluged with applications for Medical Assistance and swamped with staggering volumes of medical bills presented to this Board for payment.

The highlight of this year was the enactment by the Legislature and the signing by the Governor on September 27, 1967, of Chapter 658 of the Acts of 1967. This is an Act reorganizing the Department of Public Welfare and providing for the direct administration of the Public Welfare system of the Commonwealth by the State Department of Public Welfare.

Finances to meet the costs of the administration of this far-reaching welfare legislation which becomes effective July 1, 1968, were provided for by the enactment by the Legislature of a new tax bill prior to the close of the legislative year.

After deducting federal funds received on behalf of the federally aided programs, the total costs of the Welfare programs shall be borne by the Commonwealth. This will have a far-

reaching effect upon the Cities and Towns who up to the effective date of Chapter 658 on July 1, 1968, will bear a share of the costs of Welfare which are reflected in the local tax rates. As of July 1, 1968 the burden of Welfare will be lifted from the shoulders of the real estate tax payers in the various communities.

During 1967 through retirements and resignations we lost the services of several valued employees. We were particularly saddened by the sudden death of Thomas P. Osborne on April 6, 1967. Mr. Osborne, Storekeeper in our Surplus Foods program since its inception, was a most valuable person for the Board of Public Welfare and community to lose. His pleasant manner in dealing with his fellow workers as well as the public whom he served, plus his efficient handling of his work assignment, leaves a void which is most difficult to fill.

The Office of Economic Opportunity renewed our Title V Program to extend through May 31, 1968. As the year ended, 83 persons were engaged in work experience and training under this federal program.

Under the Social Security amendments of 1967, important changes were made in the Social Security law; included among which are — increases in monthly cash benefits, new benefits for disabled survivors, benefits for workers disabled when young, increased amounts of earnings for beneficiaries who work without reducing their monthly benefits, and new medicare benefits. These changes will have far-reaching effects throughout the coming years.

The year 1967 was a busy one with the enactment of all of these changes, but 1968 will prove to be the year of major changes in the administration of the Public Welfare system in Massachusetts.

We wish to extend our thanks to His Honor the Mayor, Members of the City Council, all local private and public agencies, particularly to the New Bedford District Office of the Massachusetts Department of Public Welfare for the

assistance and cooperation rendered to us during the past year. To the employees of the New Bedford Board of Public Welfare, we wish to say a special "thank you" for their efforts during 1967 in helping to administer the various programs of this Department.

Respectfully submitted,

LEO S. HARRINGTON

Director of Public Assistance

Annual Report

OF THE

CITY PURCHASING

DEPARTMENT

CITY OF NEW BEDFORD

MASSACHUSETTS

For the Year 1967

BRAD.-WAR. DIV. REY. DEWALT
PRINTERS
1968

December 31, 1967

The Honorable Mayor and City Council
City of New Bedford
New Bedford, Massachusetts

Gentlemen:

We have the pleasure of submitting to you our report for year 1967.

We are grateful for your continued support and co-operation in our efforts to conduct all purchasing activities in accordance with the laws and ordinances of the City. We would like, also, to acknowledge the cooperation of all City departments in our endeavors to obtain for them the most economical supplies available, stressing quality and fair competitive relations.

Respectfully submitted,

FERNANDO P. CRUZ,
Purchasing Agent

CITY OF NEW BEDFORD, MASSACHUSETTS
PURCHASING DEPARTMENT

REPORT OF THE PURCHASING DEPARTMENT — 1967

The work of the Purchasing Department during 1967, the eleventh full year of its operation, is summarized in the schedules of Requisitions, Purchase Orders and Contracts listed on the following pages.

The City Ordinance provides that the Purchasing Department is responsible for procurement of all supplies and contractual services required by any department which derives its support wholly or in part from City funds, with the exception of professional expert consultant or similar contractual services. The Department is also responsible for the disposal of all surplus scrap and unusable materials.

Purchases of miscellaneous small items, usually required immediately, are made promptly after prices have been checked. On items involving less than \$200.00 competitive bids are invited by telephone, on items over \$200.00 by mail and on special equipment bids are advertised. Contracts are issued on purchases involving \$650.00 or more.

The operating expense for 1967 follows:

Salaries and Wages	\$15,905.33
General Expenses	<u>2,427.13</u>
	\$18,332.46

The City is exempted by law from payment of Federal Excise Taxes and State Sales Taxes and it has been the policy of the Purchasing Department to provide exemption certificates to cover such taxes on all supplies purchased

by the City. Purchases of automotive equipment such as motor passenger cars, motor trucks, batteries, etc. are covered by exemption certificates.

Savings have been realized by the installation of a Xerox copying machine and in 1967 76,243 copies were made for all City departments as needed. By centralizing this work it has definitely resulted in substantial savings to the City and in clearer copies being made.

IN SCHOOL COMMITTEE

December 29, 1967

Voted: That the Secretary be directed to prepare and edit the annual report of the School Committee for the year 1967 and that eight hundred copies of the same be printed.

The following report for the year 1967 is respectfully submitted:

DR. JAMES R. HAYDEN,
Superintendent of Schools,
reviews new machine accounting procedures.

MR. PHILIP BRONSPIEGEL,
Assistant Superintendent,
checks plans
for new high school.

MISS MARY A. KENEALLY,
Assistant Superintendent,
reviews latest Science
Curriculum Guide.

Office of
Superintendent of Schools
New Bedford, Mass.

December 29, 1967

Honorable School Committee
New Bedford, Massachusetts

Mrs. Ferreira and Gentlemen:

In accordance with the laws of the Commonwealth and the adopted policy of the New Bedford School Committee, I have the honor of submitting my seventh annual report as Superintendent and the one hundred and seventh annual report of the New Bedford Public Schools.

Following in chronological order are events which indicate the direction and the significance of the path taken by the public school system during this year of 1967:

January 13 — Authorized transfer of \$80,000 to engage the services of an architect for the preliminary steps in the construction of a new comprehensive senior high school.

January 27 — Endorsed the proposal for establishing a Regional Planning Center and authorized the Superintendent to file a Title III Project application.

February 10 — Normandin Science Center completed; \$108,085.68 less NDEA allotment \$37,058.20 or net cost of \$71,027.48 which was \$11,837.91 per room.

February 10 — New salary schedules presented and approved for inclusion in budget . . . new personnel authorized as follows:

Business manager

Elementary curriculum coordinator

Additional teachers:

2 secondary, 8 elementary, 1 special
class

- 1 Assistant Principal
- 1 Pyschometrist
- 3 Guidance counselors
- 1 Nurse
- 1 Junior clerk — Key punch
- 2 ROTC: 1 Commissioned Officer
1 Non-Commissioned Officer

March 14 — Contract signed with architect Owen F. Hackett, Jr. to plan the new high school.

April 5 — Authorized superintendent to act as their agent in planning a model school in a model cities' application.

April 24 - 25 — Emergency closing of 9 schools on April 24 and 10 schools on April 25 due to approximately 150 of our 200 Civil Service employees calling in sick. The 6 cafeterias were closed but all other schools with oil heat were kept open by having supervisory personnel tour the buildings. Secondary school children brought their own lunches.

April 25 — City Solicitor obtained a restraining order from Superior Court and on April 26 all schools resumed normal operation.

May 12 — Voted to accept NBTA contract with teachers and directors and set date for signing . . . contract signed May 19th.

May 12 — Acushnet School Committee met with N. B. Committee to receive assurances that in the new high school their pupils would be accommodated.

June 9 — Preliminary report with recommendations for the construction of a new high school using the "house plan" as a method of administrative organization . . . report submitted by Educational Consultants and Planners, Crabtree, Dawson and Michaels.

June 30 — Nomination of Teacher of Class for Deaf as of September 1967 . . . this activates a class which has been closed for two years due to lack of qualified teacher.

June 30 — Received \$78,189 from PL 874 (Federal Impact Grant).

July 25 — NBTA Principals' Contract signed.

July 25 — Proposed guidelines received re
Compulsory kindergartens
Perceptually handicapped children
Physical Education
Length of school day and year

July 28 — Authority voted to use PL 874 funds to purchase accounting machine.

August 25 — Received notification that Industrial Relations Adjuster was assigned to determine if cause existed for fact finding with respect to status of negotiations between Local #641 and the School Committee.

August 25 — Discussion with parents of children involved in Pupil Transfer Program of 1966-67. They requested their children be permitted to stay in school assigned to them last year. Plans had been made to send them to the Lincoln School where more space was available.

September 8 — Educational Specifications for a 3000 pupil comprehensive senior high school presented and accepted.

September 8 — Transfer pupils at the Parker and Mt. Pleasant Schools last year allowed to remain because space was available after school opened; other pupils were enrolled at the Lincoln School. Evaluation of Acushnet Avenue, Greene and Donaghy Schools presented to the Committee and a separate evaluation appearing in the Standard-Times indicates that while the schools are not new they are not neglected.

Over 500 pupils enrolled in the Non-English Speaking program: Thompson Street School reopened under Title I ESEA Project to teach English as a second language. Six-room addition to Campbell School occupied.

October 13 — Report of Racial Census: Acushnet Avenue and Greene Schools reported imbalanced.

November 6 — Met with School Building Assistance Bureau and received approval of Educational Specifications of New High School including the Schedule of Spaces.

December 8 — Gave final approval to Project COD: Center for Organization and Development; Title III ESEA Project designed to be the means by which 34 communities in Southeastern Massachusetts can develop educational projects cooperatively with New Bedford as the sponsor.

December 11 — Received \$13,530 from PL 874.

December 12 — Dr. Thomas Curtin visited the sending and receiving schools of the Pupil Transfer Program and interviewed the parents and teachers to determine the extent of progress New Bedford is making to eliminate racial imbalance.

December 15 — Commissioner Owen D. Kiernan announced Neil C. Fitzgerald as the Massachusetts "TEACHER OF THE YEAR" unanimous selection of the committee in competition with over 60 candidates. Mr. Fitzgerald, teacher of English at Roosevelt Junior High School, will represent the Commonwealth of Massachusetts in national competition the results of which are to be announced in April, 1968.

Traditionally and by its nature, an annual report reviews what has been accomplished and then indicates needs for the future. Seldom is the annual budget made a part of the written report. Significantly, when the report is published in printed form, the budget is bound together with the report.

Our school system has accomplished much during 1967 but when the expenditures and the words are compared, the true evaluation can be best made. We have made definite progress toward:

- . . . the planning of a new high school
- . . . the up-dating of curriculum

- . . . the expanding of physical plant facilities
- . . . the establishing of new personnel relationships with principals and teachers
- . . . the expansion of compensatory programs financed by federal funds

On the other hand, we have not moved as fast as desired in the areas of:

- . . . personnel relationships with Civil Service employees
- . . . expansion of special services in elementary grades, especially in the primary grades
- . . . modification and expansion of physical plant facilities in selected school districts

This year a business manager position was authorized and 1968 should see the position filled. The increasing demands upon School Committee members' time for negotiations, grievance procedures and study committees indicate the need for a Personnel Director.

The dramatic increase in the number of immigrant children from 29 in September, 1965 to over 500 in September, 1967 is one concrete reason why space for libraries, space for small group instructions, space for ETV, etc. is at a premium in the elementary grades. A Title I ESEA Project and an appeal to Peace Corps returnees have helped us keep abreast but not ahead of the demands.

The increasing and insistent demands of more and more special interest groups are directed every day to the door of the school house. Citizens, unable to find another social agency which reaches into so many homes, have asked the school to solve the problems of narcotics, alcohol, tobacco, family living, racial imbalance and the special problems of urban life. Other citizens, impatient for answers, are proposing and organizing separate educational systems designed to be "in loco parentis" figuratively and literally.

It is without question that we in public education should be doing more, should be doing the job better and in so many cases doing the job differently. However, it is also without question that urban areas, such as New Bedford, cannot do the job alone. The operating budget in New Bedford should be \$12 million for 15,000 children

rather than \$6½ million. This figure is not unrealistic when the average per pupil expenditure in Massachusetts is approximately \$600 and the need for special services in this urban area is more than average.

However, local and state governments are no longer able to do the job without federal financial support. This support which had been started in the form of categorical aid for special programs must be supplemented with general aid to provide the flexibility necessary to meet the needs of local school systems.

The states have been, since the days of Horace Mann, and still are primarily responsible for America's public educational system. We fully realize it is a far cry from the days of George Washington who is reported to have said: "We haven't heard from Ben Franklin in Paris this year. We should write him a letter." We know that the events of one hemisphere can be reported seven seconds later in the other hemisphere. We know that we are on the verge of one of the greatest technological revolutions yet devised which has been termed an information revolution embracing all media — press, broadcasting, publishing, recording, speech and graphics. We know we must adapt to the new communications technology. Without a doubt the schools should initiate and conduct programs in these areas:

1. Research centers for talented students on a 12 month basis.
2. Group therapy for parents of handicapped children.
3. Programs for pre-school handicapped children.
4. Expanded adult programs in cooperation with industry.
5. Counseling during evening hours.
6. Conversion of schools to community learning centers open every evening.

However, unless the budget provides, the reports and recommendations can only be filed for future reference.

On the other hand, we must have the support of citizens to prevent us from being choked to death by the

flood of information, unrelated, misunderstood, and mis-used much in the same way the city streets are now choked by the flood of automobiles. If we are completely traditional and opposed to new ways, new ideas, we will allow big business and special interest groups to establish their own schools. Rather we should join hands with those who are impatient and utilizing their energy build upon sound philosophical foundations for a truly universal and effective system of education.

Respectfully submitted,

JAMES R. HAYDEN,
Superintendent of Schools

ANNUAL REPORT

DEPARTMENT OF SECONDARY EDUCATION

It may well be that, in some distant time, a chronicler of the present New Bedford scene will record that the year 1967 was the turning point in the dramatic endeavor to achieve "excellence" in local secondary education. For this is the year when an encouraging commitment was given, and a practical action was taken, toward the building of a new comprehensive high school in New Bedford — a hope, finally become an inevitability. And this fact has brought in its wake a new spirit of confidence and aspiration since, for one and all, the new high school is a harbinger of better things to come, things which can bring fruition and climax to progress already begun in the past. This is the year of conviction, in the face of abundant evidence, that the new comprehensive high school is a certainty. Dwarfing all else in secondary education are the plans for its physical structure and the pedagogical implications inherent in, and deriving from, that structure.

Particularly enheartening is the fact that this important symbol of attainment and progress is in addition to other facts of attainment and progress which are concomitant and continuing. Federal, state, and local funds remain a bulwark to developing perspectives, experiments, and physical facilities. More and more the teaching staff and the administration are working together in planning the future. New and challenging experiences, as well as more abundant and improved materials, are being offered to the students who are our most important product and responsibility.

It would seem that, in the year 1967, we have "turned the corner" in the direction of a bright educational future for the secondary school community. There is formidable achievement yet to be realized, but there is conviction that it is no longer insurmountable. Now and always, this achievement will be moulded and shaped by our desire to obtain quality instruction in order that quality learning may become an actuality.

REPORT OF PROGRESS

The Comprehensive High School — Development
and Proliferation

Groundwork:

Present action and involvement in the plans for the new school have come in sequence to a voted commitment by the New Bedford School Committee to build a high school, initially for grades 10-12, and organized on the house plan, with each house structured vertically (a cross section of all three grades in each of four houses). Educational specifications presented by our consultant were accepted by the Committee, and the State Building Assistance Commissioner stated that he was in "substantial agreement" with area space requirements as submitted in November of 1967. In accompanying action, the architect has site borings and aerial photographs of the site. Frequent meetings and discussions with the architect, consultants and state supervisors have resulted in a series of schematic layout designs for the proposed school. These will be presented shortly to the School Committee for study.

Notwithstanding the necessity of educational consultants and architects, planning for the new high school can proceed effectively only if the professional staff has some responsibility for, and involvement in, the planning. The staff must, at the very least, be familiar with proposed alternatives and make known these proposals which seem most likely to solve their problems of operation. In deference to this essential factor, members of the New Bedford High School faculty were asked to submit suggestions and recommendations early in the 1966-67 year. Thereafter, a series of informal discussions were held between the educational consultant, school administrators, department heads, directors, custodial and cafeteria staffs during the week of May 15, 1967 — a total of twenty-seven people involved.

The new comprehensive high school has been planned, structurally, for an enrollment of 3,000 students — with adaptability for a future enrollment of 4,000 students. This flexibility has been incorporated into building plans because of an expectation of increased enrollment in

the years to come — from reduced dropout rate, a continuing influx of immigrant children, or the possible inclusion, eventually, of Grade 9. Should the latter possibility become a necessity, then the reorganization of the junior high schools could be accomplished with concomitant changes in elementary schools.

Pedagogical Implications:

The physical magnitude of the planned high school will be utilized to provide additional and superior curricular offerings. Moreover, size stimulates innovation in methods and techniques of teaching. Functional in design, equipped with the finest and most modern materials for learning and cultural pursuits, the school should provide every opportunity for academic and personal-social growth.

In addition, the scholastic and experimental offerings will cater to the individual student. In keeping with the school-within-a-school concept, he will not be inundated and lost in the student mass. He will be one of 750 students, served by a resident housemaster and guidance staff who will come to know him, personally, within a three-year period. He will have ample opportunities for involvement in intramural activities, social relationships, and athletic exercises. Through processes of careful organization and sensitive administration, the individual student will be provided with a sound social and personal environment.

It is premature to cite the detailed curricular offerings envisioned for the new high school. It is appropriate to say, only, that we expect to retain the best from the traditional and to introduce the most relevant new learning and teaching techniques that have been proved by critical use over a period of time.

The skill of teachers and the motivation of students remain the prime determinants of success in a school program, but the *building*, by its design, layout, scope, and environmental qualities plays an important, catalytic role. According to a new report from Educational Facilities Laboratories, the school building *can* make a difference in the quality of education. The physical layout, together with a diversified, comprehensive program of studies, team teaching, flexible scheduling, large and small group instruction, individual study in an Instructional

Materials Center . . . hopefully will make a significant difference in the education of our future high school students.

Aspiration:

In the near future, all the academic departments will begin the study of curriculum revision, flexible scheduling, team teaching, and independent study in preparation for the implementation of the newer pedagogical systems before the actual occupation of the new school. The pilot committee for this study-action program will be composed of the high school principals and the subject-matter department heads. Sub-committees of teachers within each department will be formed to work with models for study before the faculty. Each department will outline its plan for implementation by next year.

If our aim is to improve the lot of the "general" student and the "dropout," then we cannot adhere to the principle of complete conformity to a curriculum of prescribed subjects, particularly since there are all kinds of materials and objects besides traditional textbooks to enhance educational experiences. As a sequence to this fact, teachers must adopt different attitudes and stresses: substitute thinking and discussion for memorization; revise or omit the assignment — study-recitation formula; teach desirable habits, attitudes, and appreciations; change the emphasis so that the student is the center of the educational experience and subject matter incidental or supplementary; teach concepts which derive from significant experience in the lives of students; involve students in the determination of classroom goals; and contribute to an atmosphere which motivates learning. To repeat, we must cut across departmental lines in the endeavor to adjust to individual differences in mental capacities, points of view, personalities, and other potentialities.

The whole educational establishment must pool effort to achieve practical and significant goals. Youth is any nation's or any culture's most important asset. The training of youth is education's only reason for being, and this training must be focused upon his practical, aesthetic, physical, and intellectual potential. We must provide opportunities for developing a sense of practical responsibility, self-reliance together with sympathy, tolerance together with firm convictions about the nature of human-

ity. In short, we must train individuals who will, one day, participate, positively, in total citizenship.

Requisites:

To realize the idealistic goals set forth in this report, there are certain needs which require stressing. There is a need, undoubtedly, for more and better in-service training programs for all the teaching (and administrative) staff. In particular, more must be done for young, inexperienced teachers — perhaps a requirement that they attend seminars for improving instruction. As public relations become more important, teachers could profit by involvement in programs which offer accepted techniques of good parent-teacher ties.

There is a need for a new program-making process which would result in a tailor-made program for each student, selecting subjects from all curricula. Practically, this can only be accomplished by the addition of guidance counselors who, over a three year period, would come to know each student in the class assigned to him as his area of responsibility. There is a need for more frequent consultations with teachers, in addition to more analysis of test data, in order to achieve the proper placement of students.

We must incorporate team teaching into the new organization, since this method of instruction seems to hold such promise for the enhancement of instruction. A flexible program, together with team teaching, should afford each teacher the opportunity to perform the functions in the teaching process which he can do best.

GENERAL HIGHLIGHTS

In spite of a slight decrease in enrollment (New Bedford High — from 2,592 to 2,567), it would appear that our tutorial program and summer sessions have proved effective in keeping more of our students in school. The increasingly high standards of our curriculum are evidenced by the growth in the numbers of Honors classes — from five, ten years ago, to twenty-seven, today.

During this year, plans were made by the Data Processing unit to take over the keeping of the junior high school attendance records, thus relieving teachers of this

clerical chore. The assiduity of the Data Processing director and the cooperation of school principals and clerks auger well for a smooth and efficient transition.

On January 25, 1967, the School Committee sanctioned a program for teaching about Smoking and Related Diseases, to be given by Mr. Wesley Vokey, Executive Director of the Bristol County Health Association. Arrangements were made for Mr. Vokey to take over each Grade 7 Science class for one period a week in each junior high school. His first appearance was at Normandin Junior High School, followed by a like appearance at Keith Junior High School. Mr. Vokey will present the same program to 7th graders at Roosevelt Junior High School in January of 1968. Present evidence points to a successful experience for the students as a result of frank discussion on the smoking problem.

The addition of a third counselor at each junior high school this year has guaranteed every student in Grades 7, 8, and 9 the personal attention, availability, and individualized service of a counselor in time of personal or academic distress.

In March of 1967, the New Bedford Public Schools sponsored "Books on Exhibit," a collection of new books for junior and senior high school readers, in the library of Keith Junior High School. Sixty-three leading publishers contributed 900 titles to this exhibit. It proved to be a time-saving way of keeping up with the new books.

During the year, twelve teacher trainees were accepted for training at secondary levels. New Bedford continues to cooperate with state and other colleges in providing this service.

Two New Bedford High School science instructors were selected to participate in a thirty-week National Science Foundation Bio-Chemistry Institute at the State College at Bridgewater. Three science teachers were selected to participate in a thirty-week National Science Foundation Earth Science Institute at the same college. Seventy-seven percent of the science faculty took graduate courses from September, 1966 to June, 1967.

Through funds made available under the Vocational Education Act of 1963, considerable equipment and teaching aids have been acquired to enrich the instruction of business education. The most notable expansion occurred

in the Data Processing and Stenographic classes. An extra class was added in Data Processing to care for added enrollment and interest in the subject. Also, instruction has been increased so that classes now meet five times a week.

At Roosevelt Junior High School, the ungraded program under Title I, ESEA, was expanded to include pupils scheduled to repeat the 8th grade as well as the 7th.

The fifth year of Secondary Summer School was held from July 3 to August 11 with an enrollment of 925. Twenty-one students received graduation diplomas from New Bedford High School and, in addition, ninety-five students, previously failing, were awarded junior high school diplomas.

Through Title III, NDEA, each junior high school has now had its fifteen stations expanded to a thirty-position Electronic Language Learning Laboratory. Materials are being purchased for improved use of the facility.

For the second year, the unique summer educational day camp, Camp ECHO, under ESEA Title I, was held for 250 pupils economically deprived and educationally disadvantaged, Grades 3-7. Once again, the value of the camp was evident as attested to by the camp staff and other observers from the state department.

Basic remedial education was provided with funds from ESEA Title I in all three junior high schools this summer for Grade 6 students who were entering Grade 7. Reading and arithmetic were the basic skills stressed.

For the second year Tutorial Centers were operated with ESEA Title I funds in each secondary school for twenty weeks beginning January 11. Sessions were held two hours daily, two days weekly, after school hours. A total of 536 pupils were enrolled and participated in a total of forty-three different classes with a rate of 83% attendance. The effectiveness of the program again was reflected in the favorable comments of pupils and parents of disadvantaged families and the improved marks of the pupils attending.

Another summer federal project conducted was the Science Enrichment Program which this year included both Roosevelt and Keith Junior High School pupils as well as those from some parochial schools. Sixty pupils participated in nineteen field trips and twenty-three class-

room sessions of demonstrations and experiments emphasizing practical applications of basic scientific principles during an eight-week period.

A project under NDEA Title III has been written to modernize the Machine Shop at Roosevelt Junior High School. It is recommended that the curriculum be revised so that this shop will be a Metal Lab giving boys a broader experience in basic metal skills. It is expected that much new equipment will be purchased to implement this program.

Improvements in the Home Economics Department included the renovation of the Foods Room at Normandin Junior High School as well as new streamlined, lightweight furniture in three of the other rooms. The replacement of major appliances at Keith Junior High School consisted of self-defrost refrigerators and self-cleaning ovens.

PROBLEM AREAS

Despite the best salary schedule ever offered by the New Bedford Public Schools, the secondary schools still lived with the problem of departing personnel. This year, there were thirty-two resignations, five retirements, and five leaves of absence — a grand total of forty-two teachers to be replaced. The problem is aggravated by the lack of ethics employed by some teachers who resign after June 1 and even as late as August 30. There is little consolation in the fact that other communities have similar difficulties. If competent, experienced, and stable personnel is the key to quality education, then this year's high rate of change in teachers indicates that we must wait several years to achieve that goal. We must find ways to put teeth into the effort to improve and stabilize our teaching staff.

With the growth in knowledge and the added complexity of education, we can no longer afford to deprive existing personnel with assistance in terms of para-professionals. Such assistants could be used as teacher aides, tutors, library aides, cafeteria and study hall supervisors, and English composition readers.

The indiscriminations and promiscuous standards of many teen-agers relating to the abuse of drugs, alcohol and smoking point up a vital concern for schools to be-

come involved. To this end it is our obligation to undertake a thorough study of these alarming problems and to recommend a total health education curriculum ranging from sex education to the dangers of drug use. We must form a committee to study the problem and procedures of offering such a curriculum through a thorough review of the literature, existing programs, and conferences with health education consultants.

The cafeteria situation at Roosevelt Junior High School poses a difficult decision. Rather than renovate the cafeteria, it may be wiser and more just to build a new cafeteria as an addition to the existing building. Anything less is, perhaps, a grave disservice to the students at that school since modern, attractive facilities have been provided at Keith and Normandin Junior High Schools.

Theoretically, the present cafeteria could be used for other legitimate purposes as providing substitute space for sub-standard classrooms.

The future needs of the Home Economics Department continue to be the improvement of physical surroundings and the replacement of furniture in Roosevelt's Clothing Rooms and Family Living Room. Generally, the junior high school home economics curriculum needs to be revised to assure continuity with classes to be available in the new high school.

Our problems and needs are always with us. But there are many compensating achievements which, together, form a basis for an optimistic outlook. We now look to future progress with renewed confidence that the days ahead will be ever brighter. Sacrifice is demanded of all concerned in the educational effort, but the signs are favorable that we can gain this sacrifice.

1967 ANNUAL REPORT
DEPARTMENT OF ELEMENTARY EDUCATION

CURRICULUM PROGRESS

SCIENCE education in our elementary classrooms will take on new impetus in September 1968. A selected Science Committee composed of teachers and assistant principals submitted a long-range plan under Title III N. D. E. A. to the Board of Education. Approval of our proposed plans has been received. A revised Science Course of Study has been compiled and will soon be distributed to all elementary teachers. Workshops for teachers of each of the grades will be conducted this fall and plans for an in-service course in science are underway.

READING textbooks from many publishers have been assiduously studied for one year by a competent group of teachers representing each elementary grade. Recommendations from this committee are that beginning in September 1968 we should place heavy emphasis on the teaching of reading and phonics in Grade One. Such a direct attack, they believe, would help to eliminate many of the reading problems in later grades. Basal readers continue to prove themselves more beneficial for disadvantaged students than a great quantity of supplementary readers (or ultra-modern materials) now on the market, as skills in reading are always going to be a major need.

The key to a successful reading program, however, continues to be the classroom teacher. Poor reading instruction is a major cause of reading failure. Therefore, meetings of teachers by grades will be scheduled both in the spring and fall, at which discussions and demonstrations of reading lessons will take place.

CURRICULUM CO-ORDINATOR

Under the guidance of Dr. Florence L. Mahon, every kindergarten teacher in our schools is now presenting lessons in PHONICS to their classes. Children entering Grade One in 1968 should, as a result, tackle the reading process with greater readiness than ever before.

Meetings are being held separately by Dr. Mahon for the teachers of the various grades from kindergarten

through grade six. Teachers new to the system are brought together regularly for continued orientation and assistance in classroom management. Reading classes are gradually being organized on ability levels, and an increase in departmental classes on the intermediate level has been noted and encouraged throughout the elementary schools. Children enjoy learning when taught by teachers who have a good background and strong liking for a particular subject.

Plans for committee work on two new elementary Curriculum Guides will begin in January. These will be prepared for use by the teachers of the Elementary Enrichment Classes and the teachers of Kindergarten.

TEACHER-AIDE GUIDE

The innovation of numerous Federally financed programs in our public schools over the last several years has made it possible for many citizens to assist in our elementary schools as teacher-aides, particularly in our Non-English Speaking Program, Pre-School Program, and in summer Federal Programs. Such work has tremendous appeal to the general public, and therefore, in response to repeated pleas for training, a twelve-week Course for Teacher-Aides commenced on October 23, 1967 with close to two hundred persons enrolled.

In January 1968, it is hoped that forty or fifty enrollees from this group can be placed in our regular elementary classrooms where large enrollments exist or where disadvantaged pupils are in need of help. This will be a possibility when acceptance of a Federal Program, relating to this type of assistance, is announced.

BUS PROBLEMS

Too many children and too few buses! The tremendous population growth of Pine Hill Acres has played havoc with transportation of pupils from this area who attend Normandin Junior High School, the Elwyn G. Campbell School, and St. Mary's Parochial School. Homes in this area and at another new development close by, indicate the positive need of locating an elementary building in this vicinity in the very near future, rather than the Sylvan Grove location.

ELWYN G. CAMPBELL SCHOOL

September 1967 found the Campbell School enlarged by six additional classrooms, and an enrollment of approximately 542 children. Homes are steadily continuing to be erected in this section of the city and in another two years this school will be greatly over-crowded. This year the present kindergarten enrollment is seventy-five, and this figure indicates the probable need for a second kindergarten room in 1968. Only a new building to the north of this school will alleviate this situation.

LACK OF SPACE

There are twenty-seven elementary schools in existence at the present time. No empty classrooms are available anywhere with the exception of several located on third floors of old buildings.

Specialists of reading, speech, testing, guidance counselors and nurses are working under terrific handicaps in corridors or basement rooms.

Libraries are non-existent in some buildings for lack of a room. Pupils are forced to view T. V. lessons and participate in French classes, or auditorium programs in corridors because available space is at a premium.

CLASS SIZE

This year we have thirty-one classes with enrollments averaging thirty-two or more pupils. Lack of space within a building prohibits us from dividing them into smaller groups. Individual attention for pupils needing help in such classes is almost impossible, and the brighter youngsters, as well as the slower pupils, are neglected — as the teacher teaches the average child.

Small-size classes, it is true, are in evidence in scattered areas where population has dwindled. Equalizing of these two types of classes to relieve overcrowding is impossible, however, as they are often miles apart.

The only solution to acquiring smaller classroom size in all elementary schools is to construct several large schools immediately, or to consider additions on such buildings as the Brooks, Winslow or Lincoln schools. Cafeterias would be strongly recommended as a part of any

structure, because they eliminate the worrisome problems of safety, by having pupils traveling to and from school only twice a day. Attendance of pupils improves, and the playground supervision problem is eradicated, when cafeterias are included.

IMBALANCED SCHOOLS

The present low enrollment of 144 children in the Thomas A. Greene School is the result of the Pupil Transfer Plan, and does not warrant keeping this building open. In June, twenty-one of these pupils will leave for junior high school, and six are in the Class for Emotionally Disturbed Children, thus leaving only one hundred seventeen (117) youngsters in the regular classrooms.

The Greene School pupils could readily be absorbed into the Lincoln program and at another school having small enrollment. Lunches, in lieu of a cafeteria, could be served in the individual classrooms with the aid of service carts. Aides would be assigned to supervise at this period.

Once the Greene School was vacated, it could be made available for Pre-School Classes, Non-English Speaking Program, or other atypical classes.

In the ten-room Acushnet Avenue School, seven rooms are now occupied by regular classes from Kindergarten to Grade Three. By transferring pupils in three classrooms to a school having low enrollment, we would then have six available rooms which could be occupied by the Non-English Speaking Classes. Catered lunches would also have to be provided this group at whatever building they would be assigned.

LOOKING TO THE FUTURE

Attention of the entire school personnel during the year 1967 has been focused on the disadvantaged child and his needs. Many new programs and materials have made an appearance in an effort to improve his social, cultural and academic surroundings. This effort will continue in 1968.

However, the study of innovations and programs for the disadvantaged child reveals our real concern for the needs of ALL children, and our determination to meet

these needs through individualization and instruction and development of new and better education programs. Nothing is well built without a good foundation, and the first years in school are that foundation.

One outstanding weakness in the elementary area for many years has been the lack of qualified supervisors in the field of reading, science and penmanship. The small investment required to have such assistants would be amply repaid by greatly improved faculty performance and schools where children were obtaining quality education. It is a goal that I hope may be acted upon in the near future.

The urgent need for continued study of innovative changes in the elementary curriculum is still paramount.

Overage pupils in Grades Five and Six whose poor academic achievement most often develops a dislike of school, should be offered an opportunity to participate in various types of workshop classes. Such a curriculum would actually reduce the drop-out total and provide students with a school program that actually meets their requirements for living in the world of today. May I recommend that serious consideration and planning be taken with regard to this elementary school need?

NEW BEDFORD HIGH SCHOOL

The enrollment at New Bedford High School this September showed a slight decrease from 2592 to 2567. A lower enrollment had been anticipated, but it would appear that our tutorial program and summer school sessions have proved effective in keeping more of our students in school.

It would seem that the maximum enrollment in the present building with its restricted curriculum will remain under 2600. The new comprehensive high school with its broader offering of courses will without a doubt not only increase our "holding" power but also give our students the education they may particularly need in these days of rapid change. In the interim, as stated in last year's report, we will continue to maintain the high standards of our present curriculum. It is worthy of note that in spite of our crowded conditions our Honors classes have grown from five ten years ago to twenty-seven today.

On the whole the physical condition of the school continues to be satisfactory. Again during the summer an excellent job was done in dividing the music room originally a study hall into two classrooms to provide space for our data processing classes. However, less maintenance was done in comparison with other summers. Several basement staircases should be resurfaced, and the Boys' Room on the East Basement floor should be rehabilitated at the earliest possible date. Our bell system which caused a great deal of trouble in the past two years was checked during the summer. It is to be hoped that annual checks will continue to be made in the remaining life of this school.

English Department

During the year the Department continued to provide those experiences, in and out of class, which will result in making all students better readers, writers, speakers, listeners, thinkers, and hence better citizens.

Few changes took place during the year. It was a period of developing stability as the new Language Arts Curriculum Guides aided in the transition between the old and new courses of study. The final book order of 1966-67 assured a sufficiency of the new books for this year.

Again, much new audio-visual equipment and many new audio-visual materials were received under a Title III grant. In addition to numerous filmstrips, recordings and tapes, several films of technical content became the property of the Department. The Department also received new kinds of equipment such as filmstrip previewer, copying machines, a typewriter, lenticular screens, projection tables — all of which should do much to facilitate the use of audio-visual instruction. Orientation in the operation of the new equipment was given to our teachers by our Audio-Visual Department and representatives of pertinent sales companies.

Students of English were given opportunities to participate in tutorial programs, Educational Enrichment, the Summer Reading Program, and various field trips. For the first time, several hundred students attended performances of Shakespearean drama (HAMLET) under the educational project sponsored by the *Boston Herald-Traveler*.

Recommendations

1. That the supply of *basic* books be further increased in order to achieve the goal of one such book for each student.
2. That the Title I English project of two years ago be revised and re-submitted in order to obtain local and state approval for materials still needed.
3. That the services of a reading consultant be provided to preside over the developmental and remedial reading aspects of the Language Arts program.
4. That an office be provided for the Department Head to eradicate the obstacles resulting from the lack of a central nucleus.
5. That in-service courses for English teachers in the techniques of efficient reading and writing instruction be given in the near future.

Social Studies Department

The Department as in the past aims at a continuous, varied and up-to-date program for all levels. A review of some of the activities of the year is listed below.

1. "A study of Newspapers in the Classroom" was continued in Grade 12 Problems of Democracy continued with the cooperation of the *Standard-Times*.
2. The Department continued cooperating with two Massachusetts State Department of Education Projects: Massachusetts Schools Get-Out-the-Vote Campaign and the Annual Student Government Exchange Program.
3. In February, "American History Month," Dr. Jordan D. Fiore, Chairman of the History Department at Bridgewater State College and noted Lincoln and Civil War scholar, was the main speaker at the Department's assembly.
4. During Crime Prevention Week thirty-three of our students participated in the program sponsored by the New Bedford Exchange Club.
5. In June, a 10 hour course "Personal and Family Survival" sponsored by the Massachusetts Civil Defense Adult Education Department was conducted in our Problems of Democracy classes. Students completing the course were presented a Certificate.

6. A new remedial approach program for low level Readers, *American History Study Lessons*, Follett Company, has been adopted for Grade 11 United States History General Curriculum and Grade 10 World History General Curriculum.
7. *The Pelican History of England: England in the Twentieth Century* is being used in the Grade 11 English History on an experimental basis.

Recommendations

1. A two year course in United States History and Modern Problems (Three semesters of U. S. History and one of Modern Problems).
2. Special newspaper such as the *New York Times* or news magazine such as *Newsweek* for Grade 12 Problems of Democracy be provided.
3. Consider the possibility of replacing in Grade 11 English History as an elective in the College Curriculum.
4. Study the possibility of revising or replacing in Grade 12 Economics with Current Events in the General Curriculum.

Science Department

The Science Department continues its research in content and material to keep pace in the ever expanding world of science.

1. Two teachers are participating in a thirty week National Science Foundation Bio-Chemistry Institute at State Teachers College in Bridgewater.
2. Five teachers are enrolled in graduate programs at the University of Rhode Island, Northeastern, and State College at Bridgewater.
3. Twelve new American Optical Series 60 Microscopes were purchased under the provisions of NDEA Title III.
4. FORD FUTURE SCIENTISTS OF AMERICA AWARDS — The Ford Future Scientists of America Awards Program is designed to help identify and encourage students with unusual ability in science and

with potential to pursue a career in science. The aim of the program is to offer these talented students the opportunity to experience the kind of procedures and activities used by practicing scientists in conducting their research.

Five entries were submitted by our students. Three students received the following: a Regional Award and two Honorable Mentions.

5. **SCIENCE TALENT SEARCH** — Two institutions, Westinghouse Electric Corporation and Science Service, join in sponsoring the annual Science Talent Search. The major objective of this program is to discover, with essential educational cooperation, the youth of America whose scientific skill, talent, and ability indicate potential creative originality.

Three students submitted entries, but no awards were received by the contestants this year.

6. **SCIENCE FAIRS** — The New Bedford High School Science Fair was held on February 17, 1967. William Preece was grand prize winner for his project "Plasma Phenomena." Our twenty award winners submitted their projects to the Greater New Bedford Science Fair.

At the Greater New Bedford Science Fair our highest award winner was again William Preece who received:

- a. Walker Trafton Award in Physics
- b. 1st Prize in Physics
- c. U. S. Army Award
- d. Alternate (Greater New Bedford) to National Science Fair

Recommendations

1. The sum of five thousand dollars be allotted for the purchase of non-expendable items under Title III.
2. New and more equipment be added yearly to keep pace with rapid advances in both subject matter and methods of teaching.
3. A three step curriculum program should be initiated as soon as possible.
 - a. Evaluation of present curriculum 1967-1968

- b. *Revise and up-date* present curriculum to meet the projected needs in the new comprehensive high school 1968-1969
- c. *Introduction* of revised and up-dated curriculum 1969-1970

Mathematics Department

The Department endeavors to keep abreast of the many suggested changes in instruction in mathematics to better prepare our student of today to pursue a career befitting his interests and capabilities. While it is impossible and sometimes impractical to implement all the new ideas, the Department feels it is making steady progress in modernizing its course offerings.

1. Introduction of "modern math" has stabilized itself.
2. New textbooks have been selected for Honors classes in Grade 10.
3. This year for the first time some of our top math students entered the contest sponsored by the Massachusetts Association of Mathematical Leagues. Three contestants received Certificates of Merit and one qualified for the level two test.
4. SMTI sponsored a series of seven lectures for interested juniors and seniors. Each professor chose a subject outside the usual secondary school curriculum.
5. The Audio-Visual Department supplied the Department with rented films to enrich the instruction in the college preparatory junior and senior classes.

Recommendations

1. Another math teacher be assigned to reduce class size.

French Department

The Aims of foreign language teaching are accepted as understanding, speaking, reading, and writing, in that order.

The principal topic of discussion at most language teachers' meetings is the adoption of the audio-visual approach to the teaching of modern languages. We are committed to the use of the Holt, Rinehart and Winston

Series. Results have varied with the enthusiasm and skill of the teacher. We are now aiming to standardize our procedures.

Honors classes established at various levels have contributed to our pupils being able to compete successfully with students from other schools. Third year teachers are saying that their classes are better than ever.

Most of our eligible teachers have now taken a federal government sponsored institute aimed at improving spoken French, and the manipulation of audio-lingual procedures.

The Russian and German classes both have a third level audio-lingual test for acceleration. For the first time we now have two classes in German I.

Third year French classes have been provided with new readers to keep up with contemporary literature and vocabulary as is presumed necessary for College Boards and Placement.

Recommendation

1. More time should be given to French in Grades 7 and 8 to give our pupils a better competitive position in the hard world of graduates from private, parochial, and wealthy community schools, which begin foreign languages in the lower grades and continue as a full-time subject in Grades 7-12.

Portuguese Department

The Department lost in January through retirement its original Department Head, Miss Laurinda Andrade, who had served so diligently for approximately twenty-five years. Mr. Antone Felix served as acting head until the end of June when he resigned to accept a post at SMTI. Since then the Department has acted without a Head. As in the past several years fourteen classes are conducted by three teachers.

Last March Professor Gregory Rocha of SMTI met with about 25 of our seniors planning to major or minor in Portuguese at SMTI.

New filmstrips on Portugal and her overseas possessions and Brazil were ordered through the Audio-Visual Department.

The essay contest sponsored by the Portuguese American Civic League in conjunction with the annual observance of Peter Francisco Day resulted in 8 essays submitted by students in the Portuguese classes.

Recommendations

1. More audio-visual material is desperately needed. Whatever filmstrips are purchased for the Department will be made available to other departments. The Audio-Visual Department under Mr. Johnson has been most cooperative in obtaining these materials in the past.
2. Advantage should be taken of all opportunities offered by the National Education Act of 1965.

Business Education Department

Because of the aid received by the Business Education Department from the funds available under the Vocational Education Act of 1963, considerable equipment and teaching aids have been acquired to assist in teaching and training students to understand and meet the complexities and diversifications of the business world of today.

Additional Overhead and Opaque Projectors will augment the Bookkeeping and Typewriting classes with their accompanying transparencies and visual forms which complement the text books in use.

The most notable expansion in the Department has occurred in the Data Processing and Stenographic classes. An extra class was added in Data Processing to care for the added enrollment, and instruction has been increased so that the classes now meet five times a week. A new laboratory was created by remodeling a classroom from a study hall and furnishing it with extra Key Punch machines and suitable furniture.

A Stenographic Wireless Laboratory has been established in the Stenography room with all the essential dictation discs and materials. A new class was formulated with carefully screened pupils (similar to an Honors Class) to encourage more rapid progress in the Stenographic area.

Conclusion

In May of 1967 New Bedford High School submitted its *Five-Year Progress Report* to the New England Association of Colleges and Secondary Schools. The Report was divided into five sections.

1. Recommendations carried out since the two-year report
2. New projects initiated since the two year report
3. New plans for the future not covered in previous reports
4. Difficulties encountered in carrying out major recommendations
5. General Comments on the effect of the whole evaluation.

The full report covered ten pages and was submitted to the Superintendent of Schools. It would seem that the Progress Report might well be considered as a part of this Annual Report.

On September 7, 1967 the New England Association of Colleges and Secondary Schools through its Director of Evaluation submitted the following letter to the Principal of New Bedford High School.

"At a meeting of the Commission on Public Secondary Schools on August 23, 1967, the five year progress report from New Bedford High School was considered and accepted. The Commission hopes that efforts will continually be made to provide the finest educational opportunities for the young people of the community.

"Your next evaluation, required for continued membership and accreditation, should be planned on or before the tenth year anniversary date of the previous evaluation.

"Please let us know if we can be of assistance to you."

The above letter calls for a new evaluation for continued membership and accreditation by October of 1971. If the new comprehensive high school is not a reality but construction is in progress, provision is made for a later date with the Association. To have an earlier evaluation in our present building would serve no purpose.

"Building"

together means
teachers, aides,
parents . . .

having the
materials in the
right place at
the right time.

TITLE II ESEA
provided . . .
books on the

ANNUAL REPORT
of the
COMMISSIONER
of
PUBLIC WORKS
of the
CITY OF NEW BEDFORD, MASS.
to the
CITY COUNCIL
1967

BRADBURY-WARING DIVISION
REYNOLDS-DEWALT PRINTING, INC.

New Bedford, Mass.

1968

COMMISSIONER'S REPORT

February 9, 1968

Honorable Mayor and City Council
New Bedford, Massachusetts

Gentlemen:

In compliance with Chapter 3, Section 58 of the City Code, I herewith submit the annual report of the Department of Public Works for the year ending December 31, 1967.

Appropriations and expenditures are shown in the various tables, together with a chart indicating the comparative Highway expenditures for the period from 1921 through 1967.

AERIAL PHOTOGRAPHY — The topographic maps procured in 1966 through the services of Aero Service, Philadelphia, Pa. have proven invaluable to this department. I strongly recommend that additional maps be made of the remainder of the city at an estimated cost of \$15,500.00.

CHAPTER 90 — Construction was completed on the Parker-Durfee-Nauset and Purchase Street areas. Engineering work is in progress on the Hathaway Blvd. and Potter Street projects.

NEW EQUIPMENT — A Vac-All street and catch basin cleaning truck has been obtained to replace the 20 year old Netco Clam-Shell catch basin cleaner. This new equipment will modernize and expedite our cleaning methods and will prove to be a valuable asset to the department.

I wish to express my appreciation for the cooperation that I have received from His Honor, Mayor Edward F. Harrington, the members of the City Council, the various department heads, and my own capable assistants in carrying on the work of the department.

Respectfully submitted,

EDMUND J. TOOMEY,
Acting Commissioner

ENGINEERING DIVISION — 1967

AIRPORT COMMISSION — Plans were drawn and surveys made in connection with airport boundaries and leases.

ASSESSORS — Real Estate transactions and transfers were filed at the Registry of Deeds. Such transfers were changed on city plots and indexed. Three sets of 208 plots are kept up to date and blueprints made of the same.

BOARD OF APPEALS — Twenty-four surveys and plans were drawn and records kept.

BUILDING DEPARTMENT — Lines and grades were given for 43 new buildings. The buildings were numbered and records kept.

CITY SOLICITOR — Plans and blueprints were made and descriptions were written on request of City Solicitor for the sale of City owned land and acquisition by Eminent Domain.

CURBING — Lines and grades were given for setting 6,795 lineal feet of curbing. Inspection and measurement was made of the same.

HOUSE DRAINS — One hundred and twenty-nine (5287 feet) new house drains and eight relays were laid connecting house sewer and surface pipes with the main sewer. Locations of these drains were measured, records were made of the same and drawn on drain plots.

PLANNING BOARD — (Zoning) Eleven plans for zoning changes were made and lists of abutters made and reported.

PARKING METERS — Two surveys and plans were drawn for new meters and removal of meters. Surveys were made for No Parking signs and laying out stalls for No Parking areas.

SEWERS — Surveys, plans, list of abutters, assessments, and specifications were made for seven new sewers and four new surface drains. Construction costs, inspection, lines and grades, were given for 2,300.04 feet of sewers and 2,443.14 feet of surface drains. Records of construction, final plans, and final assessments were made and reported.

SIDEWALKS — Surveys, Plans and estimates were made for thirty-three projects under the Betterment Act. Measurements, records, final plans, and assessments were made and reported. Plans and estimates were made for 122 projects laid by bonded private contractors for property owners.

STREETS — Surveys were made and plans drawn for the acceptance of 6 new streets. Lines and grades were given for all street construction and public utilities construction. Surveys were made and points set for the installation of new street bounds.

TRAFFIC COMMISSION — Surveys were made and plans drawn. Traffic counts were made at 23 intersections.

ROUTES 195 and 140 — The Engineering Division cooperated with State and Federal District Engineers, private engineers, and also with private contractors on the proposed projects.

HURRICANE BARRIER — The Engineering Division cooperated with the Corps of Engineers and private engineers on the proposed projects.

WATER BOARD — Lines, grades, engineering and survey information as required were given for all water main extensions.

MISCELLANEOUS — Lines and grades were given for fences, street lines, and sidewalks. Forty-nine accident or damage sites were surveyed. Plans were drawn to prepare for possible court action. Numerous plans were drawn and descriptions prepared for study by the City Council Committees and the City Solicitor.

Weather records were kept daily on rainfall, snowfall, wind velocity, temperature, and tides. This weather information was reported to State and Federal agencies and was made available to the public. Records were kept of street sweeping and ash collections. The area of cuts in pavements and walks were measured and recorded. City maps and plans were kept up to date, blueprinted and indexed.

GENERAL STATISTICS

January 1, 1968

Set off from Dartmouth	1787
Incorporated as a City	1847
Length of City	10.73 miles
Breadth of City (Maximum)	3.10 miles
Highest point	1250 feet north of Rockdale Ave. and Hathaway Road. Elevation 181.50 feet
City Datum	Based on 0.85 feet above mean high water
State Datum	Based on mean sea level 2.55 feet below City Datum
Geometrical Center of City	Nash Road and Mt. Pleasant Street
Area — Land	12,241 acres
Ponds	193 acres
Land — Ponds	12,434 acres—19.42 sq. miles
Tidal Water	8,451 acres—13.21 sq. miles
Length of frontage on tidal waters	10.13 miles
Depth of main channel	30 ft. at low water
Average rise and fall of tide	3.50 feet
Population — Registrar of Voters estimate	103,897
Assessed valuation	\$161,010,725
Assessed valuation per capita	\$1,549.71
Accepted streets — Area 1,445,817 acres	245.165 miles
Bridges (3)	0.796 miles in New Bedford
Sewers	263.855 miles
Length of Intercepting Sewer:	
Outfall	0.626 miles
Intercepting	9.188 miles
16 Public Parks	288.80 acres
14 Public Playgrounds	31.72 acres
1 Rifle Range	230.35 acres
7 Parking Lots	5.81 acres
30 School Buildings — Area of Ground	116.60 acres
1 Airport—Area of Ground	829.93 acres
Area of Easement	118.67 acres
5 Wharves — and other waterfront land (Harbor Development Comm.)	72.00 acres

WATER BOARD REPORT

May 11, 1968

To the Mayor and City Council
of the City of New Bedford

Gentlemen:

In accordance with the provisions of Chapter 23, Section 3-2312 of the City Code of New Bedford, the Water Board herewith respectfully presents this, its ninety-eighth annual report, covering its operation for the calendar year 1967, and including the reports of the superintendent and the water registrar.

Mr. William J. Kruger was reappointed as a member of the Water Board for a term to expire June, 1971.

The average daily consumption for the past year was 18,454,318 gallons, which was approximately 1,708,379 gallons less than 1966.

The total consumption for 1967 was 6,735,264,200 gallons, which was approximately 624,120,200 gallons less than 1966.

The water debt as of December 31, 1967 was \$1,430,000.00, a decrease over 1966 of \$137,000.00.

Bonds in the amount of \$60,000.00, Additional Supply, Chapter 400, 1924, were sold; the proceeds being made available for the purchase of land around the ponds.

The Water Board voted to request the transfer of \$268,676.19 surplus from Water Department receipts to Water Department, New Construction and Improvement Account.

The following abstracts from the Water Registrar's report shows in condensed form the financial operation of this department during the year. Full details will be found in his report, which accompanies this.

FIRST, BASED ON THE BUDGET SYSTEM IN ACCORDANCE WITH CITY AUDITOR'S ACCOUNT

	Salaries & Wages	Labor	General Expense	New Construction	Total
1967 Budget	\$176,000.00	\$210,000.00	\$148,000.00	\$139,271.23	\$673,271.23
Refunds			341.19		341.19
1966 Encumbrances			11,394.63		11,394.63
Transfers to General Expense			2,102.46		2,102.46
Transfer to Salaries and Wages					7,800.00
Transfers to New Construction	6,800.00	1,000.00			301,270.11
Total	182,800.00	211,000.00	161,838.28	440,541.34	996,179.62
1967 Expenditures	181,261.39	209,779.18	156,872.68	383,996.58	931,909.83
Balances	1,538.61	1,220.82	4,965.60	56,544.76	64,269.79
Less unexpended balance carried to 1968			4,950.09	56,544.76	61,494.85
Balances reverting to General City Funds,					
December 31, 1967	1,538.61	1,220.82	15.51		2,774.94

SECOND, BASED ON RECEIPTS AND EXPENDITURES

RECEIPTS

For water, meter rentals, flushing charges, demands and fines	\$1,018,341.74
Miscellaneous receipts	45,583.16
Receipts from Bond Issues	121,784.55
New Construction	383,996.58
Encumbrances 1966	11,394.63
Total receipts from all sources	\$1,581,100.66

EXPENDITURES

Management and Repairs from Appropriation	\$156,872.68
Management and Repairs from Bonds	121,784.55
Payrolls from Appropriation	391,040.57
New Construction	383,996.58

REPORT OF THE WATER REGISTRAR

City of New Bedford
Water Registrar's Office
December 31, 1967

To the New Bedford Water Board:

Gentlemen:

I herewith present to you a detailed statement of the receipts and expenditures of the Water Works Department for the year ending December 31, 1967.

The report is based on Budget vs. Expenditures and also on Receipts and Expenditures as previously.

RECEIPTS

FIRST, Based on the budget system

Budget Appropriation	\$534,000.00	
Refunds	341.19	
1966 Encumbrances	11,394.63	
Transfers to General Expense	2,102.46	
Transfer to Salaries, Wages and Labor	7,800.00	
Transfers to New Construction	301,270.11	
Balance—New Construction—1966	139,271.23	\$996,179.62

EXPENDITURES

Payrolls	\$391,040.57	
Bills	156,872.68	
New Construction	383,996.58	
1967 Encumbrance Account	4,950.09	\$936,859.92
Balance—New Construction account carried over to 1968		56,544.76
Unexpended balance, reverting to City Funds		2,774.94
		\$996,179.62

SECOND, Based on Receipts and expenditures as previously

RECEIPTS

RATES

Town of Acushnet, Special Rate	\$10,013.50
Town of Dartmouth, Special Rate—Allen Street	1,420.44
Under 10,000 Cu. Ft. per quarter	402,738.04
Over 10,000 Cu. Ft. and less than 100,000 Cu. Ft. per quarter	74,428.81
Over 100,000 Cu. Ft. and less than 1,000,000 Cu. Ft. per quarter	132,047.85
Over 1,000,000 Cu. Ft. and less than 2,000,000 Cu. Ft. per quarter	41,561.45
Over 2,000,000 Cu. Ft. per quarter	256,830.20
Estimated and building purposes	1,424.99
Total receipts for water	\$920,465.28

WATER REPORT

Meter Rentals and Flushing Charges		94,114.46

REPORT OF THE SUPERINTENDENT

May 11, 1968

To the New Bedford Water Board:

Gentlemen:

The annual report of the superintendent of operation of the Department for the year 1967 and on the general condition of the works is respectfully submitted:

The financial report of the Water Registrar — rainfall — and, usual tables showing in detail the work of the Department, are incorporated as part of this report.

RAINFALL

Total rainfall for the calendar year, 1967 was recorded at Quittacas Pumping Station, Rochester, Massachusetts at 54.02 inches.

POND LEVELS

The water levels in the Lakeville Ponds reached the following elevations during 1967.

	HIGH LEVEL	LOW LEVEL
Pocksha Pond	52.15 May 31	48.22 Jan. 4
Great Quittacas Pond	52.28 May 31	47.90 Jan. 4
Little Quittacas Pond	48.48 March 15	47.03 Aug. 16

WATER TREATMENT

All water during the year was sterilized through the addition of liquid Chlorine at Quittacas Pumping Station; and, all water traveling through High Hill Reservoir is again treated with Chlorine. All water leaving Quittacas Pumping Station is also treated with Soda Ash.

STATE DEPARTMENT OF PUBLIC HEALTH

Due to a taste and odor complaint the last (2) two years in the late Fall, water samples were taken and shipped to the Allied Chemical Corporation's laboratory for analyzing; and, a detailed report was forwarded to the Department.

Approximately 120 samples a month are being taken from the system.

STORAGE YARD AND BUILDINGS

Sidney Construction Company of Brookline, Massachusetts was awarded the contract for the construction of the New Maintenance Buildings and Storage Yard. The black-topping of the area is to be done under a separate City contract; and, all grading and clearing of the site is to be completed by the Department.

About 1700 ft. of 7 ft. anchor fence was removed from the foot of Potomska Street by Department personnel for reusing at the new site. All loam was stock-piled to be used by the Department in seeding and grading of the lawn.

On December 8, 1967, substantial acceptance of the New Workshop was voted by the Water Board; and, Department Employees began the task of moving the stock and equipment to the Shawmut Avenue site.

1967 SURPLUS

The financial report submitted by the Water Registrar for the year 1967 is shown in detail in various sections of the Water Department's annual report. It will be noted that the Department operated with a balance of \$268,676.19 which will be transferred to the New Construction and Improvement Account.

This is possible only through the fine close cooperation of the Staff under the supervision of the Water Registrar. The Staff working in the Superintendent's office also did an excellent job in plotting, processing, billing and expediting all work reports.

WATER REGISTRAR'S OFFICE

Due to new construction, relocations, south terminal demolition and the recent spot demolition program throughout the City, this office is finding the work-load far heavier than ever in the history of the Department. Additional help has been requested on two or three occasions.

The retirements of a large number of meter-readers have been a handicap in its operation.

The Water Board voted to trade-in the old addressograph machine and to purchase the new one presently being rented by the Payroll Department for the sum of \$3,515.10.

METER MAINTENANCE

This Department with its (3) three employees is doing a remarkable job in maintaining and installing meters throughout the

system. In programming their work it is the first time in 15 years that they have a surplus of meters and a limited stock of parts.

This Department was relocated to the Shawmut Avenue site and in full operation by December of that year.

ACUSHNET SYSTEM

No work of any real value was done to this system this year.

HIGH HILL RESERVOIR

It was voted by the Water Board to accept the Superintendent's recommendations to replace the old equipment at the High Hill Chlorination Station with two (1) one-ton scales and new type Chlorinators which were expected not to exceed \$10,000. No work has been done as yet.

SOUTH TERMINAL AREA

The Redevelopment Authority has begun to demolish all the buildings in this area; and, the Water Department Employees have closed-off hundreds of services and some water mains. The work of installing a new 16" Class 25 water main in this area has begun. Water projects in Phase 1 will be close to \$255,000.

DISTRIBUTION SYSTEM

Assistant Superintendent, Edward V. Peters has been fully occupied with his limited crew in making alterations, repairs, relocations and new installations.

The Acushnet Golf Ball Division awarded a contract to Loranger & Son for the installation of a 12" water main (service line) on Wood Street for approximately \$87,000.

D. W. White Construction Company, Acushnet, Mass., has made water installations for private developers that normally would have cost the Department approximately \$100,000.

WATERSHED AREA

The City of New Bedford purchased the following property:

1. Clark Farm, including a piece of property formerly owned by the Richmond Family — approximately 120 acres.
2. Vickers' property on Route 105, land bordering Spring Brook on north end of Little Quittacas Pond — approximately 15 acres.

3. Cudworth property on Route 105, land bordering Spring Brook on north end of Little Quittacas Pond — approximately 20 acres.

Over 4,000 pines were received from the State Nursery and planted on the Reservation.

FORCE MAIN

Discussions were carried on with the State Department of Public Works for the installation of (2) two concrete culverts at a cost of \$30,000 dollars each; and, the cost of approximately \$1,500 to \$2,000 for the relocation of our telemetering lines. This is work that must be done due to work progress on a new section of Route 140.

FLUSHING

The system was given the usual flushing of its water mains; and, all waste gates and hydrants were operated.

ROCKDALE SYSTEM

Due to Route 195, Campanella and Cardi Construction Company was awarded a contract which included \$54,000 worth of water Utility work which was completed this year. This included work on Hathaway Road, Lemos Street, and Rockdale Avenue.

Department Employees installed a (4) four foot fence — paved the driveway — loamed, and reseeded the area in the vicinity of the tank.

TOWN OF DARTMOUTH

On August 31, 1967, a meeting was held to hear a proposal submitted by Fred Hanack, Superintendent and Clifford Mansfield, Fay, Spofford & Thorndike, Inc., Engineers to take water from the (2) two 48" transmission mains in the vicinity of High Hill.

WATER LAY-OUTS SUBMITTED BY TIBBETTS, ENGINEERING

1. Wholesale Distribution Center — to be located in the north area of Nash Road, east from Mt. Pleasant Street.
2. Air Industrial Park — to be located west of Mt. Pleasant Street, north of Kings Highway on land owned by the Airport.
3. An easement for Rowe Street — from Hathaway Road to Route 195 to protect the existing 42" water main; and, Department rights to work in this area.

WATER REPORT

PUMPING STATION

Assistant Superintendent, Edward Begin and his limited help continue to maintain the grounds, ponds, station, watershed area; and, High Hill Reservoir in excellent conditions.

A new diesel stack was installed by Olivier & Son, New Bedford, Massachusetts.

A portion of the 4" cast iron water line in Negus Way was replaced with new pipe — the remainder to be done when time and material become available.

A Chlorine storage building, designed by Mr. Green, Department of Public Works, will be constructed in 1968.

PONDS

The Water Board voted at the May meeting to assist in the construction of a fish ladder at the Nemasket River and to assume only its share of the cost.

The Superintendent reported receiving the following communication from the City Council May 25, 1967 — approving the order authorizing the sale of bonds for the sum of \$60,000 under authority granted by Chapter 400 Acts of 1924.

On May 15, 1967, the following report was submitted to the U. S. Army Corp of Engineers, New England Headquarters, Waltham, Mass.:

WATER DEPARTMENT

CITY OF NEW BEDFORD, MASSACHUSETTS

May 9, 1967

Dear Sir:

It was just brought to my attention that many area officials were unaware of this Public Hearing tomorrow.

We feel the subject of water should be of vital concern to all elected officials, due to the effect it could have on 120,000 inhabitants of this area who will find it in short supply in the near future, unless steps begin to materialize for the improvements of additional storage and developments.

If you are unable to attend this meeting tomorrow, the New Bedford Water Board would appreciate a letter of support being sent to the following:

WATER REPORT

31 y

Department of the Army
North Atlantic Division, Corps of Engineers
90 Church Street
New York, N. Y. 10007

Yours truly,

GEORGE H. BRIGHTMAN,

Superintendent

GHB:b

WATER DEPARTMENT
CITY OF NEW BEDFORD, MASSACHUSETTS

May 15, 1967

Hon. Edward F. Harrington,
Mayor

Dear Sir:

In attending the hearing May 10, 1967, at the U. S. Army Corps of Engineers, New England Headquarters, Waltham, Massachusetts, Brig. General F. P. Koisch said that projects will be separated into these categories: urgent, intermediate and ultimate.

In reviewing this matter, I feel we should request assistance under category (**Urgent**) due to the following reasons:

A. On Page 2 of our report submitted at this meeting, it shows the total withdrawal from these ponds in the year 1965, was in excess of nine billion (9,000,000,000) gallons of water by the City of New Bedford and the City of Taunton, approximately eighty-five per cent (85%) of its available source.

B. Realizing a substantial period of time will be required for the engineering and economic analysis for effective co-ordination, I feel we will be approaching the full resources of our ponds.

Yours truly,

GEORGE H. BRIGHTMAN,

Superintendent

GHB:b

STATEMENT SUBMITTED BY THE CITY OF
NEW BEDFORD FOR THE NORTHEASTERN
UNITED STATES WATER STUDY

May 8, 1967

HISTORY:

The City of New Bedford is the largest city in Southeastern Massachusetts and the fourth largest city in the Commonwealth.

The City of New Bedford supplies the towns of Acushnet, Dartmouth and Freetown with water and has legislative authority and responsibility upon request to supply the towns of Fairhaven and Lakeville.

The average daily consumption of water by the residents and industries of New Bedford, Freetown, Acushnet and Dartmouth in their homes and in the commercial and industrial activities which furnish their livelihood, averages twenty million (20,000,000) gallons. During the course of a year, the New Bedford Water System supplies Acushnet approximately sixty three million (63,000,000) gallons, Dartmouth approximately thirty two million (32,000,000) gallons and Freetown approximately fifty thousand (50,000) gallons.

New Bedford has the fourth largest supply, transmission and distribution system in Massachusetts. The distribution system serves the entire built-up area of the City and through metered connections it also serves area towns.

There are two hundred eighty (280) miles of water mains, running in size from four (4) inch to forty eight (48) inches in the transmission, supply and distribution system. The transmission mains extend from Little Quittacas Pumping Station to High Hill Reservoir; there being two mains forty eight (48) inches in diameter. There are two thirty six (36) inch and one forty two (42) inch supply mains extending from High Hill Reservoir to the distribution system. There is also a forty eight (48) inch reduced to thirty six (36) inch by-pass supply mains extending from the forty eight (48) inch transmission mains at Middleboro Road, Freetown and this supply main serves as part of the distribution main system in Acushnet Avenue. About two hundred thirty (230) miles of distribution mains range from four (4) inch to thirty six (36) inches.

The most important part of the distribution system is the thirty six (36) inch and thirty (30) inch loop system which extends from the north end of the city to the south end; supplied from three thirty six (36) inch and one forty two (42) inch supply mains as feeders.

Chapter 345 of the Acts of 1894 allocated the waters of Great and Little Quittacas Ponds to the City of New Bedford. Under authorization of this Act, land was acquired and works were established to deliver these waters to the City. Since July 10, 1899 this system has furnished the public water supply of the City and the adjoining towns supplied by it.

Chapter 400 of the Acts of 1924 allocated to New Bedford a daily amount not exceeding eleven million five hundred thousand (11,500,000) gallons from Pocksha Pond and Assawompsett Pond and authorized the acquisition of land and the construction of dams and other structures and facilities to protect and develop the additional supply.

Chapter 400 of the Acts of 1924 follow the recommendations of a study board which had been created by the legislature at the request of the New Bedford Water Board. After it was determined that the needs of the City of New Bedford for water were nearing the capacity of the Great and Little Quittacas Ponds, the Act made provisions for the allocation of the waters of Long, Assawompsett and Pocksha Ponds by the City of New Bedford, Fall River and Taunton. Chapter 400 is known as the Tri-City Act. Since the passage of this act, a metered connection between Pocksha Pond and Great Quittacas Pond was authorized and installed and a record is kept showing the amount of water drawn from Pocksha Pond.

WATER CONSUMPTION:

The records show that during periods of excessive droughts, as many as fourteen million (14,000,000) gallons per day are drawn from Pocksha Pond into Great Quittacas Pond. The total withdrawal from these ponds in the year 1965 was in excess of nine billion (9,000,000,000) gallons of water by the City of New Bedford and the City of Taunton, approximately eighty five per cent (85%) of its available source.

The water consumption delivered through the New Bedford Water Works System averages twenty million three hundred five thousand (20,305,000) gallons per twenty four (24) hour day and has a withdrawal of several billion (7,000,000,000) gallons yearly from Lakeville ponds. The total population served at present is over one hundred twenty thousand (120,000) inhabitants, and the unit consumption rate is in excess of one hundred sixty three (163) gallons per capita per day.

New Bedford is a very heavy, industrialized, municipal complex. We also are the second largest fishing port in the United States. We estimate that the industrial uses of water coupled with

that used for fishing industry purposes approximately fifty six per cent (56%) of the volume of water consumed.

We have projected future service to approximately one hundred sixty five thousand (165,000) persons and an average daily consumption of twenty nine million (29,000,000) gallons or one hundred seventy eight (178) gallons per capita, including, of course, our industrial users.

AREA NEEDS:

Engineering studies made as far back as 1887 proved conclusively that we had ample resources to supply water for fifty (50) years, without any additional source development. These studies have proven correct, but we have reached a point where improvements are urgently necessary. We now feel that it is essential for that area of Southeastern Massachusetts which uses the City of New Bedford as its water supplier, to have sufficient water stored and available in our ponds to provide thirty five million (35,000,000) gallons per day for limited periods of time, until a substantial source is made available. We feel that this condition would provide adequate resource provision for at least twenty five (25) additional years.

The major source of all water supply to Southeastern Massachusetts, at least in that area centered around New Bedford, is the Lakeville watershed. The watershed consists of forty seven (47) square miles with a water surface of approximately ten (10) square miles and a storage capacity to a five (5) foot depth estimated at eleven billion (11,000,000,000) gallons. In our opinion, the preservation and improvement of this watershed is not only important, but critical to any long range planning to improve the water resources of Southeastern Massachusetts.

RECOMMENDATIONS:

Many studies and recommendations have been made for a short range program for the conservation and improvement of the Lakeville watershed. The studies are important, but in the opinion of the City of New Bedford not nearly comprehensive enough to properly set out what should be our long and short term goals. The studies are as follows:

- A. Report of 1953 Southern Massachusetts Water District Commission.
- B. Report of 1965 by Camp, Dresser & McGee Engineering firm of Boston, Massachusetts.

- C. Report of 1960 by Rowley Association, Wareham, Massachusetts.
- D. Report of 1967 by Tibbetts Engineering Corp., New Bedford, Massachusetts.

The City of New Bedford therefore recommends as a vitally necessary first step that the Corps of Engineers undertake an immediate comprehensive engineering study of the entire Southeastern Massachusetts area under the provisions of Public Law 89-298 as a necessary pre-requisite to the setting up of long and short term programs to assure adequate supplies of water for Southeastern Massachusetts for the foreseeable future. I believe that Southeastern Massachusetts certainly qualifies as a great urban metropolitan center when you recognize the fact that New Bedford, Fall River and Taunton lie within a fifteen 15) mile radius of each other.

The City of New Bedford has other suggestions which it could make at this time for the improvement of the water resources of Southeastern Massachusetts but most strongly feels that these suggestions should be made in the form of matters to be considered in the overall engineering study rather than to necessarily offer them as independent solutions. Therefore, we request that these particular areas of possible solution be given careful study.

1. It has been estimated that the harnessing of the Fall Brook of watershed could provide an additional three to five million (3,000,000 to 5,000,000) gallons daily yield for Southeastern Massachusetts at a rather reasonable cost and a minimum disruption of the activities of the area. We request that this be considered in the study with a view toward solving the immediate short range water resource problem.

2. We have estimates without cost figures that the dredging of big Quittacas to an additional four (4) foot depth could provide Southeastern Massachusetts with an additional storage facility of one billion seven hundred fifty million (1,750,000,000) gallons annually. The City of New Bedford owns nearly one hundred per cent (100%) of the property around the pond so little, if any, damage would be caused to private investors. We request this matter be given consideration to determine the advisability and cost of a dredging operation.

3. We have information that through the raising of the levels of other ponds in the Lakeville watershed three to four billion (3,000,000,000 to 4,000,000,000) gallons additional storage capacity could be supplied to the Southeastern Massachusetts area. This should be given careful consideration.

4. At the present time, the cities of New Bedford, Taunton and Fall River maintain a dam at the head of the Nemasket River. The dam is in a deteriorated condition and losing millions of gallons of water daily. Yet, even if the dam were put in perfect condition the storage facility of the pond would not permit the retention of any additional gallongage due to the build-up of residential areas around the pond. The water loss is very unfortunate and only comprehensive engineering survey could reveal the most suitable location for a new dam facility.

5. Those among us who are not trained in engineering skills have long felt that the utilization of the Taunton River as a watershed is the long term solution to any water supply problems in Southeastern Massachusetts. The River has a watershed of five hundred twenty (520) square miles and estimated safe yield of eighty million (80,000,000) gallons per twenty four (24) hour day. It could serve the City of Fall River, New Bedford and Taunton and all the neighboring towns as our requirements grow. An exhaustive study should be made of this in order to determine whether or not this resource could be the critical factor in assuring a totally adequate water supply for all Southeastern Massachusetts capable of meeting all predictable future contingencies.

We have always felt, in Southeastern Massachusetts, that adequate surface water reserves are available to meet all of present and future needs if they are properly harnessed, conserved and dedicated to this purpose.

In the event that a comprehensive engineering survey indicates that our appraisal is incorrect, then I suggest that the City of New Bedford is an ideal location for a desalinization plant if and when the price of desalinization of water is feasible. New Bedford is located on the water and as I have tried to point out above, has the largest transmission facilities south of Boston. These water transmission lines are capable with almost no additional cost of supplying water to all the communities in this area from a plant which could be located on our waterfront.

Our request, therefore, is two-fold. First that a comprehensive engineering study outlined above be immediately undertaken by the Corps of Engineers to determine the most satisfactory means of providing an adequate future water supply for all Southeastern Massachusetts and second, that the engineering survey be implemented through design and construction on the part of the Corps of Engineers of whatever dams or facilities must be created to satisfy the needs pointed out through the comprehensive engineering survey.

We herewith request an immediate comprehensive engineering survey in those areas outlined above and a program of implementation designed to alleviate any possible future water shortage in this area.

Respectfully submitted,

Edward F. Harrington, Mayor
and President of the New Bedford Water Board

George H. Brightman,
Superintendent, New Bedford Water Department

TURNERS POND

At the Water Board meeting of May 31, 1967, the Superintendent submitted a detailed position paper pertaining to the development of Turners Pond:

POSITION OF THE WATER DEPARTMENT OF THE CITY ON THE DEVELOPMENT OF TURNERS POND AND THE SOLUTION TO LONG AND SHORT RANGE WATER PROGRAMS

I am writing to set forth in detail the position of the New Bedford Water Department on the request of the Town of Dartmouth for authority and assurances to perform certain work on the Turners Pond Watershed. Town officials are seeking to determine whether there is a sufficient supply of useable water in the watershed to acquire the pond and the land surrounding it as a source of water. I set forth herein an analysis of the benefits to be gained by the City and the town from the development of the Turners Pond Watershed and some other pertinent thoughts and conclusions.

Dartmouth officials have stated that they have spent, with no degree of success, more than two hundred eighty thousand dollars (\$280,000) seeking a source of underground water capable of supplying the towns present demands and future needs. New Bedford is seeking funds to impound additional water in the Lakeville ponds. Presently there are ninety three million (93,000,000) gallons a day going to waste because of the fact that sufficient areas are not available to impound this quantity of water. With proper improvements we believe it is feasible to use this amount of water to supply the entire area at a minimum cost for the next fifty (50) years.

Dartmouth is presently supplied through wells and through a connection at Allen Street with the water transmission system of the City of New Bedford. During the year 1966, Dartmouth used four hundred eight million eight hundred ninety eight thousand eight hundred (408,898,800) gallons of water. Thirty two million seven hundred twenty five thousand nine hundred (32,725,900) gallons of this amount came from the New Bedford Water System. During periods of prolonged drought, the recovery periods of the Dartmouth wells are necessarily slower due to the lowering of water tables which require the town to draw more heavily from the City of New Bedford.

CAPACITY OF THE DARTMOUTH WATER SYSTEM: The distribution system was constructed, in general, with small sized water mains (the largest 12") thereby creating a problem involving excessive pressure losses on extensions into outlying districts and lowering the pressure in other places due to the water demands for these areas. Elevated tanks were installed but the peak demands, placed upon the pumps by the system make it impossible to refill the elevated tanks. This condition leaves the town without reserve storage to handle emergencies such as fires.

The town is presently having a substantial increase in the numbers of domestic and non-domestic users. Its future growth trend could be northerly due to the following reasons:

- a. Route 6 complex of shopping centers.
- b. The amount of good clear vacant land which will be developed and occupied by mass housing, schools, etc.
- c. The expressway connector and Route 195 and their proximity to the railroad could increase the development of the two (2) Industrial Parks in the northern part of the town.
- d. SMTI and supporting development.

Inquiries have been made to the New Bedford Water Department by two (2) large developers about the availability of water in the vicinity of the High Hill Reservoir.

STORAGE BASIN: Dartmouth must eventually commit itself to a storage basin of some type that will be beneficial to the town regardless of what source the town gets the water from. I would like to submit what I believe is an intelligent visual approach to the future when analyzing the water needs of New Bedford and Dartmouth and offering possibilities and alternatives to the development of the Turners Pond area. Serious consideration must be given by

the City of New Bedford and the Town of Dartmouth to the economics involved in solving this problem.

A. Turners Pond As a Surface Water Supply — We find that the City of New Bedford had an engineering study made in 1870 which reads as follows:

"The source of Fresh River above Turners Pond are in a very level and extensive cedar swamp, covered with a deep vegetable deposit, and the adjoining hill slopes are sandy, loam and gravel. The impervious nature of many of the hill slopes and the deep vegetable mould in the swamps would prevent the rainfall from readily sinking in the strata beneath. Such a watershed would give but a small ratio of available water; and no other source of run-off water could be added to it at a reasonable cost.

In analyzing the water, we find it had a very high brownish color with a strong acid and swampy taste. No additional investigation was made as we turned our attention to the crystal clear water of Little Quittacas and the building of a storage basin in Acushnet."

To develop this source it would be necessary to hire a consulting engineer to do the following research:

1. Character of the water.
2. Present and future contaminations.
3. Watershed, future and present requirements, the quantity available, proper knowledge of the geology of the surrounding country.
4. Rainfall, absorption and evaporation.
5. Elevation and distance of source.
6. Construction of storage reservoir.
7. Development and construction of sources of water supply, pumping station, pumping equipment, chlorination equipment, filtration equipment, controls, piping and appurtenances (approximately one million dollars (\$1,000,000).)
8. Obtain approval from the Department of Public Health.
9. Obtain legislation approval.
10. Estimate the construction and project costs.
11. Determine the cost of maintenance at the proposed site.
12. Study the effects from the new sewer and drainage systems rapidly expanding to this area.

Our best estimate at this time, is that the minimum cost for developing whatever surface water potential there is in Turners Pond at the present time, would be two million five hundred thousand dollars (\$2,500,000). This estimate is very optimistic and the cost would probably run quite a bit higher without any indication of the quality or quantity of water available.

B. **Developing Turners Pond As a Well Site** — For the City and town to develop a source of well water in this particular area would require the hiring of a consulting engineer for the purpose of a thorough investigation and cost analysis of the following:

1. An investigation which requires the services of a competent ground water geologist to evaluate the following: The probable yield of water which depends, primarily, upon the area of permeable strata likely, to effect the supply, and upon the facilities those stratas may offer for the passage of water.
2. The rate of consumption which takes place in that area for the quality of water which any particular stratum can supply, therefore; It would be necessary to get information on original and present water levels in existing wells, both static and pumping water levels, including the yield, drawn down and mineral contents of the water would have to be collected and tabulated.

C. These studies would necessarily include information pertaining to what effect additional wells would have on those presently developed for industrial use at the New Bedford Industrial Park.

D. Acquisition of the land on which the proposed well locations are located subject to the approval of the State Department of Public Health.

E. An Act of the State Legislature for the Town to develop water resources outside its boundry lines.

F. Effects from the expanding northerly loop of the City's proposed sanitary and surface sewer program.

G. If a well of a given quantity is found and is shared equally between the City and Town, will development cost be worth the yield it may give for the present period of demand or should every dollar be spent for **expanding resources** so that they will handle all **future growth** for domestic and non-domestic users in this area.

H. The next step necessary would be the retention of an engineer familiar with modern well drilling practice to do the following:

1. Design the well.
2. Select the proper pumping equipment, appurtenances, pump house, etc.
3. Design preliminary plans for the proposed distribution layouts and connections.
4. Determine cost of a substantial storage facility with connections to the town system plus estimating maintenance costs.

The cost of the storage facility would be governed by its size which could add to the project cost. I would say the storage facility construction costs would be in the neighborhood of one million six hundred thousand dollars (\$1,600,000).

Long Pond Development by Dartmouth — Dartmouth officials have stated at times that it might be advisable for the town of Dartmouth to purchase Fall River's water rights in Long Pond. The estimated acquisition and development cost in 1950 was four million dollars (\$4,000,000). This estimate is contained in a report by Whitman & Howard, Engineers to the Fall River Commissioners. If Fall River were to acquire rights in Long Pond under present conditions, a treatment plant would have to be constructed and it is estimated that the overall development costs would be in excess of seven million dollars (\$7,000,000). Dartmouth would also have to have a treatment plant, a pumping station and a transmission line.

New Bedford Water Works Acting As a Small MDC System — The New Bedford Water System is actually working as a small MDC in supplying the Town of Dartmouth thirty two million (32,000,000) gallons, the Town of Freetown approximately fifty thousand (50,000) gallons, the Town of Acushnet sixty three million (63,000,000) gallons and supplying the City of New Bedford. It pumps close to seven billion four hundred million (7,400,000,000) gallons yearly.

Improvements at the Lakeville Watershed are a necessity.

The total population served at present is about one hundred twenty three thousand (123,000) and unit consumption rate is in excess of one hundred sixty (160) gallons per capita per day.

The total future population to be served has been estimated to be about one hundred sixty thousand (160,000) persons. The corresponding future average daily consumption has been estimated as twenty nine million (29,000,000) gallons, which is about one hundred seventy eight (178) gallons per capita per day.

As certain unsewered areas in the cities and towns receive sewage under presently existing plans, it is estimated that the water con-

sumption rate, particularly in the town of Dartmouth, will perhaps double, due to users ability to dispose of the additional gallonage without fear of septic tank systems.

It is my opinion as it was the opinion of my predecessors that every effort should be made to develop additional storage at our watershed so that it would bring the ultimate safe yield to thirty million (30,000,000) gallons per day.

Source of Supply for the Future — Southeastern Massachusetts by looking into the future for a water supply solution must base its planning on a regional approach. The complete implementation of all planning could be ten (10) to fifteen (15) years away or so.

These programs could include such programs as the following:

1. Saline water conversion program.
2. Southeastern Massachusetts must look into the future for a backup source which is available by developing the Taunton River Project which has a potential of eighty million (80,000,000) gallons per twenty four (24) hours.
3. Feasibility of Dartmouth joining Fall River in developing the Copicut Watershed.

Suggestions, as set forth herein, have been made for the development of area resources.

1. Fall River relinquish its rights to the waters of Long Pond as set by Chapter 400 — Acts of 1924 of the General Court. Fall River has never exercised her rights and a 1950 report by Whitman & Howard to the Wattuppa Water Board stated it was completely out of reach financially for Fall River to develop this source.
2. The diversion of Fall Brook in Middleboro to the Lakeville Ponds.
3. The Rowley Report of Wareham recommended the raising of the level of the ponds.
4. The Tibbetts Report of 1967 states the goals to be achieved if all conditions are normal in hydraulic dredging and raising Great Quittacas one foot, could possibly achieve a total storage of an additional one billion seven hundred fifty million (1,750,000,000) gallons of water. Cost — approximately five million dollars (\$5,000,000).

Therefore, because of the availability of additional storage areas, the rapid recharge period of refilling the ponds, the availability of water in the Lakeville Watershed as shown in the above recommen-

dation, and the thirty million (30,000,000) gallon daily pumping capacity of the Quittacas pumping station, it would seem that a large, financial investment in the Turners Pond project would be unwise at this time. The money could be spent much more effectively in developing the present sources of water available to Southeastern Massachusetts in the Lakeville Watershed.

I feel that if we approach the problem of a regional basis, the Lakeville Watershed projects can be undertaken sooner, completed more quickly and at a lesser cost than any project presently under consideration including that at Turners Pond. The cost of the projects could be included in established rates minus any federal or state allocations received. It is impossible to estimate the cost at this time, until the projects to be undertaken are clearly defined and priorities established.

Since we all agree that there is a need of water in Dartmouth and in Southeastern Massachusetts, we should address ourselves to the problem of a joint study of the Turners Pond area with the town of Dartmouth. We would be remiss if we didn't give careful consideration to a possible opportunity that may exist.

I feel a sum not to exceed three thousand dollars (\$3,000), shared equally between the City of New Bedford and Town of Dartmouth, be appropriated for a feasibility study for the purpose of:

1. Making test drillings in the area.
2. Determining the possible quantity and quality of water.
3. Determining the effect on the Industrial Park wells.
4. Determining the cost to develop compared to the Lakeville Watershed as a source.

I further suggest that the Town of Dartmouth have its engineers examine the feasibility of establishing a storage area in the vicinity of the High Hill Reservoir, in order that the City of New Bedford can fill both High Hill and Dartmouth storage areas at the same time. This process would enable the Town of Dartmouth to eliminate its pumping facility on Allen Street, maintain better pressure in its lines and purchase water at a lesser cost.

I would also suggest that the New Bedford Water Board and Dartmouth execute a new five (5) year agreement which would provide for:

1. The rate per million gallons over a twenty (20) year period with a renewal clause every five (5) years, based on the costs of developing the watershed and the supplying of water to the outlet or metered source, of the storage area.

2. Joint curtailment of use during periods of excessive drought except in cases of emergency.
3. The Town of Dartmouth will not sell or serve water beyond its corporate boundaries without the approval of the City of New Bedford.
4. New Bedford will not expand or supply others outside its corporate boundaries than have been authorized by the Legislature.
5. Dartmouth will guarantee to limit the use of abatements on large water consumers.

PROJECTS PROPOSED

1. **Improvements at the watershed** — pertaining to the dam, storage, additional property; and, the reallocations of the water rights in the ponds.
2. **Water Treatment Plant.**
3. **Install a 20 million gallon Electric Pump** at Quittacas Station.
4. **Transmission mains** — complete overhaul and replacement of air valves and gate valves; and, the addition of new ones and added cross-overs with a Braley Road transmission main 24" connection for the Industrial Park.
5. **Middleboro Rd.** — 48" main needs gate valves, air valves and check valves.
6. **Cement Lining Program.**
7. **Cross-over Connection** — 24" in size from the Acushnet Ave. 30" — to Park St. 30" water mains.
8. **Hathaway Road** — connection from 30" at Nauset and Mt. Pleasant Sts. to the 42" (mains) at Rowe St.
9. **Brock Avenue** — replace 8" main with 16" main from David St. to Rodney French Blvd. (S).
10. **Replacement or reinforce with Gunite** — the 20" main laid in the 1800's that runs from Cedar Grove St. through the center to Sixth and County Streets.
11. **Relocate Pump** and increase storage at Hathaway Road Tank.
12. **Replacement of a large number of gate valves** throughout the system that are in a poor condition.
13. **Installation of gates** in front of all hydrants.
14. **Tie-ins** — of a large number or so-called dead-ends.

WATER REPORT

45 y

LEAKS

There have been twenty-three leaks on main pipe during the year as herewith shown.

Date	Size	Location	Cause
Jan. 2	6"	Maryland St., w. x Pine Grove St.	Cracked Main
Jan. 3	8"	Chatham St., intersection of Dawson St.	Joint Leak
Jan. 3	8"	Brownell Ave., s. x Hawthorn St. 103'	Cracked Main
Jan. 5	8"	Victoria St., w. x Ashley Blvd.	Cracked Main

Dec. 29	6"	Rockdale Ave., n. x Elm St. 17'	Cracked Main

5,875 feet of distribution pipe, in sizes from 6 inch to 30 inch were added to the system during the year and 269 feet was removed.

The total length of distribution pipe less than 4 inches now in use is 12,075 feet.

Forty-six stop gates have been set and five of these previously set have been removed. The total number now in use is 3,892.

The total of small size stop gates now in use is 96.

One waste gate has been set and one of those previously set have been removed making a total of 209 now in use.

A total of 216 air vent valves are now in use.

Twenty-five private gates have been set and one of those previously set has been removed making a total of 1,189 now in use.

Eight new hydrants have been set and sixteen of those previously set have been removed. The total number now in use is 2,178.

Three water cart hydrants have been removed making a total of 16 now in use.

Two hundred and forty-three service pipes have been laid and eighty-five of those previously laid have been removed. The total number now in place is 23,810. Of this number three hundred and eighty are unmetered fire services, twenty thousand eight hundred and forty-five are metered, and the balance of one thousand five hundred and eighty-five are not in use.

Two hundred and seventy-three service leaks have been repaired.

One hundred sixty-nine taps have been cleaned as follows:

Blow-offs	138	Trouble inside	31
-----------	-----	----------------	----

One thousand seven hundred twenty-three meters have been removed for repairs, one thousand seven hundred eighteen have been reset. Also two hundred and forty-eight new meters have been set for the year making the total number in use 20,845.

CONSUMPTION OF WATER

The Consumption of water for the year has been as follows:

Month 1967	Monthly Consumption				Daily Average
	New Bedford	Dartmouth	Acushnet	Total	Consumption
	Gallons	Gallons	Gallons	Gallons	Gallons
January	553,894,150	523,500	6,002,250	560,419,900	18,078,061
February	488,017,900	576,750	9,578,250	498,172,900	17,791,889
March	548,793,450	534,000	8,465,250	557,792,700	17,993,313
April	518,585,400	456,750	5,462,250	524,504,400	17,483,477
May	557,420,150	465,750	8,095,500	565,981,400	18,257,465
June	597,107,750	4,597,500	13,616,250	615,321,500	20,510,717
July	501,038,450	3,420,300	8,468,250	512,927,000	16,546,032
August	632,507,350	1,141,050	6,006,000	639,654,400	20,634,000
September	579,664,100	824,300	10,534,500	591,022,900	19,700,763
October	569,891,400	606,750	10,700,250	581,198,400	18,748,335
November	554,096,150	442,500	5,622,750	560,161,400	18,672,046
December	518,423,300	563,250	9,120,750	528,107,300	17,035,719
Totals	6,619,439,550	14,152,400	101,672,250	6,735,264,200	—
Averages	18,085,900	38,667	277,793	—	18,454,318

Maximum daily consumption—(24 hrs.)—June 1625,340,000 Gals.

Minimum daily consumption—(24 hrs.)—December 2510,554,200 Gals.

Average daily consumption—6 a.m. to 6 p.m.10,835,559 Gals.

Average night consumption—6 p.m. to 6 a.m. 7,617,219 Gals.

Amount of water consumed shown on above table includes the supplying of about 139.62 miles of distribution pipes located in the adjoining towns of Dartmouth and Acushnet. Dartmouth supplies 17,496 consumers through 4,999 taps. Acushnet supplies 5,540 consumers through 1,567 taps.

*Includes population supplied in towns of Dartmouth and Acushnet 6,566 taps, 23,036 consumers.

‡This consumption is for eleven months.

†This consumption is for thirteen months.

DATA ON METERED CONSUMPTION AND REVENUE

July 1, 1966 through June 30, 1967

	No. of Accounts	Number of gallons			Receipts for metered water		
		Total Gallons	Per Account	Per day per Acct.	Total Receipts	Per Account	Per M Gals.
*Using less than minimum rate viz: 30,000 gallons per year	3,742	71,220,000	19,032	52	42,537.31	11.30	.597
Using over minimum rate but less than 75,000 gallons per quarter	16,373	1,388,388,750	84,797	232	371,328.77	22.67	.267
Using between 75,000 and 750,000 gallons per quarter	452	324,178,500	717,209	1,965	77,877.84	172.29	.240
Using between 750,000 and 7,500,000 gallons per quarter	99	651,788,250	6,583,719	18,037	138,378.20	1,397.76	.212
Using between 7,500,000 and 15,000,000 gallons per quarter	8	279,375,750	34,921,968	95,676	51,292.75	6,411.59	.184
Using over 15,000,000 gallons per quarter	17	3,542,302,500	208,370,735	570,878	259,912.10	17,187.91	.073
Totals and averages	20,691	6,257,253,750	302,414	828	941,326.97	45.49	.150
Town of Dartmouth Venturi Meter	1	34,651,500		94,935	6,145.30		.177
Town of Acushnet—Special Rate	1	82,286,250		225,441	15,012.14		.174
**City of New Bedford Departments Metered Water Department Use		54,130,500					
		21,691,500					
GRAND TOTALS	20,693	6,450,013,500			962,484.41		

*Includes special assessment accounts

**Not charged to City of N. B. Depts.

As superintendent, I wish to express my appreciation for the help received from the Mayor, the Water Board, the members of the City Government, and particularly to the employees of the Water Department for their continued and wholehearted support.

Respectfully submitted,

GEORGE H. BRIGHTMAN,

Superintendent

STATEMENT OF WORK DONE BY THE SERVICE DEPARTMENT
FOR THE YEAR ENDING DECEMBER 31, 1967

Kind and Size	Services	Length on City and taker
Copper tubing, 2 inch	8	294.0
Copper tubing, 1 inch	179	9,237.4
Copper tubing, $\frac{3}{4}$ inch	39	1,613.5
Cast iron, cement lined, 8 inch	3	192.8
Cast iron, cement lined, 6 inch	8	999.1
Cash iron, cement lined, 4 inch	6	201.9
Totals.....	243	12,538.7

Twenty-three $\frac{5}{8}$ inch heavy lead services have been removed and replaced with $\frac{3}{4}$ inch copper services.

Nine $\frac{1}{2}$ inch heavy lead services have been removed and replaced with $\frac{3}{4}$ inch copper services.

Twenty-seven $\frac{5}{8}$ inch light lead services have been removed and replaced with $\frac{3}{4}$ inch copper services.

Ten $\frac{3}{4}$ inch light lead services have been removed and replaced with $\frac{3}{4}$ inch copper services.

Three 1 inch light lead services have been removed and replaced with 1 inch copper services.

One $\frac{3}{4}$ inch heavy lead service has been removed and replaced with a $\frac{3}{4}$ inch copper service.

One $\frac{3}{4}$ inch tin lined service has been removed and replaced with a $\frac{3}{4}$ inch copper service.

Twenty-seven $\frac{1}{2}$ inch heavy lead services, two 1 inch heavy lead services, thirteen $\frac{5}{8}$ inch light lead services, twenty-one $\frac{5}{8}$ inch heavy lead services, ten $\frac{3}{4}$ inch copper services, one 1 inch copper service, three 2 inch galvanized iron services, five $\frac{3}{4}$ inch light lead services, two 6 inch cast iron services, and one 1 inch light service have been removed.

The following extensions were made to services by takers: 24 feet of 1 inch copper tubing and 70 feet of $\frac{3}{4}$ inch copper tubing.

Length of service pipe laid during the year	12,632.7
Number of services laid in 1967	243
Number of services removed	85
Number to be added	158
Number in use December 31, 1966	23,652
Number in use December 31, 1967	23,810

SUMMARY OF STATISTICS

FOR THE YEAR ENDING DECEMBER 31, 1967

IN FORM RECOMMENDED BY THE NEW ENGLAND
WATER WORKS ASSOCIATION

NEW BEDFORD WATER WORKS

NEW BEDFORD
BRISTOL COUNTY, MASS.

GENERAL STATISTICS

Population by census of 1967 — 103,897

Date of construction, 1866 to 1869, inclusive. Further supply, 1895 to 1899 inclusive.

By whom owned, City of New Bedford.

Source of supply. — Water was first introduced on Nov. 26, 1869. From that date until July 10, 1899, the supply was taken from a storing reservoir artificially formed by constructing a dam across the valley of the Acushnet River, seven miles north of the centre of the City. This supply was augmented by a connection made in 1886 with Little Quittacas Pond.

Since July 10, 1899, the whole supply has been taken from Great and Little Quittacas Ponds, eleven miles north of the centre of the city.

In 1926, under Legislative Authority to take 11½ million gallons of water per day from Long, Assawompsett and Pocksha Ponds, a connection was made to bring water from Pocksha into Great Quittacas Pond, when needed.

Mode of supply. — Previous to July 10, 1899, the water flowed by gravity from the Acushnet Storing Reservoir (grade 40' + high water New Bedford Harbor) through a brick conduit 3 feet wide, 4 feet high, 5 6/10 miles long to a receiving reservoir (capacity 3 million gallons; grade 30') located opposite the Purchase Street Pumping Station. Thence it was pumped into the Mt. Pleasant Distributing Reservoir (capacity 15 million gallons; grade 154') located 1,879 feet distance, from whence it flowed by gravity into the city's distributing system.

Since July 10, 1899, the entire supply has been pumped from Little Quittacas Pond (grade 52'). It is pumped through two 48 inch force mains 8¼ miles long to a distributing reservoir (capacity 67 million gallons, grade 216') located upon High Hill, in the town of Dartmouth. From this reservoir, it flows into the city's distribution system by gravitation through two 36 inch cast iron pipes averaging 4 1/17 miles in length and one 42 inch pre-cast concrete pipe following a different course and approximately the same length. The concrete transmission line was put into operation in 1958.

It is also possible to pump directly to the city through a 48" and 36" main using the reservoir as a balance. This latter connection was completed in 1922.

The first named system is not now in use.

PUMPING STATISTICS

LITTLE QUITTACAS STATION

1. Builders of Pumping Machinery.

Electric Units

- No. 1 10 million gallons per day centrifugal pump manufactured by De-Laval Steam Turbine Company, driven electrically by 400 H. P. 3 phase, 4160 volt, 60 cycle synchronous motor with special step windings manufactured by the Electric Machinery Company.
- No. 2 Duplicate of No. 1.
- No. 3 15 million gallons per day centrifugal pump manufactured by De-Laval Steam Turbine Company, electrically driven by 600 H. P., 3 phase, 4160 volt, 60 cycle synchronous motor with special step windings manufactured by the Electric Machinery Company.

The three foregoing pumps are controlled by switches and automatic starting equipment in a switchboard manufactured by the Electric Machinery Company.

- No. 4 30 million gallons per day centrifugal pump manufactured by De-Laval Steam Turbine Company, directly driven by 950 H. P. Baldwin locomotive type 6 cylinder supercharged Diesel engine, 600 R.P.M., manufactured by the Baldwin Locomotive Company.

Electric current purchased off New Bedford Gas and Edison Light Company.

Total installed capacity, 65 million gallons per day.

LITTLE QUITTACAS STATION — Pump 4 "Diesel"

2. Description of fuel used.

- a. No. 2 Diesel oil.
- b. Brand of oil — various.
- c. Price of oil per gallon — delivered to Little Quittacas Station 12.49 cents.
- 3. Oil consumed for the year 22,202 gals.
- 4. Total pumping for the year 437,560,000 gallons by Venturi meter.
- 5. Average static head against which pumps work — 169.5.
- 6. Average dynamic head against which pumps work — 190.0.
- 7. Number of gallons pumped per gallon of fuel oil — 19,708.
- 8. Number of gallons raised 100 feet per gallons of fuel oil — 37,445 gals.
- 9a. Cost per million gallons raised into High Hill Reservoir — \$11.73.
- 9b. Cost per million gallons raised into High Hill Reservoir — diesel fuel only — \$6.34.

LITTLE QUITTACAS STATION — Pumps 1, 2, 3.

- 10. Total pumping time for the year — 13,551:45 Hrs.
- 11. Total current used for the year — 4,395,426 K.W.H.
- 12. Total Pumpage for the year — 6,296,589,984 Gals.
- 13. Number of gallons pumped per K.W.H. — 1,432 Gals.

WATER REPORT

83 y

14. Number of K. W. H. required to raise one million gallons into High Hill Reservoir — 698.
Cost per K. W. H. varies in accordance with amount consumed.
15. Average cost per K.W.H. — \$.0115.
- 16a. Cost per million gallons raised into High Hill Reservoir, (Pumps 1, 2, 3) — \$23.98.
- b. Per power only \$8.06.
Total cost of pumping, figured on pumping station expenses, viz: \$156,146.58.
17. Per million gallons pumped \$23.18.
18. Per million gallons raised one foot (dynamic) — 12 cents.
Cost of pumping figured on total maintenance and interest on bonds (see financial CC + DD) less credits, viz: \$588,483.00.
19. Per million gallons pumped \$87.38.
20. Per million gallons raised one foot (dynamic) — 47 cents.
Cost of pumping figured on total maintenance, interest on bonds and bond payments (see financial CC + DD + EE) less credits, viz: \$785,483.00.
21. Per million gallons pumped \$116.64.
22. Per million gallons raised one foot (dynamic) — 63 cents.

STATISTICS OF CONSUMPTION OF WATER

1. Estimated total population at date (New Bedford)103,897
Acushnet 7,840; Dartmouth 18,600 — Total*130,337
2. Estimated population on lines of pipe*127,000
3. Estimated population supplied*126,000

Year July 1, 1966 through June 30, 1967

4. Total consumption for the year7,156,381,500
5. Passed through meters6,450,013,500
6. Percentage of consumption metered91%
7. Average daily consumption19,606,524
8. Gallons per day to each inhabitant*150
9. Gallons per day to each consumer*155
10. Gallons per day to each tap (active)*666
11. Average rate received per million gallons metered\$149.22
12. Average rate received per million gallons consumed\$134.49

Year January 1, 1967 through December 31, 1967

13. Cost of supplying water, per million gallons consumed figured on on total maintenance, less credits\$78.94
14. Cost of supplying water per million gallons consumed figured on total maintenance plus interest on bonds (CC + DD) less credits\$87.37
15. Total cost of supplying water per million gallons consumed figured on total maintenance, plus interest on bonds and bond payments (CC + DD + EE) less credits\$116.62

*Includes population supplied in the towns of Dartmouth and Acushnet.

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-Eight

AN ORDINANCE

PROVIDING FOR AN INCREASE IN THE MEMBERSHIP
OF THE COMMISSION ON HUMAN RELATIONS.

WHEREAS, the deferred operation of this ordinance would in part defeat its purpose, it is hereby declared to be an emergency ordinance, under the provisions of Section 20 of Chapter 43 of the General Laws (Ter. Ed.) and necessary for the preservation of the public safety, necessity and convenience:

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. The provisions of the City Code as contained in 3-2901 of said Code, are hereby amended by striking out the first paragraph of said 3-2901 and inserting in place thereof the following:

Sec. 3-2901 Membership; vacancies.

There is hereby established a Commission on Human Relations hereinafter called the "commission", which shall consist of nine (9) members, each of whom shall reside or be employed in New Bedford. Commission members shall serve without compensation and shall be appointed by the Mayor and confirmed by the City Council. Of the nine members originally appointed to the Commission, three (3) shall be appointed for a term ending December 31, 1968, and three (3) shall be appointed for a term ending December 31, 1969, and three (3) for a term ending December 31, 1970. Thereafter, as the terms of the original appointees expire, their successors shall be appointed for three (3) year terms. In the event of death or resignation of any member, his successor shall be appointed to serve the unexpired term by the Mayor subject to confirmation by the City Council.

CITY ORDINANCES

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

ZONING CHANGE NO. 42

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-Eight
AN ORDINANCE

Extending the existing Business Zone of property at the north-east corner of BELLEVILLE AVENUE and WOOD STREET, northerly for a distance of 167.01 feet on Belleville Avenue, changing the zoning classification from Residence B and Industrial A to BUSINESS

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. That all of the property bounded and described, as follows:

Beginning at a point in the easterly line of Belleville Avenue, distant northerly therein one hundred two and $3/100$ (102.03) feet from its point of intersection with the northerly line of Wood Street, said point also being in the northerly line of the existing Business Zone on the northerly side of Wood Street;

thence northerly in said easterly line of Belleville Avenue, a distance of one hundred sixty-seven and $1/100$ (167.01) feet to a point in the northerly line of land now or formerly belonging to Charles P. Horton;

thence easterly by land now or formerly belonging to Charles P. Horton, a distance of two hundred forty-one and $99/100$ (241.99) feet to a point at the southeasterly corner of land now or formerly belonging to Rose A. and Loretta Lapre, said point also being in Discontinued Colrain Street;

thence southerly in a line parallel to, and distant easterly twenty and $24/100$ (20.24) feet from the westerly line of said Discontinued Colrain Street, a distance of one hundred twenty-one and $92/100$ (121.92) feet to a point;

thence easterly in a straight line coincident with the southerly line of land now or formerly belonging to Mary A. Rogers, a distance of one hundred forty-three and $76/100$ (143.76) feet to a point;

thence southerly in a line parallel to and distant westerly sixty (60) feet from the westerly line of Discontinued Leyden Street, a distance of eighty (80) feet, to a point in the northerly line of the existing Business Zone on the northerly side of Wood Street;

thence westerly in said northerly line of the existing Business Zone on the northerly side of Wood Street, and continuing in a straight line across Discontinued Colrain Street, a distance of one hundred sixty (160) feet, more or less, to a point in the westerly line of said Discontinued Colrain Street;

thence northerly in the westerly line of said Discontinued Colrain Street, a distance of thirty-three and 7/100 (33.7) feet, more or less, to a point in the northerly line of the existing Business Zone on the northerly side of Wood Street;

thence westerly in the northerly line of the existing Business Zone on the northerly side of Wood Street, a distance of two hundred ten and 64/100 (210.64) feet to the point of beginning;

all of which is now zoned as Residence B and Industrial A, be reclassified and zoned as Business;

all as shown on a plan on file in the Office of the City Clerk; and, the Zoning Map adopted as part of Section 9-201 of the Code of the City of New Bedford is hereby amended to conform with said reclassification.

SECTION 2. This Ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

AN ORDINANCE

AMENDING AN ORDINANCE WHICH ESTABLISHED A
COMMISSION ON RECREATION

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. The provisions of the City Code as contained in Section 3-2501, as amended February 25, 1965, is hereby further amended by deleting the third sentence of said section which reads as follows: "Of the nine (9) members one (1) shall be a member of the Board of Park Commissioners; and one (1) shall be a member of the New Bedford School Committee", so that Section 3-2501 shall read as follows:

Sec. 3-2501 Membership; term.

There is hereby created a Commission on Recreation to be comprised of nine (9) members, to serve without pay, appointed by the Mayor and confirmed by the City Council. Of the nine (9) members originally appointed hereunder, three (3) shall serve for terms ending December 31, 1963; three (3) for terms ending December 31, 1964; and three (3) for terms ending December 31, 1965; and thereafter as the terms of the original appointees expire, their successors shall be appointed for three (3) year terms. All of the members of the Commission shall be residents of the City of New Bedford. The Commission shall elect one (1) of its members to act as Chairman for the Commission for the period of one (1) year commencing January first of each year.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

AN ORDINANCE

ESTABLISHING REGULAR MEETINGS OF THE CITY COUNCIL

Be it ordained by the City Council of the City of New Bedford as follows:-

SECTION 1. Chapter 2 of the New Bedford City Code is hereby amended by striking out the second paragraph of Sec. 2-106, as amended, and inserting in place thereof the following:

Sec. 2-106 (second paragraph)

All other regular meetings of the City Council, except those designated in the next paragraph, shall be held in the City Council Chambers, Municipal Building, at 7:45 o'clock in the evening of the second and fourth Thursday of each month, from the second Thursday of January to and including the fourth Thursday of June and from the second Thursday in September to and including the fourth Thursday in December, provided, however, that when a regular meeting day falls on a holiday, the Tuesday immediately preceding shall be the date for said meeting.

Additional regular meetings shall be held on the third Thursday of July and on the third Thursday of August in each year.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

Changing the zoning classification of property on the east side of SHAWMUT AVENUE, north of NASH ROAD and south of the Municipal Airport, from Residence B to Industrial A

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. That all of the property bounded and described, as follows:

Parcel 1. Beginning at the point of intersection of the northerly line of Nash Road and the easterly line of Shawmut Avenue;

thence northerly in said easterly line of Shawmut Avenue, a distance of three hundred ten (310) feet more or less, to an angle;

thence northwesterly in said easterly line of Shawmut Avenue, a distance of five hundred sixty-eight and $81/100$ (568.81) feet, to a point in the southerly line of land now or formerly comprising the Sacred Heart Cemetery;

thence easterly in a southerly line of said cemetery, a distance of five hundred fifty-one and $69/100$ (551.69) feet, to an angle;

thence southerly in a westerly line of said cemetery, a distance of three hundred seventy-five and $37/100$ (375.37) feet, to an angle;

thence again easterly in a southerly line of said cemetery, a distance of one thousand one hundred fifteen and $49/100$ (1115.49) feet, to a point at the northwest corner of an existing Business Zone on the west side of Mt. Pleasant Street;

thence southeasterly in the westerly limit of said existing Business Zone, a distance of three hundred fifty-two and $50/100$ (352.50) feet, to a point in the northerly line of Nash Road;

thence westerly in said northerly line of Nash Road, a distance of one thousand three hundred twenty-six and $60/100$ (1326.60) feet, to the point of beginning.

Parcel 2. Beginning at the point of intersection of the easterly line of Shawmut Avenue and a northerly line of land now or formerly comprising the Sacred Heart Cemetery;

thence northwesterly in said easterly line of Shawmut Avenue, a distance of nine hundred sixty-four and $97/100$ (964.97) feet, to a point in the southerly line of proposed McNaboe Street;

thence easterly in said southerly line of proposed McNaboe Street, a distance of three hundred one (301) feet more or less, to a point in the westerly line of proposed Barry Street;

thence southerly in said westerly line of proposed Barry Street, a distance of thirty-four (34) feet more or less, to a point in a northerly line of land herein being described;

thence easterly in said northerly line of land herein being described, a distance of fifty (50) feet more or less, to a point in the easterly line of proposed Barry Street;

thence northerly in said easterly line of proposed Barry Street, a distance of thirty-four (34) feet more or less, to its point of intersection with the south line of proposed McNaboe Street;

thence easterly in said southerly line of proposed McNaboe Street, a distance of six hundred (600) feet, to its point of intersection with the westerly line of proposed Berkley Street;

thence southerly in said westerly line of proposed Berkley Street, a distance of sixty-seven (67) feet more or less, to a point in a northeasterly line of land now or formerly comprising the Sacred Heart Cemetery;

thence continuing in the general westerly line of said Sacred Heart Cemetery, as follows: northwesterly, a distance of forty-two (42) feet more or less, to an angle; thence westerly, a distance of forty-nine and $50/100$ (49.50) feet, to an angle; thence southerly, a distance of three hundred ninety-six (396) feet, to an angle; thence southerly, a distance of three hundred thirty (330) feet, to an angle; thence westerly, a distance of ninety-nine (99) feet, to an angle; thence southwestwesterly, a distance of one hundred fifteen and $50/100$ (115.50) feet, to an angle; thence southwestwesterly, a distance of ninety-eight and $92/100$ (98.92) feet, to the point of beginning.

Parcel 3. Beginning at the point of intersection of the easterly line of Shawmut Avenue with the northerly line of proposed McNaboe Street;

thence northwesterly in said easterly line of Shawmut Avenue, a distance of one hundred thirty-two (132) feet more or less, to a point at a southwesterly corner of land now or formerly belonging to the City of New Bedford Airport Commission;

thence northeasterly in a southeasterly line of said land now or formerly belonging to the City of New Bedford Airport Commission, a distance of fifty-eight (58) feet more or less, to a point in the southerly line of proposed Connelly Street;

thence easterly in said southerly line of proposed Connelly Street, a distance of three hundred seventy-two (372) feet more or less, to its point of intersection with the westerly line of proposed Barry Street;

thence southerly in said westerly line of proposed Barry Street, a distance of one hundred sixty (160) feet, to its point of intersection with the northerly line of proposed McNaboe Street;

thence westerly in said northerly line of proposed McNaboe Street, a distance of three hundred thirty (330) feet more or less, to the point of beginning.

Parcel 4. Beginning at the point of intersection of the northerly line of proposed McNaboe Street and the easterly line of proposed Barry Street;

thence northerly in said easterly line of proposed Barry Street, a distance of one hundred sixty (160) feet, to its point of intersection with the southerly line of proposed Connelly Street;

thence easterly in said southerly line of proposed Connelly Street, a distance of six hundred (600) feet, to its point of intersection with the westerly line of proposed Berkley Street;

thence southerly in the westerly line of proposed Berkley Street, a distance of one hundred sixty (160) feet, to its point of intersection with the northerly line of proposed McNaboe Street;

thence westerly in said northerly line of proposed McNaboe Street, a distance of six hundred (600) feet, to the point of beginning.

Parcel 5. Beginning at the point of intersection of the northerly line of proposed Connelly Street and a southeasterly line of land now or formerly belonging to the City of New Bedford Airport Commission;

thence northeasterly in said southeasterly line of land now or formerly belonging to the City of New Bedford Airport Commission, a distance of two hundred twenty-two (222) feet more or less, to a point in the southerly line of proposed Murphy Street;

thence easterly in said southerly line of proposed Murphy Street, a distance of one hundred sixty-five (165) feet more or less, to its point of intersection with the westerly line of proposed Barry Street;

thence southerly in said westerly line of proposed Barry Street, a distance of one hundred sixty (160) feet, to its point of intersection with the northerly line of proposed Connelly Street;

thence westerly in said northerly line of proposed Connelly Street, a distance of three hundred twenty (320) feet more or less, to the point of beginning.

Parcel 6. Beginning at the point of intersection of the northerly line of proposed Connelly Street with the easterly line of proposed Barry Street;

thence northerly in said easterly line of proposed Barry Street, a distance of one hundred sixty (160) feet, to its point of intersection with the southerly line of proposed Murphy Street;

thence easterly in said southerly line of proposed Murphy Street, a distance of four hundred ninety-five (495) feet, to a point in a southwesterly line of land now or formerly belonging to the City of New Bedford Airport Commission;

thence southeasterly in said southwesterly line of land now or formerly belonging to the City of New Bedford Airport Commission, a distance of one hundred fifty-nine and $45/100$ (159.45) feet, to a point in the westerly line of proposed Berkley Street;

thence southerly in said proposed westerly line of proposed Berkley Street, a distance of forty (40) feet, to its point of intersection with the northerly line of proposed Connelly Street;

thence westerly in said northerly line of proposed Connelly Street, a distance of six hundred (600) feet, to the point of beginning.

Parcel 7. Beginning at the point of intersection of the northerly line of proposed Murphy Street and a southeasterly line of land now or formerly belonging to the City of New Bedford Airport Commission;

thence northeasterly in said southeasterly line of land now or formerly belonging to the City of New Bedford Airport Commission, a distance of one hundred thirty-six (136) feet more or less to an angle;

thence northwesterly in a northeasterly line of said land now or formerly belonging to the City of New Bedford Airport Commission, a distance of one hundred twenty-five (125) feet more or less, to a point in the southerly line of proposed Downey Street;

thence easterly in said southerly line of proposed Downey Street, a distance of one hundred twenty-two (122) feet more or less, to its point of intersection with the westerly line of proposed Barry Street;

thence southerly in said westerly line of proposed Barry Street, a distance of one hundred sixty (160) feet, to its point of intersection with the northerly line of proposed Murphy Street;

thence westerly in said northerly line of proposed Murphy Street, a distance of one hundred three (103) feet more or less, to the point of beginning.

Parcel 8. Beginning at the point of intersection of the northerly line of proposed Murphy Street and the easterly line of proposed Barry Street;

thence northerly in said easterly line of proposed Barry Street, a distance of one hundred sixty (160) feet, to its point of intersection with the southerly line of proposed Downey Street;

thence easterly in said southerly line of proposed Downey Street, a distance of three hundred fifteen (315) feet, to a point in a southwesterly line of land now or formerly belonging to the City of New Bedford Airport Commission;

thence southeasterly in said southwesterly line of land now or formerly belonging to the City of New Bedford Airport Commission, a distance of two hundred five and 46/100 (205.46) feet, to a point in the northerly line of proposed Murphy Street;

CITY ORDINANCES

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Sixty-Eight

AN ORDINANCE

AMENDING THE ZONING ORDINANCE RELATIVE TO
LAND HENCEFORTH ACQUIRED BY THE CITY OF NEW
BEDFORD

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. Chapter 2 of Title 9 of the New Bedford City Code is hereby amended by adding after Section 9-201 thereof, the following section:

Section 9-201A - LAND HENCEFORTH ACQUIRED BY
THE CITY OF NEW BEDFORD

That any and all land or premises hereafter so conveyed as to vest title in the City of New Bedford shall, if previously unzoned, zoned as a non-conforming use, or already zoned as a residential district A, B, or C, retain its residential zone classification or be immediately and automatically classified as "Residence A"; and that the zoning ordinance map, upon acquisition of such title, be amended to conform with said classification. The provisions of this section shall not apply to land and premises acquired by the City by virtue of tax title proceedings, nor to any such land and premises zoned Business or Industrial A, B, or C at the time of acquisition.

SECTION 2. This Ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

AN ORDINANCE

INCREASING NUMBER OF ASSISTANT CITY SOLICITORS
TO THREE

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. Section 1-207 of the Code of the City of New Bedford be and hereby is amended by striking the word “two” in the first sentence and inserting in place thereof the word “three” so that said section 1-207 shall read as follows:

Section 1-207. Assistants

The Mayor, subject to confirmation by the city council, may appoint three assistant city solicitors, each of whom shall hold office until December 31, of the year in which he is appointed. The assistant city solicitors shall be residents of the City of New Bedford, admitted as attorneys and counsellors at law of the courts of the Commonwealth of Massachusetts and they shall not hold any other office under the city government.

The assistant city solicitors shall assist the city solicitor and perform such duties as he may require in the conduct of his office; and during the absence or disability of the city solicitor, or when requested by him to do so, the assistant designated by the city solicitor shall perform the duties of the city solicitor.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the Massachusetts General Laws (Ter. Ed.).

IN CITY COUNCIL, September 12, 1968

Referred to the Committee on Ordinances.
